To Solari Readers

“People like you are still living in what we call the reality-based community. You believe that solutions emerge from your judicious study of discernible reality. That’s not the way the world really works anymore. We’re an empire now, and when we act, we create our own reality. And while you are studying..."
that reality—judiciously, as you will—we’ll act again, creating other new realities, which you can study too, and that’s how things will sort out. We’re history’s actors, and you, all of you, will be left to just study what we do.” ~Senior Advisor to President George W. Bush, quoted in an article by Ron Susskind in 2004

This week on The Solari Report, The Saker joins me on our quarterly The Emerging Multipolar World to discuss the events in Syria.

We cover the latest allegations regarding chemical attacks, retaliatory missile strikes and then dig into the Trump Administration reversals regarding US policy in the Middle East.

1. **Question:** What is the US strategy to maintain a unipolar empire?

2. **Question:** What does control of Syria have to do with maintaining the US dollar as reserve currency?

3. **Question:** What are the roles of the UK, Israel, Iran, Russia and China?

4. **Question:** What is happening in the Ukraine and how does that relate to events in the Middle East.

Throughout this discussion, Saker expresses his concern that the possibility of the Neocon’s triggering a nuclear war is growing.

If you have not heard or read it yet, our discussion in February, *Necons & the War Lobby*, is excellent background. Access it [here](#) and our review of the Saker’s new book [here](#).

On the Road to Uluru: Day -5

“I believe in the human race. It has a future. We are having some rough and difficult times, but we’re going to make it…. [We] have nothing to fear. We’re going to make it through and we are going to reach a form of adulthood. And we are in time going out there and taking our rightful place in this infinite universe filled with intelligent life. And I say to people, “Your children, grandchildren, great-grandchildren are going to the stars. And they’re going out there, and they’re going to take their rightful place.”

~ Bob Dean

By Catherine Austin Fitts

In 1998, a group of people associated with the U.S. Navy tried to persuade me that aliens existed and lived among us. I was offered an opportunity to “have lunch with aliens.” I declined, saying that I was managing too much legal and business risk at the time “to be seen lunching with aliens.”

Ever since, I have tried to sort out what is going on in space around us. After two decades of searching, I am confident of two things. The first is that there is quite a lot going on in space and it has a significant impact on our day to day lives and finances. The second is that after a great deal of study, I have more questions than answers.

The Real Financial Flows Blowing Bubbles - Connecting the Dots from Washington to Auckland

Join Catherine at one of Auckland’s iconic homesteads, for a 2 hour guided conversation, which will expose the myths, lies, and deceptions we are subjected to on a daily basis.

Catherine is competent to cover subjects as diverse as:

- Deep State Globalists intending to destroy the US Constitution.
- 21 Trillion dollars is missing. Where did it go? What's going on?
- Official reality and false flag events... including school shootings.
- The weaponizing of the weather and the menace lurking in 5G.
- The ‘break-away civilization and the secret space program.

And much more...

This event is free, but you must pre-register.

There are only 40 spaces.
Highlights from Last Week - 1st Quarter 2018 Wrap Up, Who's Who & What's Up in the Space-Based Economy

This week on The Solari Report, I will present the theme of the 1st Quarter 2018 Wrap Up: Who's Who & What's Up in the Space-Based Economy.

I will review the area of activities, the changes in technology that are inspiring growth and the companies and private enterprises active in space. I will also cover the unanswered questions that make evolving an integrated framework for space economics such a mind-bending challenge.

The Trump Administration is significantly increasing US interest and investment in space. The President has even indicated he wants a “Space Corp.” There is a lot to be excited about.

However, there are also significant concerns. Will investment in space merely be used to justify more central control with surveillance and communications technology combined with high tech weaponry? I will touch on Elana Freeland's new book, Under An Ionized Sky.

Make sure you review our updated presentation under Space Enterprises at the 1st Quarter 2018 Wrap Up Web Presentation. Jason Worth has updated and expanded our list of companies traded on US, European and Asian stock markets, as well as private space companies (yes, lots of new start ups) and governmental organizations. Reviewing the growing number of companies involved helps demonstrate the breadth of the activities involved and the explosive investment underway.
