Solari Report Update

Future Science – The Wave Genome – Quantum Holography of DNA with Ulrike Granögger - August 16th

To Solari Readers

“We know today that man, essentially, is a being of

From The Site

An Afternoon in Sofia with Thomas Meyer

August 30th
The Minds of Men with Aaron and Melissa Dykes
light. And the modern science of photobiology … is presently proving this. In terms of healing the implications are immense. We now know, for example, that quanta of light can initiate, or arrest, cascade-like reactions in the cells, and that genetic cellular damage can be virtually repaired, within hours, by faint beams of light. We are still on the threshold of fully understanding the complex relationship between light and life, but we can now say emphatically, that the function of our entire metabolism is dependent on light.” ~ Dr. Fritz Albert Popp, The International Institute of Biophysics

By Catherine Austin Fitts

In her second report for the Future Science series, Ulrike Granögger explores the holographic nature of our DNA and of life, intelligence and humanity.

I have watched this presentation twice. It rocked my world. As I listened to Ulrike describe one scientific study after another that informs the fundamental flows of life, I kept asking myself, “How did I not know this? How can knowledge of such powerful science be so suppressed?”

Get ready to have another paradigms shift. Ulrike recommends you watch *The Wave Genome* in several sittings – you will want time to digest and to explore some of the links and additional information provided. It is also invaluable to listen to this presentation in combination with last week’s interview by Harry Blazer of Dr. Hugo de Garis regarding the potential risks of artificial intelligence or AI.

In *Money & Markets* this week from Brittany in France, I will discuss the latest in financial and
geopolitical news. Please e-mail or post your questions for Ask Catherine at our Money & Markets commentary here.

In Let’s Go to the Movies, I recommend you watch David Tong’s presentation to the Royal Institution of Great Britain (RI): “Quantum Fields: The Real Building Blocks of the Universe.” When you see Ulrike’s presentation, you will hear her recommendation that you watch this video.

See the blog post here.

Just A Taste!

The Emerging Multipolar World with Saker Now Public!
Our last interview with the Saker is now available to the public and non-subscribers and can be viewed here!

By Catherine Austin Fitts

We review the Helsinki meeting between Trump and Putin as well as Trump’s participation with NATO, and the resulting reaction from a Washington establishment drowning in swamp drama.

We also cover events in the Middle East, Ukraine, and Iran.

Russia is unloading its portfolio of US Treasury securities, showboating new weapons, deploying troops on the European front and working with China to develop the Shanghai Cooperation Agreement.

Iran has fired its central bank governor and announced a new cryptocurrency to trade around US economic sanctions. Fake news is leaking that Trump is planning to bomb Iran shortly.

The White House is announcing new tariffs with China while the Congress works quietly to rescind them.

The economic and political order is – to say the least – fluid while US leadership sorts out whether it represents US citizens or multinational corporations exporting weapon systems and making sales to a rising global middle class.
Food for the Soul: Dark Money

“Campaign finance is the gateway to every other issue you might care about – whether it be education or tax reform or foreign policy.” Ann M. Ravel, former chairwoman of the Federal Election Commission.

By Your Culture Scout

**Dark Money** is a new political documentary that addresses financing for political campaigns at a state level, or to quote the movie’s logline: “the influence of untraceable corporate money on our elections and elected officials.” The US Supreme Court decision in 2010 in favor of Citizens United led to a legalization of giving election funds from undisclosed sources that allowed manipulating elections by sinking some candidates and elevating others. This decision’s devastating impact on state laws, democratic processes and the protection of states against corporate harm is shown in a case of the state of Montana and a court case this state recently waged against a corrupt politician. *Dark Money* was directed/produced by Kimberly Reed, and produced by Katy Chevigny, it has already been a success at many major US festivals, and it is currently being screened in selected theaters around the country.

**Invitation to Solari Subscribers - Lunch with Catherine and Dr. Mark Skidmore, Sept 22, 2018 in Asheville, NC**
"Life starts all over when it gets crisp in the fall." ~ F. Scott Fitzgerald

Solari Report subscribers are invited to join Catherine and Dr. Mark Skidmore on Sept 22, 2018 in Asheville, North Carolina.

Dr. Mark Skidmore is a professor in the Department of Economics and holds the Morris Chair in State and Local Government Finance and Policy in the Department of Agricultural, Food, and Resource Economics at Michigan State University. He is also Director of the North Central Regional Center for Rural Development.

Dr. Skidmore was the Solari Hero of the Year for 2017 in recognition for his contribution to understanding the size of and the unanswered questions surrounding the undocumentable adjustments at DOD and HUD.

This will provide a wonderful opportunity for you to meet Dr. Skidmore, Catherine and other Solari Report subscribers in the area.

"Scientists for Peace, Planetary Consciousness and Ethics"

October 19-21, 2018
International Conference – The venue will be the Hall of Culture in Città della Pieve, a little middle age town between Florence and Rome in the heart of Italy.

Today people need a new science that spreads ethics and involves all aspects of life – from biology to cosmology, from physics to consciousness – so that applied sciences like engineering and medicine will be expressions of harmonious relationships. This change of the paradigm in science is vital to our future. Humanity needs to develop a new understanding of life in the universe.

Now the joint technological capabilities have reached a point that threatens the end of human history: ethics in science has never been so important.

Three days of full immersion in debates and exchanges, hosted in one of the most beautiful regions of Italy, its “green heart”, Umbria. Scientists, engineers, medical doctors, economists and educators of international renown, recognized for their commitment for common good, have been invited to give the possible answers to the following questions.

FAQ: How Do I Access the Full Archive of Subscriber Content?
Solari Report subscriber content is located on two URLs:

**home.solari.com**

You can access your subscriber content by logging in at home.solari.com

Everything we have published during the last year (growing to two years) is on this URL.

Each Solari Report has a commentary, containing description, an introductory video excerpt and audio files and transcripts.

You can access all these materials from the Navigation Bar under Solari Report or main sections on the home page: Weekly Interviews, Money & Markets Commentary, Quarterly and Annual Wrap Ups.

For quick access you can pull up a table of all audios and transcripts by clicking on the graphic of a microphone at the top of the page. That will give you a link to the commentary, audio files and transcripts.

Each Quarterly and Annual Wrap Up comes with a web presentation which is completed first, transcripts for individual parts and then a full graphic PDF treatment, flip book and hard copy which are published after we have produced the individual sections in audio form with web presentation and transcripts. Subscribers who sign up for the digital + print subscription automatically receive the hard copy. Subscribers who are signed up for digital can purchase hard copies at the Solari Store.

If you are new subscriber, you will want to check out Core Concepts (See right hand lower corner on the home page). This will help you access some of the ideas and terms we use at the Solari Report.

**Highlights from Last Week - The Artilect War: Will AI be the Death of Us?, with Dr. Hugo de Garis**
This week on The Solari Report, Harry Blazer speaks to Dr. Hugo de Garis about his book, *The Artilect War: Cosmists vs. Terrans – A Bitter Controversy Concerning Whether Humanity Should Build Massively Intelligent Godlike Machines*, and about the dangers of artificial intelligence or AI.

Dr. de Garis is Australian. He studied theoretical physics and then began developing artificial intelligence. According to Wikipedia, in 1992 he received his PhD from Université Libre de Bruxelles, Belgium. He worked as a researcher at ATR (Advanced Telecommunications Research institute international), Japan from 1994–2000, a researcher at Starlab, Brussels from 2000–2001, and associate professor of computer science at Utah State University from 2001–2006. Until his retirement in late 2010 he was a professor at Xiamen University [Fujian, China], where he taught theoretical physics and computer science, and ran the Artificial Brain Lab. He is now in the process now of moving back to his native Australia.

Dr. de Garis has serious reservations about the risks associated with artificial intelligence. For the first part of this Solari Report, he and Harry discuss the nature of artificial intelligence and the associated risks. In the process, Harry becomes intrigued with integrating the discussion with other developments in global governance and geopolitics and outlines some of this thoughts on the application of AI to further centralize political and economic control. I have asked our team to make a special video for posting on Thursday of that 20-minute plus section in addition to our regular audio. We will also post Harry’s recommended subscriber links.
