Solari Report Update

The Cosmic Implications of Mind Control with Dr. Joseph Farrell - September 6th

To Solari Readers

"Meaning is important, is even central. It is not only that man is adapted to the universe. The universe is adapted to man. Imagine a universe in which one or another of the fundamental dimensionless constants of physics is altered by a few percent one way or the other? Man could never come into being in such a

universe. That is the central point of the anthropic principle. According to this principle, a life-giving factor lies at the centre of the whole machinery and design of the world.” ~ John A. Wheeler, Center for Theoretical Physics, University of Texas at Austin

By Catherine Austin Fitts

This week on The Solari Report, Dr. Joseph Farrell joins me to discuss his new book *Microcosm and Medium: The Cosmological Implications and Agenda of Mind Control*.

It's time for America is to break from its mind control trance. Step one is to understand that mind control technologies are real — and they are deeply dangerous. Step two is to see the opportunity — the creative potential that is possible when we break free.

With *Microcosm and Medium*. Dr. Farrell has written the best book I have read yet on the mind control being used to manipulate you and me. More than once, I had to put the book down to digest an entirely new insight. I was amazed to realize how much there was about this subject that I had not yet understood. Looking back over the descent of American politics and communities into madness, I gained new perspectives on how it happened.

This book is invaluable to understand the world we live in and why we can, as Joseph so often says, “own the culture.” Indeed, I now understand what he means and what to do. Joseph provides the kind of intelligence that infuses personal power that no one can take away from you.

In *Let's Go to the Movies*, I will review the

documentary *Horse Boy*. The partial healing of a young autistic boy by a Mongolian healer who manipulates his electromagnetic field has intriguing insights into how our “minds” work. This is insight that can help you free your mind as well.

The people in our governance structure that are delivering autism to our children and inequality to our economy are the very same that are delivering mind control to us through our smart phones and media. Their knowledge of physics and the deepest nature of our intelligence is profound. However, we can gain the same knowledge and, what they can “dumb down,” we can “smarten up.”

"Scientists for Peace, Planetary Consciousness and Ethics"

October 19-21, 2018

International Conference – The venue will be the Hall of Culture in Città della Pieve, a little middle age town between Florence and Rome in the heart of Italy.

Today people need a new science that spreads ethics and involves all aspects of life – from biology to cosmology, from physics to consciousness – so that applied sciences like engineering and medicine will be expressions of harmonious relationships.

This change of the paradigm in science is vital to our future. Humanity needs to develop a new understanding of life in the universe.

Now the joint technological capabilities have reached a point that threatens the end of human history: ethics in science has never been so important.

Three days of full immersion in debates and exchanges, hosted in one of the most beautiful regions of Italy, its “green heart”, Umbria. Scientists, engineers, medical doctors, economists and educators of international renown, recognized for their commitment for common good, have been invited to give the possible answers to the following questions.

FAQ: How Do I Access the Full Archive of Subscriber Content?

Solari Report subscriber content is located on two URLs:

home.solari.com

You can access your subscriber content by logging in at home.solari.com

Everything we have published during the last year (growing to two years) is on this URL.

Each Solari Report has a commentary, containing description, an introductory video excerpt and audio files and transcripts.

You can access all these materials from the Navigation Bar under Solari Report or main sections on the home page: Weekly Interviews, Money & Markets Commentary,

Quarterly and Annual Wrap Ups.

For quick access you can pull up a table of all audios and transcripts by clicking on the graphic of a microphone at the top of the page. That will give you a link to the commentary, audio files and transcripts.

Each Quarterly and Annual Wrap Up comes with a web presentation which is completed first, transcripts for individual parts and then a full graphic PDF treatment, flip book and hard copy which are published after we have produced the individual sections in audio form with web presentation and transcripts. Subscribers who sign up for the digital + print subscription automatically receive the hard copy. Subscribers who are signed up for digital can purchase hard copies at the Solari Store.

If you are new subscriber, you will want to check out Core Concepts (See right hand lower corner on the home page). This will help you access some of the ideas and terms we use at the Solari Report.

Highlights from Last Week - We Are All Targeted Individuals Now with Dr. Katherine Horton

August 1 was Swiss National Day. I celebrated by having a long lunch in my favorite cafe in Zurich with Dr. Katherine Horton – someone I have wanted to meet for quite a while. Then we took a cruise around Lake Zurich, followed by dinner with a colleague. High on our list of topics for the fascinating all-day discussion was how to integrate our knowledge for this presentation for you.

Dr Horton is a particle physicist and systems analyst with a master's degree in physics and a doctorate in particle physics from the University of Oxford.

Dr. Horton worked as a high energy physicist on the particle collider at the German Electron-synchrotron DESY in Hamburg, Germany, and on the Large Hadron Collider at CERN in Geneva Switzerland. She taught nuclear physics and particle physics at Hertford College, University of Oxford, conducted admissions interviews for

undergraduate physics at St Hilda's College, Oxford, and was a research fellow at St John's College, Oxford, a position that allowed her to expand her research into medical physics and the physics of complex human systems.

In 2011, during her research fellowship at St John's College, Oxford, Dr. Horton became the overt target of the intelligence services. What began as overt surveillance became intrusive harassment that morphed into unmistakable crime through related networks.

As a result of her experience as "a targeted individual" or "TI," Dr. Horton began to organize with other TIs to build a more scientific understanding of the phenomenon, to put a stop to these activities and to warn a wider audience of the covert technologies and networks that significantly threaten the entire population of the world.

You can learn more about and support her work at her website [STOP 007](#) and from her new video-streaming show [Global Crime Fighters](#), which is available in both English and German.

I have dealt with some of these technologies and networks, particularly during the Hamilton Securities litigation with the U.S. Department of Justice from 1996-2006. This litigation happened shortly after the Department had entered into a Memorandum of Understanding with the Department of Defense regarding experimentation and testing of "non-lethal weapons" for domestic application.

Based on my personal experience and research, particularly on how digital surveillance and technology is used to exploit individuals financially, I believe there are 325 million TIs in America divided into two groups – those who know we are targeted and those who do not.

The phenomenon is not limited to America. It is intertwined with organized crime, mercenaries and intelligence services throughout the NATO area and the rest of the world. It goes to the very heart of whether the people who run our society are subject to the law or not. Targeting forces represent the shock troops that allow those in charge to get away with secrecy and crimes ranging from financial *coup d'etat* to murder. The targeting phenomenon goes to the heart of the tactics that have allowed central management and control of financial markets and geopolitics.

Dr. Horton is going to join me for our next interview to discuss the TI phenomenon. Topics on our list to cover include gang-stalking, directed energy weapon attacks, non-consensual implanting, neurotechnology, asset-stripping, intel crime, secret societies, and genocide. We will discuss we can do to avoid and manage targeting and how concerned citizens can build resilient systems to support the rule of law.
