To Solari Readers

“Tokyo is currently the world’s largest city with 37 million people, followed by Delhi with 29 million, Shanghai with 26 million, and Mexico City and São Paulo, each with around 22 million inhabitants….Around 55% of the world population lives in urban areas today, increasing to 68% by...
By Catherine Austin Fitts

This week is big – the launch of our *3rd Quarter 2018 Wrap Up* with Part I of *News, Trends & Stories*. This weekend I will drive into the heartland to join Dr. Joseph P. Farrell for our quarterly discussion of what's new in the 3rd Quarter, what's happening that is important and the implications for navigating the road ahead.

This discussion is wide-ranging. Make sure to check out the *News Trends & Stories* section of our *3rd Quarter 2018 Wrap Up Web Presentation* which will go live on Thursday evening [here](#).

*News, Trends & Stories, Part I* covers our first two categories – *Economy & Financial Markets & Geopolitics*. Here are our top 10 stories for Part I:

- Story #1: AI Superpowers: China vs. USA, vs. the Rest of the Planet in AI and Tech
- Story #2: Growth of U.S. Dollar Alternatives
- Story #3 Rising Interest Rates & US Debt Acceleration
- Story #4: Emerging Markets US Dollar Bear Trap
- Story #5 US: Calling Capital Home
- Story #6: Federal Accounting Standards Board (FASB) Announcement Shifts the US Budget into Never Never Land
- Story #7: Bye Bye Bretton Woods; Rise of the Land Empire
- Story #8: Global Thermal & Weather Warfare
- Story #9: The War for the Internet
- Story #10: Anglo American Powershifts

---

*Book Review: Al Superpowers: China, Silicon Valley & the New World Order by Kai-Fu Lee*

*The Corbett Report – On Target*

*Donation Opportunity: Bibles for Inmates*

*Catherine Austin Fitts – Dollar Dominant & Dangerous*

*An Intelligent Conversation about the Environment*

*The Cosmic Implications of Mind Control with Dr. Joseph Farrell*
Part II, published the following week, will cover our top stories in *Culture, Science & Technology, Space, Food & Health, Unanswered Questions, Inspiration* and *Go Local/Take Action.*

In *Let’s Go to the Movies,* I will review *The Spider’s Web: Britain’s Second Empire* Michael Oswald and John Christensen’s riveting new documentary on Britain’s global offshore network – a critical source of financial power and secrecy for the Anglo-American alliance. Dr. Farrell and I will discuss the role of Brexit in protecting the privacy and market share of Anglo-American offshore wealth. I will also touch on the growth of an estimated $50 trillion of offshore assets as it may relate to the growth of $21 trillion undocumentable adjustments in US government accounts, and more in US and G-7 bailouts and in central bank quantitative easing.

**Food For the Soul: Fondation Louis Vuitton**
“I think people care. If not, why so many people spend money going on vacations to see architecture? They go to see the Parthenon, to Chartres, the Sydney Opera House. They go to Bilbao… Something compels them, and yet we live surrounded by everything but great architecture.” Frank Gehry

By Your Culture Scout

There is a nice side effect of wealth creation – some money spent on designer handbags could end up as a new museum. This is the case of a great museum opened in 2014 in Paris – Fondation Louis Vuitton. As the name implies, the luxury goods giant LVMH decided that some of the profit should be spent on art and giving back to the community, and one of the most spectacular modern art destinations was born. Los Angeles architect Frank Gehry was chosen to create a building that, at least for now, contributes to modern art perhaps even more than the actual collection housed within.

Modern art is difficult to store and display – works are often monumental in size, some installations require audiovisual support, many are already created with institutions in mind because they cannot really be displayed in people’s homes. Therefore, any modern art museum that provides huge, well-lit spaces and spectacular outdoor spaces would be at advantage to showcase contemporary
artworks and Fondation Louis Vuitton is an outstanding example.

"Scientists for Peace, Planetary Consciousness and Ethics"

October 19-21, 2018

International Conference – The venue will be the Hall of Culture in Città della Pieve, a little middle age town between Florence and Rome in the heart of Italy.

Today people need a new science that spreads ethics and involves all aspects of life – from biology to cosmology, from physics to consciousness – so that applied sciences like engineering and medicine will be expressions of harmonious relationships.

This change of the paradigm in science is vital to our future. Humanity needs to develop a new understanding of life in the universe.

Now the joint technological capabilities have reached a point that threatens the end of human history: ethics in science has never been so important.

Three days of full immersion in debates and exchanges, hosted in one of the most beautiful regions of Italy, its “green heart”, Umbria. Scientists, engineers, medical doctors, economists and educators of international renown, recognized for their commitment for common good, have been invited to give the possible answers to the following questions.

Highlights from Last Week - The Solari Wellness Series:
The Gut Microbiome - Why We Should Care with Dr. Tom O'Bryan

It seems like there is no better topic to launch the Solari Report Wellness Series than the gut microbiome. Hippocrates (460 – 370 BC), a physician in Ancient Greece often considered to be the father of modern medicine, said “All Disease Begin In the Gut”. Although we know that this statement is not entirely accurate, it contains incredible wisdom and foresight considering the complexity of this organ. We are just starting to scratch the surface in our understanding of the gut, its ecosystem—the gut microbiome—and its role in maintaining physical but also mental and emotional health.

TheGoodGut tells us that:

“The human microbiome is a remarkable ecosystem of largely ‘good’ bacteria and microbes that live on and in the human body. These microorganisms are believed to influence everything from our weight, our immune health, our susceptibility to disease and even our mood.

Our bodies are home to between 40 and 100 trillion microbes according to current estimates—weighing as much as 2 kg (4lb). Most live in our intestine and make up what is known as our gut microbiome.”

It is particularly important to be aware and knowledgeable about the health of our microbiome because of the dramatic increase in people affected by so-called chronic diseases, which are now believed to be caused by chronic inflammation. Where does inflammation come from? It is the response of our immune system to foreign invaders—an extremely complex topic that is still not fully understood. There is however enough evidence today linking inflammation to gut health.

In our interview, I talk to Dr. Tom O’Bryan, a pioneer in gluten sensitivity and gut health, and a passionate health advocate. Dr. Tom is on a mission to educate patients and practitioners so people can “get out of the pond” of chronic disease and get their health back. He wrote two books: The Autoimmune Fix and You Can Fix Your Brain, where he provides practical information on how to do just that.
