PUBLIC: Special Solari Report: Join Us in Supporting Alan Phillips & Your Health Freedoms!

“A leader is one who knows the way, goes the way, and shows the way.” ~ John C. Maxwell ~

By Catherine Austin Fitts

Alan Phillips has joined me on the Solari Report several times. He is the leading attorney in the United States specializing in advising his clients on vaccine law, including vaccine exemptions. He is the author of *The Authoritative Guide to Vaccine*

Legal Exemptions which you can find at his website [Vaccine Rights](#) and hosts a radio show on vaccine rights and related topics.

Solari and I have both contributed to Alan's Go Fund Me account and I have signed his petition in support of his efforts to defend his practice and protect his clients from compromise of their privacy. We have made this Solari Report public so that you can learn more about it by listening to Alan. You can also read his description online and link to his petition and campaign [here](#).

Please join me in support of Alan Phillips – a man who is giving his all to protect our health freedoms. Please lift him up in your prayers, donate as you can – every little bit counts – and please pass on this interview to friends and family who want their health freedoms defended and protected.

Thank you for your support. It means the world to Alan and me!

"Scientists for Peace, Planetary Consciousness and Ethics"

October 19-21, 2018

International Conference – The venue will be the Hall of Culture in Città della Pieve, a little middle age town between Florence and Rome in the heart of Italy.

Today people need a new science that spreads ethics and involves all aspects of life – from biology to cosmology, from physics to consciousness – so that applied sciences like engineering and medicine will be expressions of harmonious relationships.

This change of the paradigm in science is vital to our future. Humanity needs to develop a new understanding of life in the universe.

Now the joint technological capabilities have reached a point that threatens the end of human history: ethics in science has never been so important.

Three days of full immersion in debates and exchanges, hosted in one of the most beautiful regions of Italy, its “green heart”, Umbria. Scientists, engineers, medical doctors, economists and educators of international renown, recognized for their commitment for common good, have been invited to give the possible answers to the following questions.
