Solari Report Update

Learning to Walkabout with Harry Blazer - October 18th

To Solari Readers

“If you’re coming to help me, you are wasting your time. But if you have come because your liberation is bound up with mine, then let us work together....” ~ Australian aboriginal woman

For many months, Harry Blazer and I have been

engaged in an intense discussion about the impact of artificial intelligence (AI) when combined with increased privatization and corporate concentration promoted by a rapidly richer US oligarchy.

In the first two parts of the *3rd Quarter 2018 Wrap Up*, Dr. Joseph Farrell and I discussed these changes in our *News Trends & Stories, Part I and II*. I wanted to pause the *Wrap Up* roll out for a week to explore “How?” – how do you and I adapt to a world of change and uncertainty on such an unprecedented scale? How do you and I live a free and inspired life and contribute to a human future in the midst of it all?

Harry came to Hickory Valley last week to record our thoughts. After a day of conversation, we decided to focus on what we should do. How do you move through multiple tsunami’s of change on a scale unlike any in human history? One of my comments is that we need to learn from the Australian aborigines – let’s learn to “walkabout.”

Harry and I draw on extensive materials in the Solari Report website and library. We will publish the links for subscribers with the audio on Thursday.

In *Money & Markets* this week I will discuss the latest in financial markets and geopolitical news. You can post your questions or recommended stories at the *Money & Markets Commentary* [here](#).

In *Let's Go to the Movies*, I will review *The Mists of Avalon* which explores the legend of King Arthur and the evolution from pagan religions to Christianity in Britain under Saxon rule. I will touch on Jon Rappaport’s “Voyage of Merlin” and why the Arthur legends and Jon’s work on imagination and creativity

Just A Taste

Special Solari Report: The Minds of Men with Aaron & Melissa Dykes

“Article 5 of the Universal Declaration of Human Rights states: “No one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment.” This

ban on torture and other ill-treatment has subsequently been incorporated into the extensive network of international and regional human rights treaties. It is contained in Article 7 of the International Covenant on Civil and Political Rights (ICCPR), ratified by 153 countries, including the United States in 1992, and in the Convention against Torture or Other Cruel, Inhuman or Degrading Treatment or Punishment (the Convention against Torture), ratified by 136 countries, including the United States in 1994. It is also codified in the European Convention for the Protection of Human Rights and Fundamental Freedoms, the African Charter on Human and Peoples' Rights, and the American Convention on Human Rights.”~ Human Rights Watch on the international illegality of torture

“Doctors from Boston are trying to get my brain.”~ MK Ultra Victim tortured for decades by CIA funded mind control project

By Catherine Austin Fitts

As digital technology grows more powerful, the application of individual mind control delivered cheaply through media, telecommunications and distributed means has become the most profitable form of control. Control my mind and you can control where I live, what I buy, how I spend my time, what investments I make, even whom I love and marry.

This is a corporate wonderland in which companies that entice their customers with subliminal mind control – creating addictions to sugar, to gambling, to drugs, to shopping, to pornography, to video games – win the largest market share. Those who do not are left in the financial dust by the economics of mind controlled monopolies.

Criminal hypnosis and other forms of mind control have been with us since the middle ages. However, mind control delivered on scale opens up whole new possibilities. This includes manipulating human electromagnetic fields so we create the future that a small elite desires. We resonate with machines rather than with each other and all living intelligence.

Many of us know that something is terribly wrong. I often hear people say, “You know, America has lost its mind.” However, without understanding the history of mind control and related scientific and technology research, most of us can not appreciate that this is literally true.

Aaron and Melissa Dykes of [Truthstream Media](#) are doing something about it – and in the process helping us get our minds back. Truthstream has produced a series of videos over the last few years that provide significant briefings on the history, science and technology of mind control.

Now Truthstream has published their blockbuster documentary – *The Minds of Men*. This is “a 3+ year investigation into the experimentation, art, and practice of social engineering and mind control during the Cold War — a mind-bending journey into the past that gives startling insight into the world we are living in today.”

Melissa and Aaron join me on the Solari Report to discuss the film and their vision of how we make sure our minds are our own.

PUBLIC: Special Solari Report: Join Us in Supporting Alan Phillips & Your Health Freedoms!

“A leader is one who knows the way, goes the way, and shows the way.” ~ John C. Maxwell ~

By Catherine Austin Fitts

Alan Phillips has joined me on the Solari Report several times. He is the leading attorney in the United States specializing in advising his clients on vaccine law, including vaccine exemptions. He is the author of *The Authoritative Guide to Vaccine Legal Exemptions* which you can find at his website [Vaccine Rights](#) and hosts a radio

show on vaccine rights and related topics.

Solari and I have both contributed to Alan's Go Fund Me account and I have signed his petition in support of his efforts to defend his practice and protect his clients from compromise of their privacy. We have made this Solari Report public so that you can learn more about it by listening to Alan. You can also read his description online and link to his petition and campaign [here](#).

Please join me in support of Alan Phillips – a man who is giving his all to protect our health freedoms. Please lift him up in your prayers, donate as you can – every little bit counts – and please pass on this interview to friends and family who want their health freedoms defended and protected.

Thank you for your support. It means the world to Alan and me!

"Scientists for Peace, Planetary Consciousness and Ethics"

October 19-21, 2018

International Conference – The venue will be the Hall of Culture in Città della Pieve, a little middle age town between Florence and Rome in the heart of Italy.

Today people need a new science that spreads ethics and involves all aspects of life – from biology to cosmology, from physics to consciousness – so that applied sciences like engineering and medicine will be expressions of harmonious relationships.

This change of the paradigm in science is vital to our future. Humanity needs to develop a new understanding of life in the universe.

Now the joint technological capabilities have reached a point that threatens the end of human history: ethics in science has never been so important.

Three days of full immersion in debates and exchanges, hosted in one of the most beautiful regions of Italy, its “green heart”, Umbria. Scientists, engineers, medical doctors, economists and educators of international renown, recognized for their commitment for common good, have been invited to give the possible answers to the following questions.
