Cash and Precious Metals

Question:

Catherine, Since my husband died, I have Social Security (3K/mo) and about \$130K in the Credit Union & no debt. I recently read that customer deposits will be the next source of bail outs for banks and that my money is NOT mine, but belongs to the financial institution (CU). With so little – what is the safest place to keep my money? I already have a little in “metals.”

Thanks! J

Covid-19

Question:

Greetings Catherine-

My husband and I are huge fans of yours and recently became paid subscribers of your Solari Report. Three years ago, I began compiling vaccine "safety" information in an effort to effectively defend my husband's and my decision to maintain our five-year-old son's unvaccinated status. Since the completion of said information harvesting, I've become an activist against the pharmacological weapon and have subsequently created a comprehensive PowerPoint presentation exposing the fraud and corruption surrounding the vile vials.

Additionally, upon the emergence of the grand global psyop known as "COVID" (the FDA-admitted, non-isolated magical pathogen), I began heavily researching the available facts surrounding this cleverly devised global case-demic. In a similar fashion, I proceeded to share the recently-created PowerPoint with all who espouse the capacities to digest the rather uncomfortable data. Though the information in both pieces will be largely review, I would like to offer them to you. I've attached not only the two

presentations but also a script I composed, which substantiates each slide's importance in my vaccine PowerPoint, as when I would present in-person, I'd elaborate heavily on each topic.

My only concern (outside of the obvious) is that the growing resistance movement has been already factored into the equation of control, and as a result of the expanded pushback, a false flag cyberattack will be used as the final nail in the proverbial coffin. The notion of a cyberattack could be isolated to the monetary system, pensions and social security specifically. Thus, those who previously resisted government overreach would become immediate dependents and active participants in an even more draconian world, one consisting of a global transaction system in which food and energy stipends would be allotted to those who appropriately comply. Obviously an energy-intensive controlled global society such as this would ultimately fail due to the laws of physics, but the carnage that will be witnessed between early attempt and failure will be ghastly.

Additionally, a major goal of the syndicate is depopulation, both covert and overt. In my opinion, the vaccine serves as an covert means of reducing human resources. Not only will it likely lead to permanent infertility, but it will also serve another vital purpose in the area of reproduction. With an increasing number of women experiencing infertility issues such as non-specific ovarian syndrome, a Hegelian-Dialectic-style solution is IVF. However, if the vaccine is designed with spiked protein-attacking capabilities as some suggest, the result will be the inability to develop the vital placenta, thus women may be stripped of the ability to develop their own children. The solution? Sci-fi tube babies designed and selected by the establishment for their purposes and benefits.

Thank you for your repeated efforts to expose the nefarious efforts of Mr. Global and his cabal. It does not go unnoticed, particularly in our circle. The effects of a successful transition to a technocratic tyranny will be unfathomable, and as a result, I will continue to fight this indefinitely and without fear of consequence.

Question:

Hello Catherine,

I host a popular podcast in the alternative health space and speak often on “controversial topics”. I recently watched some of your videos and feel like you have a firm grasp on the bigger picture. Another person who gets this is Alison McDowell. I have her scheduled for a podcast episode but thought it would be great to have both of you on together to bat things around and go deeper

I think it would be an incredible conversation (with no time constraints or censorship). If you are interested, please let me know.

Hope to hear from you. Sincerely

B

Ps. here is a link to the back catalogue:

Question:

I haven't reviewed case law on vaccines but I have seen the sections of USC where they are regulated as biologics. Biologics are not medicine but something more like gene therapies. So here I also point to the legal structure that identifies vaccines as a religious procedure. The ethics of gene therapy

refer to 'playing god' and the WW2 ethics tribunals referred to them as same. It seems quite evident that vaccines are being promoted via mythology of the past and that they are deemed as the 'one and only savior' in a monotheistic fashion. So a religious exemption, in my opinion, is correctly to be used as a freedom 'from' religion. Quarantine means 40 days so it's based loosely on the Noah's ark story where the lord culls the human race to save the planet; which also maps in to the climate change mythos. There are many more parallels but I think the case is not as much of a stretch as it may seem on the surface. Prometheus is based on the same astronomical anthropology; namely Neptune's transits through Pisces and/or virgo, where the word viri originates. The vedic story of pisces is unmistakably parallel to noa's ark. I could go on and on about the mythos at play here.

Question: (Ron)

From a friend. She trying to figure it out like all the rest of us and sharing.

I read this thing twenty times and have no comment. I simply don't know what to think or say.

A report from Serbia:

WARNING – VACCINE The Russians managed to extract nanochips from Pfizer's vaccine and announced the scheme and functions! I will briefly walk you through all of this. The chip consists of only 4 processors and 4 transistors. The signal via the 5G network enters the INPUT on the left. They control you. Power is supplied by the heat of your body and all parts are connected to that voltage. The signal is processed in the first processor by a frequency filter and transistors that amplify it. The amplified signal goes further to another processor controlled by MT-2 GAIN or what will be the level of impact on your psyche. This control is variable and can be increased or decreased as desired. The original record says that this part has, I quote, an "unholy amount of profit", which is very, very bad. They control the current they release to activate the virus in the vaccine with silicon diodes, after which everything goes through a second phase of signal amplification and filtering of external influences – thus preventing doctors from detecting the chip with scanners, literally hiding it. The TL072 is a very expensive processor and is especially used for military purposes, you can't get it just

like that on Chipoteca or something like that. The BASS and TREBLE controls adjust the instructions you can hear in your head, each man is different and depending on whether you are a woman or a man, you may need to adjust the frequency. This is also served by the 5G FREK control, which moves the grabbed middle control for a stronger “shock” voltage, in case your immune system is extremely strong. The VOLUME control serves the overall power of the chip, which is sometimes sensitive to your personal and personal vibration frequencies, depending on whether you are in a phase of happiness or generosity or sadness. OUT flushes detoxifying toxins into your body as a byproduct of chip functioning. You will notice that the diagram also includes the FOOTSWITCH control, which serves to enable the secret transport of the chip to different parts of the body by recognizing acupressure points on the foot by turning it on and off during your daily routine. They thought about everything, but did not count on good people around the world!

Question: (Rich)

In reply to [R](#).

At first glance, does not seem credible. But interesting that someone went to the trouble of creating this narrative, smoke, fire, etc. If there are nanochips that can survive the human body’s systems for eliminating foreign intruders, they are unlikely to use decades-only part numbers from audio electronics chips which cost about a dollar.

In computer systems, bugs can leave a door open for a hostile software/virus. So one could ask if a hostile external entity could piggyback on a vaccine, rather than every vaccine being hostile to every recipient.

<https://berthub.eu/articles/posts/reverse-engineering-source-code-of-the-biontech-pfizer-vaccine/>

“Our body runs a powerful antivirus system (“the original one”). For this reason, cells are extremely unenthusiastic about foreign RNA and try very hard to destroy it before it does anything. This is somewhat of a problem for our vaccine – it needs to sneak past our immune system. Over many years of

experimentation, it was found that if the U in RNA is replaced by a slightly modified molecule, our immune system loses interest. For real. So in the BioNTech/Pfizer vaccine, every U has been replaced by 1-methyl-3'-pseudouridylyl, denoted by Ψ. The really clever bit is that although this replacement Ψ placates (calms) our immune system, it is accepted as a normal U by relevant parts of the cell. In computer security we also know this trick – it sometimes is possible to transmit a slightly corrupted version of a message that confuses firewalls and security solutions, but that is still accepted by the backend servers – which can then get hacked.”

*Many people have asked, could viruses also use the Ψ technique to beat our immune systems? In short, this is extremely unlikely. **Life simply does not have the machinery** to build 1-methyl-3'-pseudouridylyl nucleotides. Viruses rely on the machinery of life to reproduce themselves, and this facility is simply not there.”*

But what about a hostile virus of “non-life” origin?

CAF Notes & Links:

Question: (Jim)

I was trading E-mails with a friend of mine living in England, and he told me that they are now in a “Tier 4 Lockdown” situation over there, which means that they can’t leave their home for any reason unless the reason is one that’s been pre-approved on a government list. Then he said that a woman was watching television, she saw a report telling her that her local hospital was greatly stressed due to having too many COVID cases, so she went to the hospital, saw that the place was pretty much empty, recorded this on video, and then posted the video on YouTube.

Then the police came to her home in the middle of the night, took her away in her nightgown and arrested her for violating the ordinance, and then YouTube pulled her video.

J

CAF Notes & Links:

Question: (C)

Catherine, I posted earlier about the Covid 19 vaccine and how it is not FDA approved, only “authorized”. There is no FDA approved Covid vaccine which is stated in the fact sheet I sent. It is an experimental drug/biologic and we are the research participants. As I also mentioned, I received an email from Medicare clearly stating that the Moderna and Pfizer vaccines are FDA approved and would be available soon. Then I started getting angry. Many older people will receive that same letter and will believe it, of course. Thought I would let you know that I sent the documentation of all of this via email to CHD. Response from them was quick. They absolutely agreed and are sending my notes to the attorney and it may be a cause for action. My plan right now is to continue donating to CHD. Kudos to CHD team members.

Question:

L

[December 29, 2020 at 8:09 am Edit](#)

Children's Health Defense published an article by Vandana Shiva on Sept. 29, 2020. It includes these paragraphs:

“On March 26, at a peak of the coronavirus pandemic and in the midst of the lockdown, Microsoft was granted a patent by the World Intellectual Property Organization (WIPO). Patent WO 060606 declares that “Human Body Activity associated with a task provided to a user may be used in a mining process of a cryptocurrency system....”

The “body activity” that Microsoft wants to mine includes radiation emitted from the human body, brain activities, body fluid flow, blood flow, organ activity, body movement such as eye movement, facial movement and muscle movement, as well as any other activities that can be sensed and represented by images, waves, signals, texts, numbers, degrees or any other information or data.

The patent is an intellectual property claim over our bodies and minds.”

On a related note, knowing GMO foods are also patented, and all corona vaccines change your mRNA, it would seem that there is a legal case to be made that in taking the vaccine, you become the legal property of whomever holds the patent?

Christians, pay no attention to the patent number....

CAF Notes & Links:

Question: (John)

In reply to [L](#).

I think you are on the right track, Lori. Remarkable how such beastly numbers come up for nefarious registrations. You are probably familiar with how your rather more mundane identity, your name, for example, if rendered in all caps, with certain punctuation included or omitted, etc., may also be claimed by others with similar intentions. Now, this doesn't necessarily give them an enforceable claim, but you could be jammed up at your own expense to reclaim your natural title or entitlement.

S says: (Reply to Michael)

[December 16, 2020 at 9:44 am Edit](#)

My brother had Bell's Palsy. I am familiar with how difficult it can be. Please encourage him to read the Hormones Matter blog

(<https://www.hormonesmatter.com/?s=palsy>) about thiamine and search

Bell's Palsy on the site. Also listen to Dr. Levy's interview here on Catherine's site and consider using Dr. Levy's recommendation of five packets daily for a week of Lypo-Spheric Vitamin C from LivOn Labs. It is the gold standard. I have used it for years and have cured all kinds of "incurable" things. Like acute mono—in one day. Yes, really. I have also read about B12 for Bell's Palsy; LivOn Labs has an excellent liposomal version of that as well. He has nothing to lose, as the doctors likely have nothing to offer him. One box of the Lypo-Spheric Vitamin C on Amazon is under \$35. A box is 30 packets, six days' worth of doses. A single box will tell him whether this will work. Safe, cheap. Truly—for a long time there have been

simple fixes to many big health issues. I hope he will at least give it a try.

Question:

Catherine and especially any medical people,

I have been an avid follower of Dr. Levy for many years. I came across a possible Vitamin C/ COVID-19 connection and wanted to share something that I think might be related. I will keep this as short as possible.

In 1981, Archie Kalokerinos wrote the book, “Every Second Child,” about his experience with scurvy in Aboriginal children in New South Wales. I had occasion to re-read that book recently, and the parallels between these children and COVID-19 were striking.

There was an epidemic of children there who would suddenly stop breathing, for no apparent reason, and then die. It was chalked up to SIDS. Kalokerinos concluded that the affected infants were suffering from acute scurvy. He cured the children with injections of vitamin C. After he began the vitamin C injections, the infant death rate in his town dropped to zero.

The cause of the acute scurvy is what interested me, and I wonder if it might relate to health issues with Covid-19. Kalokerinos speculated that the cause was an endotoxin in their guts. The children already had nearly non-existent vitamin C levels for a variety of reasons, and when the endotoxin escaped into their systems, it caused the acute scurvy. The endotoxin would then attack the respiratory center of the brain, causing hypoxia and sudden death.

The symptom profile he describes with the endotoxin is, I think, strikingly similar to that of COVID-19.

- As we see in COVID-19, the infants would suddenly stop breathing. BUT—it wasn't because the endotoxin affected the lungs, but because it affected the respiratory center in the brain.
- We also see extreme blood coagulation in COVID-19, something Kalokerinos found in the infants who died.
- Kalokerinos talks about often seeing cerebral edema, also seen in COVID-19.
- I have read about various kinds hemorrhaging and bruising in articles about COVID-19. Kalokerinos found this in his patients; there were several instances where a parent was accused of child abuse because of the bruising.

- Dr. Kalokerinos wrote in his book that these deaths were originally attributed to an acute viral infection, which turned out to be inaccurate.
- Autopsies of the infants done by Kalokerinos showed changes in the liver of each infant. He says “yellow patches, several inches in diameter, were visible on the surface and extending into the depth.” Liver damage is also seen in a high percentage of COVID-19 patients, and doctors are not sure what causes it. The images that come up when I search images for “liver/COVID-19” show yellow patches like Kalokerinos describes.

The big take-home here is that Kalokerinos cured this syndrome in the infants with injections of vitamin C, which neutralized the endotoxin that had gotten into the system. The injections stopped the symptoms almost immediately. The breathing difficulties stopped almost immediately.

Here is a transcript of a portion of an interview done with Dr. Kalokerinos in 2004. He had been curing the Aboriginal children with vitamin C for some time, but wasn't quite sure why it worked. He says this is the moment he figured out how all the pieces of the puzzle fit together.

“(My friend) had developed a hypothesis, this theory, that these toxins (in the gut) were responsible for the sudden infant death syndrome. Now, suddenly, when he told me that, I understood for the first time why the injections of vitamin C were so dramatic in their effects. The causes of the pathology with the children; the sudden shock, the sudden unconsciousness, the sudden death, the basic cause was endotoxin produced in the body mainly in the gut, from organisms in the gut. And when it gets loose, all hell gets loose with it.

And one of a series of different things can happen. The endotoxin, if the liver can't handle it, if it's absorbed from the gut, gets loose in the bloodstream. It's taken to the brain, where it has very specific effects. And one effect is to destroy the respiratory center in the brain. So they stop breathing.

At the same time, it affects the way the blood coagulates. So if you look carefully and study the pathologies in the sudden infant death cases you will find coagulation disorders of a marked degree. You will find little hemorrhages here and there. The whole thing fits together perfectly. So when I gave the injections of vitamin C, the blood level is such that it instantly, almost instantly, detoxifies endotoxin. It's as simple as that. Nothing more complicated about it. And that is why so many of these infants who die from the sudden infant death syndrome have had colds, infections, sore ears, it's an

endotoxin, and they're just found dead in their cribs.

Sometimes, however, the endotoxin doesn't work quite so quickly on the respiratory center of the brain, but it affects the brain, it seeps through into the brain tissue, very rapidly destroys the brain tissue, you get rapid swelling of the brain, water comes in from the circulation because the circulation is disturbed and the brain swells (they call it cerebral edema) when that happens, they just stop breathing again.

The endotoxin has a specific effect on bleeding and coagulation factors. And you get hemorrhages. You might get them in the eyes, might get them in the brain, the membrane surrounding the brain, or you get bruises and hemorrhages in other parts of the body. And they die. If things are a little bit slower, the endotoxin chews up vitamin C like nobody's business. So although they're getting vitamin C by mouth it's not enough, so they develop a secondary deficiency of vitamin C. So they get a type of scurvy bone changes. And these scurvy bone changes, unless one is aware of their presence, can easily be mistaken, and are easily mistaken, for trauma induced fractures. These changes are found in the growing portions; in the areas of bone that are most rapidly growing. And these areas happen to be the front of the ribs, the back of the ribs, under that thin layer of tissue that covers the bones....”

Something else Kalokerinos talks about at length in his book and in interviews is that the children who died, whether from the endotoxin or vaccine, always had some other kind of mild sickness, like a cold, before they suddenly stopped breathing. So they were already fighting a sickness, then the extra insult of the endotoxin or vaccine. We see something similar with COVID-19; it is the immune-compromised who get severe symptoms and die.

He goes on, but what he described above is, I think, a pretty darned good description of exactly what happens when someone contracts COVID-19. Again, it isn't affecting the lungs per se, but is damaging the respiratory center in the brain.

Dr. Kalokerinos' book is hard to find, but it is in the public domain and is not very long—easy to print out and read. It is in the Soil and Health Library; if you enter your name and email address, you are able to download their books for free. Go to soilandhealth.org. It is a wonderful resource.

Finally, I am reading other articles that say that the lingering symptoms of COVID some experience are almost identical to beriberi, pointing to depleted thiamine as well as continued vitamin C depletion. Here is a letter from an Australian to the editors of the BMJ Rapid Response board (a kind of medical journal.)

Re: Long COVID: How to define it and how to manage it

Dear Editor,

The symptoms being reported by COVID long-haulers are the same as the known symptoms of thiamine deficiency disease, otherwise known as beriberi. Fighting the virus necessitates consumption of the body's supply of thiamine. Depending on the initial thiamine status, the outcome could be that the person is asymptomatic if they have a good supply and good nutritional status, or they could be mildly thiamine deficient, which could lead to long-hauler symptoms of beriberi, or, in the case of those particularly vulnerable such as the elderly, they could have a severe deficiency with results such as Wernicke's encephalopathy.

Thiamine is also consumed in the metabolism of sugar and other carbohydrates, thus a poor diet (i.e. the typical western diet) has a role to play in the outcome.

From this, I suggest that, rather than being the result of an extraordinarily virulent and pathogenic virus as seems to be widely believed, the pandemic we are witnessing is actually the result of a combination of a somewhat more severe virus than we have hitherto experienced, and a generally poor state of nutrition in the community as a whole.

If this was to be borne out, It suggests that suitable thiamine supplementation and other nutrition related steps could be used as a preventative measure, potentially rendering a large proportion of the population asymptomatic, could be valuable in the treatment of those under care, and could be used to treat long-haulers continuing to suffer the consequences of mild thiamine deficiency.”

That's all I wanted to share. I know this is long, but I am hoping some medical people out there might read this and perhaps pay attention to some of the simple solutions being suggested by very good doctors.

Have a blessed day all!

Question:

D says:

[December 15, 2020 at 7:11 pm Edit](#)

I watch the morning news for weather and traffic. The odd thing isn't that Covid is the main story ... its that (1) Their reporting on Covid is done with a straight face, (2) There is zero critical thinking / reporting (like actual deaths are almost nil; that influenza infections are no longer reported; there has been no testing on the 'vaccine'). Not so oddly, when they are dumb enough to post their propaganda on their Facebook site, 80% of the remarks DO the critical reporting they should be doing.

Now we have to suffer thru the president-elect Biden BS. Interestingly enough, 90% of the Facebook remarks are ultra-negative regarding Biden. And yet ... they keep posting.

Very occasionally, I wished I was Blue Pilled. But AM grateful for what we have gained at Solari. My favorite Thursday evening listen.

Question:

Catherine:

I just discovered you. You are the most intelligent “woke up” people I know. I am a member and searched your site for this information, but cannot seem to find it....what should we do with 401K's/IRA's? I am thinking I should convert to cash for now.

Tricia

CAF Notes & Links:

Question:

I'm just now beginning to connect the dots in all the craziness happening. When I watched your recent video on the 5 pillars explaining the reason behind recent events I was hooked. I finally understood the reason behind the rioting and draconian lockdowns taken by our dictator in charge, Polis, in Colorado. So I became a subscriber.

My husband and I are in our 60's and have saved for retirement. We are sitting in cash and I worry that we will lose everything if a 'reset' happens.

I'm pouring through your website looking for advice on what to do and not do, and if investing in Bitcoin is a good idea.

Help. I'm sure you have addressed these topics somewhere. Where do I find them?

Happy New Year. I'm praying for a better 2021. We are expecting our first grandchildren early spring.

Cheri & George Dobratz

CAF Notes & Links:

Question:

Catherine -

I just saw your video in the last 2 weeks and can't tell you how over joyed I am to have found you and your information.

Your well articulated review of what is going on and the diverse resources has been a joy.

I need help - I see that players, I see the problems - I've realized I need to start and build companies to grow and preserve wealth. I've diversified into crypto on a selective basis and trimmed my bond position.

I need help strategically - how to maneuver in my field - healthcare.

And, whom should I trust in banking? I've got funds with Morgan Stanly and have been approached by JP Morgan Chase.

It's hard to know whom to trust.

Any feedback would be helpful.

CAF Notes & Links:

Question:

Hello Ms Kathrine

My name is Donna Parks I live right outside Portland Or. I am a Christian who is convicted. We have been watching you for many years on Greg Hunters show. We love your gut-wrenching analysis because it rings true. After all these years I have finally purchased a monthly subscription.

I have seven sewing machines, I can sketch, design, dress make, pattern construct, tailoring, leatherwork, embroider etc etc. The world is changing at hyper speed, and it is unclear which direction I should go to make my talent and machines work for me. I have been wracking my brain for months as to which direction I should go. In other words, I want to work smarter instead of harder. I see so many designers crash and burn chasing dead ends. My question is if you had this talent with all these machines, what would you do, which direction would you take??? Most of all I want to make things that people need rather than what they want.

Any and all advice is greatly appreciated, thank you and Happy New Year.

D

CAF Notes & Links:

Question:

Hi Catherine,

I've been following your work for a number of months now since I saw your interview with Tom Cowan. I really appreciate your work and find it very

inspiring, and I felt compelled to reach out to ask you a question.

I am a young 20 year old in Canada and am feeling quite isolated and overwhelmed in all that I have been hearing online with this pandemic and financial reset. I am currently unemployed due to the restrictions. I worked with a local college as a project manager for their web software/design projects, and have also worked as a financial advisor at one of our major banks and as an executive assistant for a national food distributor here in Canada.

My question centres around what someone of my age and experience should do in the face of all that is to come. I feel a bit stuck and stranded at the moment with not a clear direction of which to go. I have enormous drive and heart to face down and fight against what is coming, and wondered if you had any advice as to what someone in my position might be able to do to offer help. Can't help but feel like I'm watching from the sidelines and at the same time unsure of how to offer help to fight back.

Thank you very much for your time and for all that you do,

R

CAF Notes & Links:

Question:

Since we decide what form money takes, shouldn't we begin the process of agreeing what that will be so that we can stay outside of "their" system?

m

CAF Notes & Links:

Question:

Hello Catherine,

I have recently come across your information through Planet Lockdown and

all that I can say is WOW! I have been following the events of recent years (2016-present) closely and am AMAZED at how politics/media/big tech/global reset agenda are aligning (in a terrifying manner).

I am grateful that our three children attend a STEM-based charter school and are very bright and hard working. However, I worry about their future as our current monetary system is shifting. How do I take a deeper dive into your investment recommendations for today and moving forward? Most of our money is tied up in 401k, 529 and IRA plans. I believe taxation is going to become a major problem for all of us in the US going forward (unless DIVINE intervention flips this election).

I have an MBA (I am 52) and my husband has a Phd in EE (he is 62) so I think it is time we concentrate on the future of our family moving forward beyond traditional investments. Our children are 13 (daughter) and 11 (twin boys).

Many thanks and happy holidays!!

Appreciatively,

S

(Tucson, AZ)

CAF Notes & Links:

Question:

Hello Catherine, I hope all is well. I recently subscribed to your channel. My biggest concerns over the last 12 years have been the grand solar minimum and thermodynamic oil collapse. Those two things I expect to happen in the mid 2020's. When I first started dating my wife in 2012 I started telling her my predictions based on my "fear" of these predicaments. She also thought I was insane and was going to dump me lol. I thought they would launch a pandemic in the early 2020's to start locking society down. Except it was a fakedemic because they were able to create the perception of a "virus" by endless propaganda and a misused laboratory machine. Unfortunately, It was sufficient enough to lockdown society. Think of it as a controlled demolition. I could go on and on about this and cyberattacks etc... Finally, here's is my question. I own Union Pacific, Norfolk southern, Honeywell, Lockheed

Martin, and Weyerhaeuser all in registered shareholder accounts. Shares I own in non-registered shareholder accounts are Texas Pacific land trust(I bought them a while ago for the their access to the ogallala water aquifer) and Gladstone land corporation. I have an aerospace mutual fund FSDAX and will be buying very soon FLOWX. I also own a little over 6 acres (debt free) a homestead in progress. I also have been buying physical gold and silver since 2008 I also have an account direct with a sprott fund that's invested in 15% gold and the rest silver/gold miners. This is what I've been investing in since I started learning about these two predicaments. I try to stick with companies that I think will be protected or a direct play on real assets. I'm sure you're aware of primary, secondary, and tertiary wealth. I try to stick to primary and secondary wealth. Thoughts?? please

Best regards,

A

Question:

Hi Catherine,

I have been a subscriber to Solari for several years and it is for me an important link to the reality of what is actually happening in our world. I marvel at your ability to not only see what is going on in the world, but to have real insight into what can be done about it. This is rare in our times.

I'm currently listening to the interview between you and Thomas Meyer on the Grand Conjunction of Dec. 23, 2020 and I'm greatly appreciating the esoteric depth of the discussion.

I'd like to add something to the discussion that is not generally known or discussed in our current mindset, but can offer some important insight into why the world is the way it is. More importantly it offers something real that we can do about it.

Thomas was explaining about the Akashic record and the importance of the shift provided by Rosenkreuz in 1604 of the understanding of the dualistic nature between the physical and spiritual aspects of our life. This is where I'd like to enter the discussion.

We live in a world where almost everything is a creation of the mind/brain. Science now understands well that the brain is divided by the corpus collosum. The theory goes on to explain that the left side of the brain is the logical, masculine side and the right side of the

brain is the emotional, feminine side. We live in a world of polarity and the brain is a tool of that polarity. Therefore everything we create using this instrument is polarized.

This is where the misunderstanding begins.

We don't understand that everything we create in this way will be polarized. So in the world of technology, for instance, every technology will have uses that will be positive (life supporting or negentropic) and negative (life reducing or entropic). This is true in every aspect of life that is created from the brain. This is actually the fulfillment of Einsteins' theory of insanity. We keep finding new ways of creating from the brain, expecting different results, and are surprised when what manifests is not only what we wanted but what we didn't want as well.

Now apply this concept to something as abstract as the concept of PEACE and you can begin to understand why we're in the mess we're in. We've become very adept at honing our creative brain skills so we become better at creating what we want, and to be surprised and demoralized when the opposite happens as well.

If we don't figure this out we become like a cancer to life. So the question becomes... "Is there another way to create? Is everything in life in polarity? Is there any part of us that is not polarized?"

Many ancient texts answer that question. Here is a quote from one - the Chandogya Upanishad, part of the great Hindu text of the Mahabharata.

If someone says to you,
“In the fortified city of the imperishable,
our body, there is a lotus
and in this lotus a tiny space
what does it contain that one
should desire to know it?”

You must reply:
“As vast as this space without
is the tiny space within your heart:
heaven and earth are found in it
fire and air, sun and moon,
lightening and the constellations,
whatever belongs to you here below
and all that doesn't,
all this is gathered in that tiny space
within your heart.”

Chandogya Upanidshad 8.1.2-3

Within each of us is that place in the heart that is not in polarity. We can create from there.

We don't have to separate from science and technology to create from the unified field of the heart. When we create in unity it is only life giving, not taking. Science is discovering more about the unified or quantum field each day. We can assist people to access this part of themselves and to begin creating this way.

I'm writing this on Christmas Day and I'm prompted to stop here. There is no need to respond Catherine, unless you are so guided. I felt that I should share this with you and I'm very open to further discussion if you wish.

Blessings to you for Christmas and thank you again for all that you do.

In the One Spirit,

R

Question:

Dear Solari team, I have a question to ask Catherine!

Dear Catherine, I have just yesterday completed the State of Our Currencies PDF from Sep 2020, and I have moved onto Dillon Read and Co, moving through the chapters.

If only there were a UK version of Catherine Austin Fitts.

I'm so keen on getting UK-specific information.

I'm asking of any people you are aware of that specifically produce valid information on topics of socio-economic developments and the like? Since I'm quite a new member, so also maybe there's some info on the Solari report from before my subscription also?

Kind regards

C

Question:

Hi Catherine,

On the last Ask Catherine, you asked if anyone has any input on computer hardware to use. I wanted to share some of my experiences in this area.

Knowledge is power because once we have more knowledge, we can create new strategies. This is why I have gained so much from being a Solari subscriber. It is no exaggeration to say that without Solari, I would be lost at sea by now.

As a TI, one of the things that I notice is a mkultra-level of mind control that sometimes streams through my devices. Different circumstances give me the opportunity to notice differences in my state of mind.

I experienced some of the more impactful times of the mind control in 2017 when I was using a 2012 MacBook Pro. One time I noticed that I was experiencing a strong trance. I happened to be using the computer. I didn't use wifi in my home, and in addition, the wifi was disabled on my MacBook Pro's software. Instead I used an ethernet connection. However, something seemed to be streaming to me from somewhere. I got a camping blanket – the kind that has metal on one side for insulation – and I put it over me and my

laptop. I noticed that the trance faded. So there seemed to be some sort of signal being sent in the microwave range (like wifi, cell phone, etc) that I was able to block with the metal in the blanket.

In 2018 I switched to a Librem 15, a laptop made by Purism (<https://puri.sm>). The great thing about a Librem is that it has an actual switch on the outside of the laptop that physically disconnects the wifi card so that it can't function. So the wifi is available if you need it, but you can turn it off when you want. Other computers let you turn off the wifi in the software, but a hacker can still activate it. But with the Librem, the wifi card cannot function when the switch is turned off.

The Librem laptops use a distribution of Linux called PureOS which has a lot of applications in common with Ubuntu as they are both based on Debian.

I've had the computer for 3 years. I've noticed that I tend not to experience the strong trance states when I have the wifi switch turned off (I have also noticed heavy duty entrainment coming from my cell phone, which is a simple flip phone and not a smartphone, so I have to take care of that as well). There have been times when I've felt a strong trance and discovered that I had accidentally left the wifi switch in the on position, but then when I turned it off, the trance faded.

The computer developers addressed some of the security issues of turning off the Intel chip's Intel Management engine so the computer was more secure. However, I think my firmware has gotten hacked. The reason I say that is that now, when I boot the computer, I get firmware errors listed on the screen during the boot process, whereas when I first purchased the computer, there were no errors when I booted.

Hacking firmware has been addressed in Purism's latest hardware, the Librem 14 (which hasn't been released yet). Also they have a method so you can know if the operating system has been changed. This looks like a big improvement from my older model.

However, being a TI, I seemed to be getting hacked on a near daily basis

even with my Librem linux operated computer, and it seemed not to be just attributed to hacked firmware or changing the operating system. For example, shortly after I donated some money to the developer of one of my favorite open source software applications, the application unexpectedly quit working correctly. I noticed that a file had been deleted and changes had been made to my preferences in the application's 'ini' files. My thinking is that a virtual instance of my user account was getting created and everything on my computer could be accessed.

The operating system Qubes (<https://www.qubes-os.org>) seems to address this situation by having the ability to sandbox all processes (this is the operating system that Edward Snowden uses). Qubes will only run on some hardware, not all, however, so you'd have to check hardware compatibility. The Librem computers by Purism will run Qubes; however, Purism considers Qubes to be for the technically oriented and not for the lay person and so they don't load Qubes onto their computers. Someday I would like to learn Qubes because I think the latest Purism Librem 14 with Qubes as its operating system might be the ideal way to go.

But since I'm not ready to tackle learning Qubes right now, I came to the conclusion that I need to have a dedicated computer for interacting with the internet because I don't want to risk having my important files and programs destroyed. So I set aside my Librem for doing my non-internet tasks. And I switched back to my 2012 MacBook Pro for accessing the internet. By this time the MacBook Pro had morphed into something rather unusual as I had tried to update the operating system, but the installation had failed. So the operating system was somewhere in Limbo Land, not able to use the old operating system, but not able to use the new one either. So I created a USB drive with Ubuntu on it (Ubuntu is Ubuntu Light), and I run Ubuntu 'live' each time. Every time I run the computer, it starts in a fresh state from the USB drive, and nothing is saved to the hard drive. I continue to use an ethernet connection, and I do not have wifi turned on my home.

But what I noticed is that I started to have the same type of mkultra-level trance that I had experienced in 2017. As soon as I recognized it, I suspected that it might be streaming through my MacBook Pro. One time I turned off

the computer and unplugged it, and the trance faded. Another time when I had the trance experience, I noticed that the computer was turned off, but it was plugged in. When I unplugged it, the trance faded. What this seemed to indicate to me is that the wifi card inside the MacBook Pro was being accessed even when the computer was turned off (as long as it was plugged in). This theory seemed to jive with my prior experience of being able to stop the trance by using the camping blanket. The blanket seemed to be blocking a signal that was being sent to my wifi card.

So my next step was to disconnect the wifi's cable inside the laptop so that the wifi card was no longer fully functioning. Ever since doing that (which was about 3-4 weeks ago), I have not experienced that heavy duty trance state (although I do experience other trance states that seem to emanate from other sources). Anyway, I would say that if you have a wifi card, then it can be accessed and can be used to send entrainment that is specific to you. The only solutions I've found are to disconnect the wifi card by physically disabling it, or by using a hardware switch like the Librem computer has, or by using some shielding (like the metal blanket) to block the signal.

Best, K

Question:

Subscriber wrote this am:

Catherine, you are convinced that Trump will fail if he uses the military to save the country.

Would you please explain in great detail why that would be a bad idea?

I don't see any courts that will act on behalf of the people.

Furthermore, could you detail what steps you estimate would benefit Mr Trump the most.

Thank you from millions of awake people across this planet.

Many blessings to you and your family,

CAF Notes & Links:

If you suspend Constitution....here is the plan. Chances of this happening IMO is 99.99% chance.

Suspend Constitution – Sheriffs lose authority, likely states too as practical matter, being financial dependent

Deep State – which controls the machinery now – proceeds to act free of the Constitution

Feds confiscates all guns and desirable property

Military force vaccinates 100% of the populaton – result includes heavy culling of population over 65 who are expensive to insurance industry, likely increased steralization of female population

Heavier remote control mind controlled population moved to slavery system

Fed owners proceed with picking up assets for pennies on the dollar

All this Trump save the country BS is a ruse to patsify the Q anon and other conservatives into helping make this a reality. Total BS.

If we are lucky it is being done to simply help fund raise for the Republicans.

If the Trump team wanted to stop the election fraud they could have and should have.

And what are you doing to help your local Sheriff or build a local food system instead of losing your time to this?

POSTSCRIPT

The fact that this is not perfectly obvious tells me that the mind control is really working.

Trump does not have sufficient Republican support to pull off the election or to make his case for election fraud. That is a fact. This is a political failure that can not be overcome by turning control of the entire legal system to the Deep State financed by FASAB 56 to do whatever they want. This puts the NY Fed owners entirely in charge.

Question:

Catherine,

Your Ally Finder on finding allies and navigating the cult is brilliant. Thank you! Looks like I'll be looking for another banker and another money manager, which is stressing me out. Any recommendations as to how to go about this? I'm just picturing myself calling different money managers and bankers and saying "have you heard of the red pill by chance?" Hahaha. This

sounds like a dumb question, but I truly could use some advice. Thanks so much.

Question:

In reply to

I second that motion! How can we find more about Thomas Meyer? He mentioned so many interesting things. I am trying to find his website but am having trouble locating it.

CAF Notes & Links:

Question:

Just a thought:

There must be a database somewhere that would detail what toxin causes which Exosome/"virus". 5G as an example of toxicity may have a different Exosome output with every change in frequency. That would be one explain mutations in "viruses" if 5G is the culprit. As they roll it out in different ranges, variations appear.

This example of cell carriers and the range of 5G being employed, will produce as many new and novel viruses. Tmobile people get this virus, ATT people get this one... and so on.

If electricity and its associated fields are the real problems, a Linesman who is also using a Tmobile phone may create a completely new and novel virus associated with a linesman. Blending the toxicity from Powerlines and 5G.

Am I making sense?

5G Spectrum Usage by Carrier

Not all service providers use the same frequency band for 5G. Like we mentioned above, there are advantages and disadvantages to using any part of the 5G spectrum.

T-Mobile: Uses use low-band spectrum (600 MHz) as well as 2.5 GHz spectrum.

Sprint: Claims to have more spectrum than any other carrier in the US, with three spectrum bands: 800 MHz, 1.9 GHz and 2.5 GHz. (Some of this is currently being repurposed for T-Mobile's network since they've merged into one company.)

Verizon: Their 5G Ultra Wideband network uses millimeter waves, specifically 28 GHz and 39 GHz.

AT&T: Uses millimeter wave spectrum for dense areas and mid and low-spectrum for rural and suburban locations.

CAF Notes & Links:

Question: #1

Something that helps me understand why all this is happening is the fact that “civilization ends when bad things do not happen to bad people.” What is missing from all this are REAL consequences for the people causing all these problems for humanity. Not only are real consequences missing, but the sheeple are paying these people to do this to them, every time they sign a 1040 form or their national equivalent. So in spite of all your years of effort, nothing is going to change until people rebel against this very basic form of

slavery. A system where the perpetrators are able to use the money of their victims or stockholders to defend themselves is a situation that cannot be won.

In order to “turn on the lights,” some significant player in this situation needs to be prosecuted and executed. China and Iran (and perhaps Russia) are the only countries that have executed a billionaire. And they are the only unknowns in this situation. A century ago, a corrupt corporation could/would have their corporate charter revoked. Ever heard of this happening in your lifetime? The perpetrators of the global agenda have no compunction about using this method. Ever heard of Paul Wellstone? Everybody in congress has, and thus we went to war with Iraq.

You see, death is the only real consequence for a psychopath. Lip service and exposure are only amusing to them. Once real consequences have been administered, thousands who are profiting from keeping secret this agenda would come forward to save their own skins. But the will to provide these real consequences seems to have been programmed out of the populace. You see, as an old farm boy, I do not see culling the herd as an act of violence. If you have a cow that starts crawling through the fences, if that animal is not dealt with immediately, in a month you will have half the herd crawling fences. Sound like a familiar situation?

You say you were under attack for 8 years. Has a single person who participated in this suffered a single consequence? They even tried to kill you! You think any of those people lie awake at night anguishing over what they did to you? They have all retired wealthy or are still doing this to others. So you think this can be stopped?

When Trump took office, what happened was that the crime family controlling the USA federal political system changed. the organizational dynamics were exactly the same as a mafia power shift to a new family. Normally the new family calls in a few folks, determines who is resisting/resenting the change, and kills them. Then everybody else gets on board and business continues as usual. What happened to the Trump administration is an example of not administering that real consequence. What you are uncovering in all your investigating is proceeding as planned because of the absence of this real consequence by people who believe in the constitution and real justice that does bad things to bad people.

Everybody hopes that some prosecutor, some judge, someone in the justice system is going to provide real consequences. But the justice system is corrupt to the core, because in the complexity of today's culture it only requires the failure/corruption of one of the parties involved, investigator, the arresting party, the prosecutor, the sentencing judge, the appellate court or the incarcerator for there to be no justice.

For the last 20 years, I have been watching the “good guys” proposing solutions to what David Icke revealed 30 years ago. As a hack at the roots kind of guy, I have said again and again, well that's not gonna happen, and it doesn't. Because everybody says the people have to do this or this. What has to happen is for real consequences for the people causing this, so they stop, and that ain't gonna happen until it gets down to people's courts, three people testify against you, they take you out back and club you to death. They used to hang horse thieves without a trial, and the world did not end. I did not wish to see this, but in 10 years of intense research, I can find no evidence that this is now inevitable.

The chance for the USA to not become a sh*hole country passed with Ron Paul. On January 6, every congressman who does not vote to overturn the electoral college is guilty of treason. If the crowd gathered in DC on that day does not provide real consequences to those traitors, the USA will become a slave state that will make the USSR and 1984 look like kindergarten. Even if Trump wins the election.

Sadly, it has come down to the situation for Americans that they will either become a victim of, or a consequence to those perpetrating this genocidal agenda.

I haven't been wrong in 10 years, and I'm not wrong now. No consequences, the agenda proceeds as planned.

B

CAF Notes & Links: #1

In reply to [B](#).

Agree with your fundamental premise. Someone asked me last year if I could have anything I wanted, what would it be, I said 250 licenses to kill – for the reason you mentioned. In January 2020, I said the #1 issue before us is “What

are we going to do about the Beck Brothers?" (referring to the psychos in TV series Yellowstone." That is the issue – will we have law or no law – as in “crime that pays is crime that stays.”

Question: #2

You say that there are people doing inhuman things. Of course they are doing inhuman things, they are psychopaths who simply are not human.

Now if there is a dog, and the dog kills someone, that dog is put down, plain and simple.

What we have going on in the world, is a community that has a killer dog (with Covid there is now one in every country) who periodically gets loose and kills someone. Instead of putting the dog down, we have people who are animal activists, who want the owner to rehabilitate the dog (they won't) some who want to call animal control, some the police, some the city council to pass a new law, some who want to organize the neighborhood, etc. While this debate continues, the dog continues to escape his pen and kills more people. Eventually people are afraid to go outside so the debate continues on the internet.

The solution to this is: some person with integrity gets a gun, goes to the house, forces the owner to take him to the dog pen, and shoots the dog.

The only intelligence needed to be gathered here is where is the dog.

Problem solved, but then all the gutless folks endlessly debating want to bring sh*t down on the poor bastard who resolved the situation and saved innumerable lives. Actually, they are pissed, because without the debate their lives now have little meaning.

If humanity does not very quickly get its (politically correct) head out of its a** and provide real consequences for these inhumans, instead of putting them in control of everything, this will take humanity back to the Stone Age if it survives at all. Because these psychopaths see things like starvation, civil war, world nuclear

war, pandemic, lockdowns, etc as simply entertaining, a new playing field for them to play their game of control. Is that inhuman enough for you? They are killing lots of people these days.

There is massive doublespeak or cognitive dissonance, the modern term, in the world population. If you think, speak or act like the following is not true, you may not survive to die a natural death.

Civilization ends, when bad things do not happen to bad people.

Think about it.

|

CAF Notes & Links: #2

In reply to [B](#).

Disagree The problem is lawlessness. What we need is solutions that return us to a lawful civilization. Longer topic about how to do that. But it also involves taxes, since all the people anyone would know to enforce against are not the real power.

Question:

I am a new subscriber and have been enjoying listening to your talks with T. H. Meyer. In at least one of the talks, you mention learning about spiritual warfare from the African-American churches. Is there a talk where you share more about this? Thank you.

Thank you for sharing a wonderful start for any year, we watched the new 2021 concert in progress last night. The conductor acknowledged the empty hall...very sad, but the music was superb again as one expects from this Philharmonic and the setting is always over the top!

CAF Notes & Links

There really is no orchestra more superb than the Vienna Philharmonic. Amazing.

Question:

Thanks for the great interview on jury nullification. This is a powerful tool in the legal world, and is really the ultimate "wild card" in any jury trial.

I was on a jury in the late '90s, in a small town outside of Atlanta, GA. The case was between two women, who had been in a relationship, but the relationship went bad, and they were suing/counter-suing in a civil action. It was odd that this particular case got to a jury trial, as it seemed like arbitration was a more optimal solution, but there we were.

The evidence that was presented to us was of all the mean and nasty things the two women did to each other as they were breaking up. The judge then charged the jury with the type of law that we were supposed to use to decide the case. The judge said that we were supposed to use landlord-tenant law to

decide the case, and figure out what to give each of the plaintiffs/defendants.

When the jury got to the deliberation room, everyone was excited to discuss the particulars of the case and figure out how to divide assets between the parties. But the real problem in the case was that the two women had lived as if they were married, and now were trying to get a divorce. At the time, there was no legal avenue for marriage between these women, hence no means of legal separation or divorce. I went to law school for one year (thankfully woke up and broke free of that system before it sucked me in), and had some background understanding of how the legal system and juries worked (I was not asked in the voir dire if I had had any legal training, so never offered this information). I waited for everyone in the jury to speak their mind about what they thought we should do, and after everyone had spoken, I told them what I perceived to be the real issue, and that we should rule the case based on these ideas. I had to talk to each person, and their unique confusion, to get everyone to understand what was actually going on. Everyone was so confused by the judge's instructions, that we had to go back out to the courtroom to get him to tell us his legal directions a second time. Back in the deliberation room, everyone was now clear about the real issue. I proposed that we let each side win, and give the other \$1.00, and then remand the division of property to arbitration. When we returned this verdict, everyone in the courtroom was a bit confused, and the judge asked the jurors to stay and explain how we came to the verdict. The foreman and a few other jurors quickly spoke up, and all were very excited to tell the judge how they figured out the solution to this problem (and in their own way, each one did have to figure out the solution through the prism of their own confusion). Getting all of the jurors to take ownership of the decision through the jury nullification process has been the highlight of my non-legal career!

Thank you for all that you do with Solari.com!

In reply to [B](#)

What a great story – result. BRAVO. I have only served on one jury – and it was a very inspiring experience. A group of 12 citizens can be so wise.

Question:

Catherine very exciting, you now have over 1.6 Million views for your video on Planet Lockdown.

[N](#)

CAF Notes & Links

In reply to

Not sure why they are letting it run. Usually when a video goes into a viral spread, the censorship and hiccuping start much earlier I am going to wait and see how this gets handled. Curious for now.

Question:

Thanks A for the link, but I did not have to use it. It must have been divine spark for Solari. Catherine, It is surprising that on 1/3/20 the video is still up. Either the censors are in sleep mode or the truth just can't be stopped now. I have been listening to your message for longer than I have been a Solari subscriber –I think 4 yrs. now. You have helped immensely in guiding my actions, however small. Thank you and God blesses you.

a

CAF Notes & Links

Question: (Ron)

I have been endlessly thinking about my experiences at a local hospital ER, a 6-hour ordeal. If my feeling about this odd masked behavior at this hospital is reflective of many. Allopathic medicine has completely destroyed public trust. Anyone who is still wearing a mask – judgment can not be trusted. At every turn, the excuse was because of vc91. As long as it is an outcome from vc91, it is ok and excusable.

We were in the ER for hours waiting for a bed in the main hospital. I asked why the wait, and was repeatedly told the hospital is packed, full, with no beds available. I asked a janitor who said the hospital is not full and continued working... with his head down and masked. They eventually put my son in the burn-unit with the excuse the rest of the hospital is full. The parking lot was not full. Not one ambulance showed up during my 1.5-hour stay in the ER waiting room. Nobody came into the ER while we were there that I could see.

This was the most saddening experience since this started. Low info paranoid hysteria from the people who are supposed to be cutting edge critical thinkers who heal, care for, and support our well being. They have been weaponized and can not be trusted. Extremely Dangerous!!

[rrd](#)

CAF Notes & Links

Question:(Catharine [her spelling])

In reply to [Catherine Austin Fitts](#).

I know this is very late to comment but, oh well. No, the virus prob can't be manufactured and spread. From what Cowan and others have said, no one has ever isolated/purified a human pathogenic virus. If they can't isolate them, they can't study them to replicate them. And how are they gonna spread them? This sounds like sci fi to me.

c

Question:

ARE WE BARKING UP THE WRONG TREE

READ THIS BRILLIANT BOOK, The Invisible Rainbow by Arthur Firstenberg

Covid-19 seems too obvious to me

I put this on my FB page

Is influenza a electromagnetic disease? Wuhan – 5G rollout – Chemtrails – ionizing our atmosphere – HAARP – more satellites (Elon Musk and Jeff Bezos) – 5G. Covid-19 is the red herring while they quietly implement this. Covid-19 creates lots of confusion people fighting back and forth perfect this is how psyops work. I need to spend more time on this reading a brilliant book will review in the New Year.

Illustration from earlier in the year becoming clearer, see attached.

P

Question:(L)

Happy new year Catherine. I have always admired your work and therefore

have become a member for the last year or so.

One of your interviews a year and a half ago you stated that the deep state had been defeated, what is your take on that now given the recent developments. It appears as though they have complete control of the narrative and this march toward Global medical domination.

1

CAF Notes & Links

Question: (T)

Hey Catherine,

I see you met Prof. Delores Cahill. I would be willing to bet you two really hit it off.

What I really enjoy about you two is when you each laugh you laugh easily and heartily infecting the world (us listeners and viewers) to laugh along with you. At least I do. And of course, I am the world (lol).

I was curious to know if you two spoke about Christopher James and the Common Law Movement here in Canada?

If so and it has peaked your interest a little more – I would suggest you speak to Anna Von Reitz from Alaska. She really knows her shit.

If you want to follow the money from a Common Law and Original Jurisdiction standpoint – she is the go-to person (real grassroots stuff – the starting point of everything I would argue).

Happy New Year and keep laughing. The psychopathic EL-ites and their sociopathic minions need to be mocked and mocked mercilessly.

And if they – these sub-humans – are being “run” by Aliens – then the Aliens need to be mocked too.

Remember Tim Burton’s movie about the Martian Invasion with Jack Nicolson?

That about says it all.

All the best in the new year.

I am really looking forward to it!

Sincerely,

Terry McDonald – Beeton ON Canada.

Question: (R on his son who broke his hip)

R says:

[December 30, 2020 at 6:38 am Edit](#)

1) I am sitting in Lehigh Valley Hospital ER. My son took a spill snowboarding. I am in the ER and not wearing a mask.

At entry I was instructed to take a mask. I simply replied that I am exempt for medical reasons. No resistance. 50+ in the ER waiting room, all masked voluntarily.

As I was walking into the actual ER another requested I wear a mask, I politely refused and noted the exemption. No resistance.

By now I have been here 1.5 hours. .5 next to my son in the ER when a brave nurse comes in and attempts to bully me into wearing a mask.

I carry the Pennsylvania mandate in my back pocket for these occasions. It didn't seem to matter to her. She said they have their own guidelines. I demanded to see them. She didnt return, but another nurse did. The guidelines did not require it.

She persisted and I unloaded and called some other nurses into the room. I asked is this is Hotel Auschwitz? Mandatory masks today, vaccines tomorrow? I told them I am terrified being here. The people we expect to care for us, are doing us harm and demanding a unhealthy mask.

I pulled out the provisional death rates from the CDC. It updates daily. I had a printed copy with my copy of the PA mandate. I showed these nurses the covid death rate in USA is 0.0008962333333333. The room went silent. I asked why is everybody acting so strange? What the hell is going on. Be your own hero and take that dam muzzle off.

I won and not wearing a mask. They closed the door and are leaving me

alone...for now.

2) My son is in the hospital with a fractured hip from a snowboarding accident. No visitors permitted because of VC91.

Yesterday he was given the news that no surgery needed, just lots of physical therapy. PT showed up, stood him up, and had him walk around a bit. Said they may keep him a few days to get him started on PT.

This morning he called me early saying a nurse showed up to prep him for surgery. He objected and explained what he was told yesterday.

I spoke with Nurse. She notices this oddity also and asked some questions.

She goes onto say that everything is very crazy in the hospital. Lots of confusion. She tells me this.

What are my choices?? He is heavily medicated with morphine.

CAF Notes & Links

Catherine Austin Fitts says:

[December 30, 2020 at 6:48 am Edit](#)

Ron:

1. You need to make sure ALL legal authorizations for surgery have been rescinded and deliver a written affirmation that they DO NOT have authorization to operate.
2. You need to find an orthopedic surgeon you can trust to explain options and recommendations to you IN PERSON. You need to look in their eyes and make sure you understand.
3. You need to make sure your son can text you at all times and knows to not permit any drugs to be administered other than pain killer or any that you believe appropriate as agreed with the attending physician.
4. You need to be prepared to intercede immediately if there is anything inappropriate going on.
5. If he is not going into surgery, I would move him to a rehab center asap or home as is most appropriate.

A lot of this depends on finding a good orthopedic surgeon you can trust who will focus and teach.

What is the hospital's name and location?

Catherine

Question:

R says:

[December 30, 2020 at 1:21 pm Edit](#)

Thank you so much for the fast advice. I made the call to a lawyer to prepare whatever I needed. Before he called me back, I had made enough of a stink that both nurses and doctors were calling me back. Then I FaceTimed with my son. He was much more lucid than when he phoned me early AM about this confusion. He had now also talked with the Doctor. He understood what was going on and made the decision to not have surgery.

Note: it was not easy to get these people to tell me what drugs he was taking, or what papers he signed. No way to contact doctors directly at the hospital. It was not until I said I would be there with a lawyer and the sheriff inside two hours if you don't answer. Then she read me what he signed and detailed the two drugs. Morphine and Robaxin

The nurse apologized using the covid craziness for the confusion as the excuse. I asked, do you have many covid patients? She said I don't think so. ??

Long to short, his fracture is mild, but in a difficult spot where the muscles attach to the bone. Causing the muscles to contract and turn his left leg, foot outward. He has had three PT sessions and walking with a walker. It will be a long tough recovery, but no surgery.

I bring him home AM tomorrow.

Thanks you all so much for the support.

CAF Notes & Links

Catherine Austin Fitts says:

[December 30, 2020 at 1:33 pm Edit](#)

Still need to find a good orthopedic doctor you can trust. Will see if I can find some good recommendations.

Question:

Asays:

[December 31, 2020 at 11:28 am Edit](#)

Ron, if perceive you may have any difficulty getting your son out, please reach out to Derrik Staheli (435) 922-8147(phone or text). Tell him you have a need for backup, and ask him to connect you with the group in Lehigh. Thats the Peoples Rights patriot group in Utah, they've peacefully helped multiple citizens who have had such needs, such as a veteran who was being held against his will and refused discharge from the VA without taking a covid test.

New Year 2021

In this winter of winters,

deep peace of cold
and lengthening nights,
the womb prepares
for the coming light child.
Ancient of ancients
foretold o'er millennia,
reweaves the story
of chains linked by fear
to deep sea's parting.
Pains of labor
cause the land to erupt
in contractions of earth.
Oceans release,
dark clouds are parted
and in waves of sure rhythm
our freedom is birthed.

d

CAF Notes & Links

Question: (S)

This is a quote from Jordan Peterson's blog. There is no middle ground anymore. Sitting on the Fence

The following is from a draft of

Beyond Order: 12 More Rules for Life

(Estimated Read: 2 Minutes)

Christ, returning as Eternal Judge in the hallucinogenic book of Revelation, reserves his most terrible sentence for those in the middle:

“I know thy works, that thou art neither cold nor hot: I would thou wert cold or hot. So then because thou art lukewarm, and neither cold nor hot, I will spue thee out of my mouth (Rev 3: 15-16).”

This is an indication of ultimate disgust, manifested toward those who will not commit, who wait, who play both ends against the middle, who will not risk, who will not commit, who wait forever, as their lives tick by, for a certainty that will never make itself manifest. These are the people who are terminally lukewarm, and there is nothing but ultimate danger in that,

practical and metaphysical.

Answer to Job.

Considered one of Jung's most controversial works, Answer to Job also stands as Jung's most extensive commentary on a biblical text. Here, he confronts the story of the man who challenged God, the man who experienced hell on earth and still did not reject his faith. Job's journey parallels Jung's own experience—as reported in *The Red Book: Liber Novus*—of descending into the depths of his own unconscious, confronting and reconciling the rejected aspects of his soul.

[A](#)

CAF Notes & Links

Question: (Ron)

I have not understood what Catherine has meant when saying “we are in a spiritual battle”. I got it, felt it, but didn't think I had any understanding of what a spiritual battle meant. Now I think I do.

Quotes like this have helped me understand: from a musical prodigy, Tori Amos. https://en.wikipedia.org/wiki/Tori_Amos

“The song appears as light filament once I've cracked it. As long as I've been doing this, which is more than thirty-five years, I've never seen the same light creature in my life. Obviously similar chord progressions follow similar light patterns, but try to imagine the best kaleidoscope ever—after the initial excitement, you start to focus on each element's stunning original detail. For instance, the sound of the words with the sound of the chord progression combined with the rhythm manifests itself in a unique expression of the architecture of color-and-light. ... I started visiting this world when I was three, listening to a piece by Béla Bartók; I visited a configuration that day that wasn't on this earth. ... It was euphoric.”

The more I learn, the more I understand, the more spiritual I feel. This is why controlling information/education is so important. It is why we are masked and separated. We don't understand, but I am learning, how powerful we can be together with a common understanding. Not belief but knowing.

This document helped: https://larouchepub.com/eiw/public/1995/eirv22n48-19951201/eirv22n48-19951201_012-the_anti_newtonian_roots_of_the.pdf

I can't comment or say enough about how Solari has contributed to my learning. There are so many seeds here, that when watered with some other information at some other time, begin to blossom into these secret understandings.

We are the divine, you and me. It is our link, our connection that constitutes the divine intelligence. It invisible. Like always these realities for me come in pieces. Many of the pieces had no meaning at first. These pieces sit in memory waiting for the other pieces then whammo, all of the sudden and sometimes years later, the light bulb lights and you know. I love that feeling.

Question: (P)

A Future Vaccine to Prevent Knowledge of Soul and Spirit

From *The Fall of the Spirits of Darkness* (Bristol: Rudolf Steiner Press, 1993; GA 177), p. 85.

October 7, 1917

85 – “The time will come – and it may not be far off – when quite different tendencies will come up at a congress like the one held in 1912 and people will say: It is pathological for people to even think in terms of spirit and soul. ‘Sound’ people will speak of nothing but the body. It will be considered a sign of illness for anyone to arrive at the idea of any such thing as a spirit or a soul. People who think like that will be considered to be sick and – you can be quite sure of it – a medicine will be found for this. . . . The soul will be made non-existent with the aid of a drug. Taking a ‘sound point of view,’ people will invent a vaccine to influence the organism as early as possible, preferably as soon as it is born, so that this human body never even gets the idea that there is a soul and spirit.

“. . . the heirs of modern materialism will look for the vaccine to make the body ‘healthy,’ that is, make its constitution such that this body no longer talks of such rubbish as soul and spirit, but takes a ‘sound’ view of the forces which live in engines and in chemistry and let planets and suns arise from nebulae in the cosmos. Materialistic physicians will be asked to drive the

souls out of humanity.”

October 27, 1917

199-200 – “. . . the spirits of darkness are now among us. . . .

“. . . I have told you that the spirits of darkness are going to inspire their human hosts, in whom they will be dwelling, to find a vaccine that will drive all inclination toward spirituality out of people’s souls when they are still very young, and this will happen in a roundabout way through the living body. Today, bodies are vaccinated against one thing and another; in future, children will be vaccinated with a substance which it will certainly be possible to produce, and this will make them immune, so that they do not develop foolish inclinations connected with spiritual life – ‘foolish’ here, or course, in the eyes of materialists.

. . . .

“. . . a way will finally be found to vaccinate bodies so that these bodies will not allow the inclination toward spiritual ideas to develop and all their lives people will believe only in the physical world they perceive with the senses. Out of impulses which the medical profession gained from presumption – oh, I beg your pardon, from the consumption [tuberculosis] they themselves suffered – people are now vaccinated against consumption, and in the same way they will be vaccinated against any inclination toward spirituality. This is merely to give you a particularly striking example of many things which will come in the near and more distant future in this field – the aim being to bring confusion into the impulses which want to stream down to earth after the victory of the [Michaelic] spirits of light [in 1879].”

Question: (A)

RESISTANCE In EUROPE.....<http://stateofthenation.co/?p=44167>

An anecdotal conversation with a nurse friend today who works in Seattle. The job is still voluntary among the staff workers (major hospital) but she said she gets lots of social pressure from co-workers every day asking her if she has taken the shot. She expressed amazement that so many co-workers are willing. She says for her, it is a dystopian work environment. Soon she will have to fill out formal paperwork documenting her choice to decline, that will go into her record. She mentioned she has been getting assigned to Covid floor(s) almost exclusively, when normally she would have a much broader rotation of floors, and is required to wear double mask for 12 hour shifts. Within a month she will be free to leave her contract obligation, and will look for another position.

Hello from a new subscriber! It was maybe 3-4 months ago Catherine mentioned a subscriber report that provides an analysis of best places to locate given the situation upon us. Can anyone point me in the right direction?

I am in Charlotte, a designated 'Smart City' that's been literally blanked in 5G towers over the past six months. I'm confused, if part of the agenda is to have folks move into these metro centers, then why all the incentives align to leave cities? Is real estate being cleared for some purpose?

m

CAF Notes & Links

Question: (P)

Just thought I'd repeat a story now happening all across the US. . . my mother-in-law was confined in a nursing home, no visitors allowed, since March 2020. Three weeks ago the H1N1 flu vaccine was administered to all residents in the home. Afterwards, there were 20+ incidents of grave illness necessitating moves to in-patient status. In my mother-in-law's case, with pneumonia like symptoms, she was given the bogus PCR test, the dx was made that she had COVID, she was put on a ventilator, and she died.

Although healthcare workers were considered to be adequately protected with masks and gowns it remained unacceptable for family to gear up in like fashion to do monitor her care and to be with her as she declined and then passed away.

We have always known that the flu vaccine has low protective qualities and can lead to active cases of the same. It is bad enough to administer to the immune compromised and physically weak elderly and chronically ill. Is the COVID vaccine better in this regard? I ask this rhetorically, of of course.

Considering that the 2 target groups for first jabs of the vaccine are healthcare workers and elderly confined in nursing homes, I'll tell you where my mind takes me on this matter: Accelerated euthanasia of the elderly and weakening of the US healthcare capabilities.

Question: (K)

1) So, I'm reading a biography of Dietrich Bonhoeffer. the German theologian who took a stand against Hitler. If, as one of the panelists described at length, Hitler and the Nazis were driven by aliens, then the Nazi push to absorb, retool, and control the Lutheran church at the outset of the Third Reich may speak to the power of Christianity to threaten the evil embodied by Hitler and the Third Reich. What's so interesting, it how

relatively easy it was for Hitler and the Third Reich to systematically obliterate the German culture. And, isn't it interesting that the focus of the regime's hatred was the Jews, God's chosen people. Doc

k

CAF Notes & Links

Given the role of the Zionists in financing Hitler, seems a more complicated story.

2) In reply to [Catherine Austin Fitts](#). (Kathleen)

Ah, yes! And that brings us right, straight to the question of free will, doesn't it? But I return to my point – the first initiatives orchestrated by Hitler as he was rolling out the Third Reich was to target the Jews and, simultaneously, to shoot the kneecaps out of the German christian church, broadly and deeply Lutheran at the time, because the church was sure to defend them. The history of the degree of compliance among the clergy and the citizenry is altogether eye-popping, of course. As for the Zionists, well I suppose they were as confused by money, power, and opportunity as the majority of us tend to be. If you haven't read Eric Metaxas' bio of Bonhoeffer (Pastor, Martyr, Prophet, Spy) I can highly recommend it. Especially now. BTW, you were absolutely wonderful on that 2015 panel discussion about space, etc. Happy Holidays and safe travels, always – Kathleen

Question: (S)

Catherine,

Are you familiar with quorum sensing in bacteria? I find it remarkable. One reason I do not subscribe to the germ theory of 1 germ one disease and find the terrain theory more plausible. I think you would find it useful in our time and I am concerned about all the genetic manipulations of the vaxxes. Here is the transcript and audio of Dr. Bonnie Bassler's TED talk.

https://www.ted.com/talks/bonnie_bassler_how_bacteria_talk/transcript

-snip-

The reason *Vibrio fischeri* is doing that comes from the biology — again, another plug for the animals in the ocean. *Vibrio fischeri* lives in this squid. What you're looking at is the Hawaiian bobtail squid. It's been turned on its back, and what I hope you can see are these two glowing lobes. These house the *Vibrio fischeri* cells. They live in there, at high cell number. That molecule is there, and they're making light. And the reason the squid is willing to put up with these shenanigans is because it wants that light.

The way that this symbiosis works is that this little squid lives just off the coast of Hawaii, just in sort of shallow knee-deep water. And the squid is nocturnal, so during the day, it buries itself in the sand and sleeps. But then at night, it has to come out to hunt. So on bright nights when there's lots of starlight or moonlight, that light can penetrate the depth of the water the squid lives in, since it's just in those couple feet of water. What the squid has developed is a shutter that can open and close over the specialized light organ housing the bacteria. And then it has detectors on its back so it can sense how much starlight or moonlight is hitting its back. And it opens and closes the shutter so the amount of light coming out of the bottom, which is made by the bacterium, exactly matches how much light hits the squid's back, so the squid

doesn't make a shadow. So it actually uses the light from the bacteria to counter-illuminate itself in an antipredation device, so predators can't see its shadow, calculate its trajectory and eat it. So this is like the stealth bomber of the ocean.

(Laughter)

But then if you think about it, this squid has this terrible problem, because it's got this dying, thick culture of bacteria, and it can't sustain that. And so what happens is, every morning when the sun comes up, the squid goes back to sleep, it buries itself in the sand, and it's got a pump that's attached to its circadian rhythm. And when the sun comes up, it pumps out, like, 95 percent of the bacteria. So now the bacteria are dilute, that little hormone molecule is gone, so they're not making light. But, of course, the squid doesn't care, it's asleep in the sand. And as the day goes by, the bacteria double, they release the molecule, and then light comes on at night, exactly when the squid wants it.

So first, we figured out how this bacterium does this, but then we brought the tools of molecular biology to this to figure out, really, what's the mechanism. And what we found — so this is now supposed to be my bacterial cell — is that *Vibrio fischeri* has a protein. That's the red box — it's an enzyme that makes that little hormone molecule, the red triangle. And then as the cells grow, they're all releasing that molecule into the environment, so there's lots of molecule there. And the bacteria also have a receptor on their cell surface that fits like a lock and key with that molecule. These are just like the receptors on the surfaces of your cells. So when the molecule increases to a certain amount, which says something about the number of cells, it locks down into that receptor and information comes into the cells that tells the cells to turn on this collective behavior of making light.

Why this is interesting is because in the past decade, we have found that this is not just some anomaly of this ridiculous, glow-in-the-dark bacterium that lives in the ocean — all bacteria have systems like this. So now what we understand is that all bacteria can talk to each other. They make chemical words, they recognize those words, and they turn on group behaviors that are only successful when all of the cells participate in unison. So now we have a fancy name for this: we call it "quorum sensing." They vote with these chemical votes, the vote gets counted, and then everybody responds to the

vote.

What's important for today's talk is we know there are hundreds of behaviors that bacteria carry out in these collective fashions. But the one that's probably the most important to you is virulence. It's not like a couple bacteria get in you and start secreting some toxins — you're enormous; that would have no effect on you, you're huge. But what they do, we now understand, is they get in you, they wait, they start growing, they count themselves with these little molecules, and they recognize when they have the right cell number that if all of the bacteria launch their virulence attack together, they're going to be successful at overcoming an enormous host. So bacteria always control pathogenicity with quorum sensing. So that's how it works.

-snip-

I have never seen the death statistics for a year before the year is over – so don't know. Will keep a look out.

Question:

A says:

[December 17, 2020 at 6:49 am Edit](#)

I was intrigued at the possibility that we are not dealing with a virus at all, but instead are dealing with an ENDOTOXIN. Catherine has interviewed several guests, I think, who insist that there still has not been a virus isolated that causes COVID-19. This would be a good explanation for that—perhaps we need to stop looking for a virus and start looking for an endotoxin.

If—IF—this were indeed a bioweapon, how brilliant it would be to cause a sickness in a population and send all their medical specialists on a snipe hunt looking for a virus, when it was actually an endotoxin causing the pandemic!

I have been interested in the fact that this “virus” seems to break out in very odd clusters. It is common knowledge now that people who are immune compromised are especially susceptible, but other places of breakout don’t make much sense; while there are gatherings of people all the time all over the country, COVID will ravage one group, but seem to leave another totally alone.

What if you spread an endotoxin somehow in a group? In the food, with a spray, or just wiping it on something that everyone will touch? What if you did this in a place where the people were likely to be vitamin C deficient, so the endotoxin would get a good foothold? At the universities, the virus has been spread in all the places where there is heavy drinking. Booze heavily depletes vitamin C, and thiamine as well—which is another player in this. It spreads in bars and frat houses.

Catherine comments often about the “genius factor” we are pummeled with by the media. Maybe the group that invented this bioweapon wasn’t so brilliant after all. Maybe 40 years ago they read Kalokerinos’ work and thought it would make the perfect bioweapon. I wonder if the test where they shove a stick into your brain is also a method of introducing it—right there at the blood/brain barrier. Right next to the respiratory center of the brain, the area they want to infect. I’ve had the test twice. There is NO reason for this kind of testing—and my medical friends say the same.

One other comment about this—I firmly believe that whoever released this has been shocked at the minimal damage it did to the people in the USA. Some good sources say that millions of Chinese died from this; they did not get the same result in western countries, and certainly not here in the US. Again, I think this “virus” didn’t kill off anywhere near the number they thought it would. So they have been stuck trying to sell the world a pandemic that never

got legs.

I know there are exceptionally intelligent people who frequent this board, and lots of “outside the box” thinkers. In my experience, the bad guys most often aren’t all that intelligent—just tricky and sneaky. Maybe the answers to this “pandemic” are simple ones, staring us right in the face.

Catherine Austin Fitts says:

[December 17, 2020 at 2:12 pm Edit](#)

New conversation with Jon Rappaport and Dr. Tom Cowan on why they do not believe a virus has been isolated. It is in DR Cowans channel at Youtube and up in Daily Solari on Home Page at the bottom.

S says: (In reply to A. Newman)

[December 19, 2020 at 6:23 am Edit](#)

A.

Indotoxin. Fits well. A food borne bacterium can release it’s indotoxin and it would be introduced into the body through a leaky gut. Most Americans’ guts have been “primed” to be leaky by the glyphosate pervasive in the environment.

Eat plenty of bifidobacterium(will limit gram-negative bacterium) and bone stock(home made) will heal a leaky gut.

Is this part of the puzzle?

Thank you, for a very interesting puzzle.

Did the \$3 Trillion make it on the Presidents desk? Can not find it in the Act.

Question:

B says:

[December 14, 2020 at 11:06 pm Edit](#)

Catherine,

Thank you for your optimism. I liked the heart to heart talk to your subscribers. You say that you are are not a minister. I would like to say that your interviews, your testimony, and your Solari Report is your ministry. You talk of Christ Jesus. You talk about how we should... move and have our being... that we can live a free and inspired life. Your favorite passages seem to be the story of Gideon. You minister to us when you tell us this story

and then tell us the cold hard facts. You are highly relevant and appropriate, especially in this treacherous socio-economic-political climate; an unprecedented time in American history. You tell us the truth and keep us informed so we can know it, understand it, and face the issues. I like that you laugh or gwaft when talking about what Mr. Global's minions are doing. For me, I imagine Wile E. Coyote's out-of-control hubris, trying experiments all the time, and his Acme dynamite kit keeps blowing up in his face. I understand that sense of amusement. Thank you for telling us your life experiences and other stories. It puts things into perspective. In the film, "Enemy of the State", the principal character was very smart to turn the tables on all the bad characters, and walk out alive with a greater appreciation of how the world is shaken and baked. I believe informed optimism like that will help us to survive this wild wild west.

BeauTie

Will do if I speak with her.

Question:

L says:

[December 14, 2020 at 11:45 am Edit](#)

I heard radio D.J.'s talking today about Crain's recent article on the 25 most powerful Chicagoans; One was the new Cook County assessor, who has come up with a new plan to re-assess all Chicago real estate based on his new formula, which — if I understand correctly — would devalue commercial real estate and increase the value of low-income real estate. This is not my area of expertise, but it seemed like something CAF would be interested to know and would understand (unlike me). Sounds like revised real estate control and acquisition plans for Chicago....

CAF Notes & Links

Catherine Austin Fitts says:

[December 14, 2020 at 11:47 am Edit](#)

Indeed. Thanks, Lori. Vultures are reported to be big buyers in Chicago. Big property income tax increases on low income real estate should clean a lot of people out. Dropping values on commercial will likely give tax breaks for holders and buyers. I wonder if they can get refunds.

Question:

N says:

[December 14, 2020 at 10:41 am Edit](#)

Dear Catharine and Solari team, I want to share this video of Simon Parkes who advises us not to be disconsolate since the rebuff from the Supremes, but have hope for other cases and even a better crafted case like the one from Texas with half the states behind it. There are other options as well which he has intimated. One zinger- Kamala Harris has not relinquished her senate seat, so SHE is not confident in the outcome. Si Vales Valeo, Nick . Tag: Simon Parkes- 12th December Update Current News

CAF Notes & Links

Catherine Austin Fitts says:

[December 14, 2020 at 10:50 am Edit](#)

Thanks. I am always interested to hear Simon's opinion. Very intelligence guy with lots of useful insight.

Harris has not given up her seat because she wants to be voting down to the last minute – and your right. Anything can happen.

Question:

Catherine Says:

Subscriber wrote this am:

> Catherine, you are convinced that Trump will fail if he uses the military to save the country.

>

- > Would you please explain in great detail why that would be a bad idea?
- >
- > I don't see any courts that will act on behalf of the people.
- >
- > Furthermore, could you detail what steps you estimate would benefit Mr Trump the most.
- >
- > Thank you from millions of awake people across this planet.
- >
- > Many blessings to you and your family,

Catherine Responded:

If you suspend Constitution....here is the plan. Chances of this happening IMO is 99.99% chance.

Suspend Constitution – Sheriffs lose authority, likely states too as practical matter, being financial dependent

Deep State – which controls the machinery now – proceeds to act free of the Constitution

Feds confiscates all guns and desirable property

Military force vaccinates 100% of the populaton – result includes heavy culling of population over 65 who are expensive to insurance industry, likely increased steralization of female population

Heavier remote control mind controlled population moved to slavery system

Fed owners proceed with picking up assets for pennies on the dollar

All this Trump save the country BS is a ruse to patsify the Q anon and other conservatives into helping make this a reality. Total BS.

If we are lucky it is being done to simply help fund raise for the Republicans.

If the Trump team wanted to stop the election fraud they could have and should have.

And what are you doing to help your local Sheriff or build a local food system instead of losing your time to this?

POSTSCRIPT

The fact that this is not perfectly obvious tells me that the mind control is really working.

Trump does not have sufficient Republican support to pull off the election or to make his case for election fraud. That is a fact. This is a political failure that can not be overcome by turning control of the entire legal system to the Deep State financed by FASAB 56 to do whatever they want. This puts the NY Fed owners entirely in charge.

Thank you so much for publishing Hyperdimensions. As we face more physical lockdowns, the presentations by the wonderful Ulrike Granogger quantum leaps me immediately to the place of my truly free and inspired life-scape – my mind. Love it! It is an incredibly peaceful place where I reside with all of you as well as with the All of Everything – (call the Creator what you will).

As I look forward, I was wondering if you have had a chance to look into the Common Law movement as of yet?

One of its greatest proponents and practitioners is (Judge) Anna Von Reitz from Alaska. She is gaining great traction with her memberships of late which I am sure that says something in today's climate. (It is, in my humble opinion, not based on ideologue(s). It seems to spring from a much deeper place due to its appeal to common sense and its simplicity for practice as well as being respectful to individual freedom).

Her analysis of why the Supreme Court denied the State of Texas' case on Friday December 11/2020 is compelling – and again, simple.

Again – I believe there is really something to this movement. Something of great import to assist us freedom warriors as we move forward. Something grassroots and focused locally. (Think County and Sheriff [the people's elected representative]).

If you could wrap your brilliant “follow the money brain” around this idea whose time has come (or come back) – I am sure we have lots of hope for the coming year.

With love and respect and joy in the upcoming holy days in celebration of the Christ Mass.

Sincerely,

Terry McDonald – Subscriber – Beeton ON Canada

Going Direct Reset

Question:

Hi Catherine,

Like you I have an Investment banking background. Most recently been in politics working for the Chairman of The Brexit Party!

You are SUCH an inspiration. I am fascinated about all I am learning from you. I have a 20 year old autistic son - so have been looking into vaccines and the damage they can do for close to 2 decades.

I realise now that this whole ‘magic virus’ is being strung out to give the central banks time to get their digital currencies ready. I have a friend who is a partner in a law firm working on these projects at two different central

banks. (I know - helping build the system they are going to use to enslave us).

My question is whether my husband and I (both recently retired) may wake up penniless one day and find our savings accounts with zero balances against them?

When they eliminate cash - will our current cash assets be reflected in how much digital currency we are allocated - or will we all just be given access to the same amount - as long as we display good behaviour?

Also - when do you think the elimination of cash will happen?

And finally - how can we protect our wealth? (not that its that much - but we have provisioned to give us a modest lifestyle). It's all in cash and our home at the moment because the equity markets are way over valued, wouldn't touch bonds with a barge pole and I can not get comfortable buying gold.

It's all quite terrifying and my worry is that we as a society are sleepwalking into this. Most people think I am a fantasist when I try to explain to them what is happening.

We are worried sick at losing everything.

Would love to hear your thoughts. Am trying to get the word out here through friends in the media about what is going on - because most people haven't got a clue. Awareness may help in the battle ahead.

Kind regards and keep up the great work,

V

Question:

Hi Catherine,

When you mentioned in your last visit with John Titus that "...the whole New Green Deal ... it's about stealing land and real estate," I realized that my personal situation is going to require that I get a crystal clear understanding of the detailed mechanics of exactly how the Green New Deal (inter alia, et al.) makes this land grab. Searching for "Green New Deal land" turned up your illuminating discussions with Patrick Wood, the full text of H. Res. 109, etc..., but I think I still need to get way down into the weeds before I'll finally connect all the dots -- could you please point me to where I can make this deep dive...?

Health

Question:(J)

This is probably one of the most important tips for your health and easiest to implement. The latest interview with Tucker Goodrich by Dr Mercola shows you how damaging industrial seed oils are. Well worth the watch.

Once you know this it makes you wonder why Gates and WEF are pushing so hard for these Franken foods...

<https://articles.mercola.com/sites/articles/archive/2020/12/13/linoleic-acid-health-effects.aspx>

CAF Notes & Links:

Question: (R)

1) This is a patent assigned to PERLEGEN SCIENCES, INC, and St.Jude

Children's Hospital. It details the positive outcomes for mice treated with enough chloroquine before TBI (total body irradiation).

<https://patents.google.com/patent/US20050014785A1/en>

This is a big clue in my opinion. Chloroquine protects against exposure to radiation. Wireless radiation and beyond.

If I am understanding correctly, EMF disrupts the metabolic system in a way that blocks (for lack of a better description) nutritional pathways.

Chloroquine is the chemical push to reopen that pathway closed by exposure to EMF. I think Robert Block, Arthur Firstenberg, and Dr. Sam Milham have figured it out.

I think most of the pieces are on the table. This is how I put them together.

Our course of action is real simple: My family practice

- cell phones off unless in use
- no wifi/hardwired instead
- don't hang out near cell towers, 5G antennas etc.
- Biogeometry jewelry
- one tonic water (with quinine) a day with a few drops of liquid zinc
- lots of hugs, kisses, and prayers

Any additional good advice is welcomed.

2) Tennessee Nurse Paralyzed – CV19 VAX: Khalilah Mitchell's Bells Palsy Warning

<https://youtu.be/G5FBHE3vXqE>

Rumors flying around that Tiffany Dover, the Tennessee nurse that fainted, is now dead. It is difficult to find anything to support this other than some diggers claims to have found she is listed as dead on "some" websites.

Local Gatherings

Question: (3 parter)

1) Some one else posted this earlier and I signed up. If anyone else lives in Florida or you know like minded people in Florida, please pass this along.

Very exciting Sible Edmonds is heading it up.

They are having the first meeting tonight. Trying to figure out ways to get the word out.

Goal—Bring together and unite people who are for Pro-Liberties, Pro-Sanity, and Prosperity in Florida. And with that, defeat and dispose of insane mandates: 1- Mandated Lockdowns 2- Mandatory COVID Vaccine & 3- Mandated Masks

https://lp.constantcontactpages.com/su/IR12qd8/FloridaUnites?source_id=e025e9e0-dc6d-4a93-b5f2-887edc349dda&source_type=em&c=_hgG0SRaJtUS9CuBC4WoHxV3cF_YdLTNgBpAMlq8A7wU3hmZ7NYKQGQ==

2) Here an outline of what the grassroots movement in Florida wants to accomplish. Helpfully other states will follow.

1- What are FUAMI's main objectives?

Bring together and unite people who are for Pro-Liberties, Pro-Sanity, and Prosperity in Florida. And with that, defeat and dispose of insane mandates:

1- Mandated Lockdowns 2- Mandatory COVID Vaccine & 3- Mandated Masks

2- What is FUAMI's Approach to Accomplish these goals?

First, we unite- there are millions of us in Florida who stand against mandated insanity.

Then, together, we'll make our voices heard- and our collective demand translated into action by our elected officials-Florida Governor & Florida Legislators. After all, who are they representing?! We, the people.

3- Who funds and backs FUAMI?

No one. We are grassroots activists without any strings attached to any NGOs, corporations or political parties. It will be done by we the people.

With millions of us united- in Florida, being defeated is neither an option nor a possibility.

4- What's FUAMI's Action Plan?

Phase 1: We quickly connect and form a state-wide network. Emphasis on Quickly. Because time is running out. To do this we have launched our Opt-In database.

We are asking all of you who share our objectives to sign up and unite with us. And we want you to reach out to other likeminded friends, family members, coworkers and neighbors to ask them to join FUAMI. This is how we can grow our grassroots network- and unite with millions of Floridians.

Phase 2: Establish regional (NW, NE, Central, SE, SW Florida) chapters, and local/city sub-chapters for regular weekly meetings and planning. We need motivated leaders for our regional chapters and local sub-chapters to help us organize and lead the way.

Phase 3: FUAMI Petition Addressed to our Legislators and Governor. We will gather millions of signatures in Florida. Together, we can.

Phase 4: Mega Rally and delivery in Tallahassee, FL.

5- What Can I Do Now- during Phase 1?

A- Join and unite with us via our FUAMI Opt-in form: Enter your full name, city, state and zip code.

B- Reach out to those you know (family members, friends, neighbors, coworkers, etc.), and get them on board- have them join.

C- Volunteer to become a FUAMI regional and or local organizer/coordinator. You can contact me directly at: [S](#)

D- Share our messages, updates, alerts and action items: in person, via email, on your website and or through your social media channels.

6- Do you have any upcoming events planned?

TBA- As soon as we have a solid 10,000+ core base (via our Opt-in database), and our regional chapter leaders (5 FL regions) in place, we will plan regional meetings/conferences. Please stay tuned, meanwhile help us reach others and expand.

7- "But petitions are useless and ineffective! They rarely accomplish anything!"

Not True- Not when you're talking about taking on One state at a time.

Not True- Not when you have 100s of 1000s or millions united in One state.

Not True- Not when you deliver it in a mega rally by masses determinedly- and very vocally!

Not True- Not when we the people set consequences for those pseudo representatives, and have the power to kick them out of their offices/positions.

8- Is there a deadline for FUAMI campaign?

Yes! Time is of the essence. We are talking weeks- a few months at most.

This is why we must act NOW: Unite and get this done. Florida legislatures will be back in session on March 2, 2021. And our enemies are set to coerce Florida into submitting to insane mandates: From Mandatory Experimental COVID Vaccine, to, Forced Lockdowns and Mandated Masks.

Thank you all. Don't forget: Together We Can!

Florida Unites Against Mandated Insanity

3) In reply to [N](#).

Ok, so I just got off the first meeting Florida. They had 500 people sign up to join the group. About 40 or 50 signed up to attend the online meeting. Actual attendees was 19 total. Its scares me that Americans are as a whole not doing anything. But at the meeting they said the magic number is 3%. If we can get 3% to participate in reclaiming our rights and taking action locally we can take back control.

n

Question: (Jennifer)

Hello from Houston. I'm interested in joining with like minded people in this area to see how to implement some of the ideas Catherine has been telling us

about.

I read online today that our employers can push the vaccine as a condition for employment. So far I have not been told to vaccinate and I work for an Independent School District. I'm planning on using religious exception in such a case.

Lastly, if someone can give me their opinion regarding whether this is a good or bad time to buy a house. I have a mortgage loan approved but house values have sky rocketed in this area. There are many people moving from NYC and California. Any insights are appreciated thanks!

Question:

CAF Notes & Links:

Recommended Links

Question:

Hello Catherine,

Thank you for being you.

I just saw your interview for "planet lockdown".

As usual, you laid it right out.

Also, as usual, the people who you give interviews to... couldn't figure out how to ask you a relevant follow-up question if a gun was held to their thick heads.

Even your gentlemen buddies, Dr.F and Greg Hunter, never ever seem to really connect the dots of what you are blatantly telling them is right in their faces.

Example: You say, "..both (american) parties have serious crimes and liabilities to hide and are equally committed to the in-human agenda..."

Greg says: ".. so what do you think Trump's secret plan is" ... and what

about the price of gold? Gonna go up right?" Me: head slams on desk for millionth time...

and how in the heck can the Saker talk to you about Russia, China and high-tech (for a full hour!) without once mentioning Israeli control of Microsoft, or the Israeli Talpiot program?

<https://www.bsf.org.il/>

Israeli Drones Worldwide - How Israel, Russia, Iran and China work together
<https://www.brighteon.com/4b2e90fa-60eb-4666-b617-3616bd3f89d2>

Here is a real question Catherine: Are there any trillionaires or group of billionaires, or anyone anywhere with any must-be-reckoned-with real (space) force kinetic fire-power whatsoever that wants earth to stay human? Does anyone who has any real power on Wall Street or at the Pentagon or in Israel want a human world?

Followup: If yes, how can we support them?

If no, what practical protections can an individual really take against being attacked by the borg collective?

Let's be real: Voting is rigged. The sheriff who works for the alphabet-drug-agents won't be "un-elected."

and the sheriff's that stand against the alphabet-drug-agents can easily be terminated by them for not playing meth-ball.

Next real question: You say that, groups have periodically met but could never figure out how to create a "less-secret" world that they still control.

How hard could this really be? I'm pretty sure the global population would

be just fine returning to live in the (relative paradise to now) gonzo corrupt world order we had in the 1990's.

It feels like the types that would be in these meeting would not exactly be "creative types" or "free-thinkers".

What these "fearful" Mr. Global types don't seem to get is that nobody today really cares about their past crimes or if they killed JFK...

Nobody really minds them being crazy god rich either... just as long as the rest of us get to stay human.

Please immediately insist and demand that your interviewers respect your time and intelligence and ask REAL and PRACTICAL followup-questions!!!

and also

You can call me anytime and I will give you THE BEST interview and follow-up questions of your entire life. Guaranteed.

Thank you,

Evan

P.S. I will push that red button everyday, all day and all night. Whatever it takes.

I already dumpster dive and barter. Zero payments to the system. I tell everyone to get chickens.

Keeping 401K, pensions and social security is just a pathetic excuse. My boomer parents already get nothing.

CAF Notes & Links:

Question:

Hi Catherine,

a few inputs i've been wanting to share with you.

1) GERMANY, i think it was the 3rd quarter review 2019 in a chat with Joseph Farrell that you touched on germany regarding EU, control etc.

when looking at germany and who controls it i believe it's important to keep in mind that germany does not enjoy sovereign statehood. as to how far it is controlled and by whom remains an enigma (i've read many of Joseph's books).

the lack of sovereignty is very explicit if one looks at the GERMAN BASIC LAW [Basic Law for the Federal Republic of Germany \(gesetze-im-internet.de\)](http://www.gesetze-im-internet.de). it's a basic law (as in HK) and not a constitution. and very explicitly the last article 146 evidences its status. this article would obviously fall away once a valid constitution is put in place. this art 146 must have been slipped in by a very patriotic member of the group responsible for authoring the basic law and who well understood the importance and legal ramifications of subject matter.

Article 146

[Duration of the Basic Law]

This Basic Law, which, since the achievement of the unity and freedom of Germany, applies to the entire German people, shall cease to apply on the day on which a constitution freely adopted by the German people takes effect.

germany's last constitution was passed in 1871.

2) in several podcasts, you mention that you were told by an administration official in the 1990's, when talking about the 1990's and the flight of money (missing money etc.) moving wholesale out of the US, that the US population

was not willing to take the bitter medicine to put the financial house in order (i'm paraphrasing) and therefore the necessary actions, which are now history, were taking ie. missing money, job losses, de-industrialization, moving offshore etc.

its a story you've told in several talks but i would assume you don't believe it to be the true reason (that it's the fault of the citizenry) why the decision makers took the actions they did or do you give any credence to it? in my mind their explanation doesn't hold water as whatever situation the country was in during the 1990's based on which they took their actions (wholesale economic abandonment) was based on whatever script they had implemented themselves in the first place as they had been in the cockpit all along. hope you get my point here.

3) one of the aspects i most enjoy when following you and the usual suspects is the connecting of the dots across so many different subject matters. this is so important and there are very few independent minds out there who can do this. they are often real heroes in their own fields of expertise in exposing the truth and facts but because they spend so much time researching a specific subject that they simply go with the flow (fallacies) on other issues, simply due to a lack of knowledge and awareness.

the biggest question in my mind when considering the global macro view is who are Putin and Xi Jinping really....true patriots or just part of the card game and hegelian dialectic of the psychopaths. how much of what is visible to us (all the political mudslinging and sanctions) is just for show and part of the scripted plan and how much are genuine differences and defenses of patriotic interests. one classic example of a question is why russia and china just abstained instead of vetoing the security council decision on 17 march 2011 to destroy libya....it just doesn't make sense.

i've been following Matthew Ehret for some time now. he goes deep and is very knowledgeable and connects the dots and might be of interest to you if you don't know him already. he is a contributor with his wife Cynthia Chung on Strategic Culture but has his own platforms as well

[the Canadian patriot – A Sovereign Voice in a Chorus of Nations](#)

[Rising Tide Foundation – a rising tide lifts all boats](#)

4) finally, i know i should be directing this point to another email but i forgot which on so i'm just adding it here. i'm in singapore and i'm not sure if you have any other members here. if you do it would be great if your team could put us in touch. i'm not planning to do trainings etc. as you organise in other locations where you obviously have certain group sizes. but to meet for a coffee and exchange of minds would a treat. i've lived here for close to 20 years and once the glitz and shine wears off it's a very troubling picture when it comes to independent, critical and depth of thought. there's a complete dearth. it's like being on an alien planet...and since this year with all that's going on it's intellectually very claustrophobic and surreal. just very very sad.

i wish you a very merry and blessed Christmas and may the Lord lead us into a much brighter future.

E

CYBER POLYGON WEF KLAUS SCHWAB CYBER ATTACKS

Hi Catherine

Klaus Schwab is saying they are planning a cyber attack that takes out electricity and internet in the soon to be future- causing great disruption, food

shortages etc.

Your thoughts?

Best wishes

Satya

CAF Notes & Links:

Question: (another sub sent in the same link)

Catherine -

Apologies, but I had a couple of other items which I forgot to include in my earlier email.

In an [article](#) about the mass testing, the below photo was included. The nurses are so wrapped up in PPE that I can't tell if they are men or women. Just imagine how a child would feel interacting with them.

The caption, translated from German, said "In Imst yesterday, the youngest test subjects were given a little surprise by the volunteers"

When I first saw this photo, it reminded me immediately of another.

<https://emgpublications.files.wordpress.com/2012/07/freecandyvan.jpg>

I have also been keeping track of the official CV numbers for our region and the average age of death from/with CV is 81.3 for men and 84.5 for women. Note that the average Austrian lifespan as of 2018 is 79.4 for men and 84.2 for women.

It looks like the key to a longer life might actually be whatever it is that they are calling the Corona Virus.

Grant & Sasha

On 12/17/2020 11:26 AM, Grant Montgomery wrote:

Hi Catherine!

I hope this message finds you well and hopefully you were able to escape the lockdowns.

I don't have a question, but just a few items I've found recently to share.

Here in Austria, they tried to do a mass test of the entire population. They thankfully made the tests voluntary and had an absolutely amazing turnout of 22.6% of the population.

In Vienna it was not even 14%. [Overview story here.](#)

I find it interesting that the official CV-19 website for tracking all the numbers never showed a sudden increase in testing or cases. Also, the federal government numbers indicate our region has 40-60% higher current "cases" as compared to our regional government numbers. I haven't yet been able to reconcile this.

[Flu News Europe](#) is a website that help track the Flu in Europe.

I'm not 100% certain of their methods, but I believe they have a network across Europe that sends samples regularly to test for the Flu and then tracks intensity of the flu season, spread, etc.

As of week 49 of their reporting, the average for the last 4 years is 20% positivity. This year, 0%. Chart below for reference. 2020/2021 is the blue line barely visible under the 0% axis.

Also, you can see in this chart that the 2019/2020 tracking crashed early in the season between weeks 8 and 13. This corresponds exactly to when CV-19 positive test results started to climb.

Wishing you a merry Christmas and happy new year!

Grant & Sasha

CAF Notes & Links:

Question:

Catherine,

I posted this on the subscriber input page as well.

A friend and fellow health freedom warrior, Brandy Vaughn of <https://learntherisk.org/> former pharma rep turned truther about the Vioxx scheme, was found unresponsive by her 10yr old son today. She was always worried about being poisoned or something by the threats she constantly endured. After what you have been thru I thought this was an important story to share with your readers. Her friend Erin Elizabeth said it best in her post. <https://www.healthnutnews.com/my-long-time-friend-and-learn-the-risk-founder-brandy-vaughan-found-dead/?fbclid=IwAR3gyGNuKff031QC8->

pRRvWHhaQd3IDBW5PGwmmNcIWtUiNd_JFmk1AnfLo

Friends of mine in the healthfreedom movement are getting her son out of Foster Care to place him with Godparent until the grandparents can get here from another country to get him. Or whatever the plans are for that poor baby. Good people are watching out for his safety. Praying for his recovery & healing is important, so Solari family crank up the prayer circles!

Brandy was always afraid this would happen & posted to us many messages that she would never kill herself and has never taken drugs that could kill her & if she was found dead that it must be a professional. California Leg opens up this week I think & she had plans for various bills etc...

Support LearnTheRisk.org by going to the site, purchasing info flyers & bumperstickers & Brandy's famous billboards about vaccines her org made sure were everywhere. There is a lot of information on the dangers of vaccines & Brandy's story is an important one.

Thank you for all you do.

Question: (combined 3 posts)

Wonder what we can learn from this website: <https://exosome-rna.com/>
/

In reply to [R](#)

When I read this paper on extracellular vesicles/exosomes. It reads to me like a gradual altering of meaning, a slow shifting from viruses as toxic-invaders to exosomes as saviors. Much like they did at Warp Speed with Covid, how they moved from deaths to cases and the masked never noticed.

This reads to me like the slow move to this reality...that has been known since 1983.

<https://exosome-rna.com/the-intricate-relationship-between-ev-and-naked-viruses/>

<https://exosome-rna.com/the-intricate-relationship-between-ev-and-naked-viruses/>

/

I sent this to Dr. Cowan this morning:

Hello Dr. Cowan,

A small request now that you sent me on this path...lol. I have read Virus Mania, Maready books, The Invisible Rainbow, lots of papers, reading Jon Rappoport for decades. A Solari member for at least a decade. I am on the trail of understanding Exosomes and how they are dealing with this in the "scientific community" I found this website, did a search on the word "viruses", and came up with a bunch of virus/exosome stuff as you might imagine.

So to my questions: These papers read like a slow conflating of the two meanings. There is even the one article/paper that says Exosomes can carry virus material and cause disease.

<https://exosome-rna.com/cells-talk-in-a-language-that-looks-like-viruses/>

<https://exosome-rna.com/the-intricate-relationship-between-ev-and-naked-viruses/>

<https://pubmed.ncbi.nlm.nih.gov/33391636/>

<https://exosome-rna.com/cloaked-viruses-and-viral-factors-in-cutting-edge-exosome-based-therapies/>

Then I came across Exosome Therapy that reads to me like a mRNA vaccine.
<https://centenoschultz.com/exosome-therapy/>

Have yo spoken about this?

Am I off in lala land on this?

One big giant Intellectual Smokescreen for whatever they are actually doing.

Kindly, Ron

CAF Notes & Links:

Question:

Dear Catherine

In G. Edward Griffin's video "The Communist Revolution I Warned About 50 Years Ago Is Taking Place Today"

<https://www.youtube.com/watch?v=zYSdQpu1Kbc>

Griffin is asked the following questions:

"What would be the plans that they would have for people like me who are out in the rural areas?"

It seems to me the city people are somewhat easier to control than the people out in the rural areas so what do you see happening?

What do you see the difference in tactics that they would bring in to impose this kind of stuff on the people in the rural areas?"

Griffin replies, "Well it's not what I see; it's what they say because they've written papers on this. They give speeches on it, you know. If you want to know these answers go to the people who are doing it and ask them and they'll tell you. They've dealt with that issue just the way you phrase it, "What are you going to do about these hardcore individuals out in the country?". Well we can't reach them and they might even be able to grow their own food and have their own water supply where we can't observe them or everything they do because they're out in the boonies somewhere. What do you do about those people? We can't leave them out there, can we. And that's what they say, so the plan eventually of course is to confiscate your property. You won't be able to live out there and you'll be brought in big for

health reasons. Maybe you'll be spreading disease out to the wild animals. But I think the most practical plan is that they will confiscate your property and they can do that legally. Now they just say that well this is all in the greater good of a greater number. We have to do this for society for many different reasons. The environment. They'll bring the environment into it too, you know, we can't have your carbon footprint out there and beside you you're obliged to the beautiful scenery the wild animals are getting crowded off because you're there. All these things make it sound like their ideals are high and of course they keep raising your taxes. They won't let you improve your property. They won't repair the roads that get go out into those rural areas so when the roads decay you can't drive on them. There'll be big potholes and storms will come along and the roads will wash out and they'll be gone. You can't get to the property in the country. And they keep fining you for violations and the fines are tens of thousands hundreds of thousands of dollars and people say, "I can't afford this any more. I can't stay here". So they don't have to come with guns and bayonets and move you off. They tax you and find you off of your property and regulate you off of your property. And don't forget, you can't improve your property. You can't even repair it. You can't do anything unless you have special kind of toilets that don't waste water and you've got to put double pane or triple pane windows in but otherwise you can't patch a roof and so on. The neighbourhoods are using economic measures and pressures to get people out of the country and that's a very effective way to do it. Now this would fall in line with the sustainable development goals out of the UN Agenda 21 and stuff like that already is where it's coming from. "

Griffin also talks about revolutionary tactics so it is well worth watching the entire interview.

Question:

Catherine,

Just in case you & John Titus missed this Central Bank detail:

<https://goldseek.com/article/fed-about-go-weimar-gold-and-silver-will-soar>

January 03, 2021 JD

excerpts below:

Note: I learned of the Fed's redefinition of M1 from the invaluable research of John Williams at Shadowstats.com – This information was not reported by any mainstream financial news sources... .The Federal Reserve quietly announced on December 17, 2020 that it is redefining the M1 and M2 Money Supply Measures (H.6 Release) by shifting the savings deposits component into M1 from M2. Nothing the Fed does happens by coincidence or merely on a whim.

New video (7 Mins.) from Sibel Edmonds in Florida on a 2021 draconian proposed law in NEW YORK.

<https://www.youtube.com/watch?v=tLTXIofRERA>

r

Question: (A Another Sibel Edmonds video)

SIBEL EDMONDSIf you don't know who she is, this is well worth watching. At the moment, she's trying to unite Florida against mandated insanity. She has been fighting for all of us Americans for years, as well the US Constitution, and the Bill of Rights, and exposing the truth. She has put her life on the line. Like Catherine, she deserves our attention, support, our gratitude, and more urgently our help in any way we can.

https://www.youtube.com/watch?v=Z7bHQRCu2JY&feature=emb_logo (12 mins.)

CAF Notes & Links:

Question:

FrobiddenKnowledgeTV.net is running a Simon Parks update where he explains Trump signing an Executive Order on 1/1/2021, “authorizing” FEMA camps. The EO is supposed to be S3418. Parks says “this is good news”, then sites the 220,000+ sealed indictments as an explanation.

I can’t find it anywhere. Not through any sort of search, not a Whitehouse.gov, and not at the Federal Registry.

<https://www.federalregister.gov/presidential-documents/executive-orders>

I know next to nothing about Simon Parks. He was popping into my feed “suggestions” a few years back. I watch a few things he commented on, but didn’t find any meat worth bookmarking. Here lately again he is popping up into my feed be it thru YT suggestions, or via a website, I frequent like forbiddenknowledgetv.

I guess time will tell.

Maybe I am missing something. I get the opportunity to drive through a bunch of states it seems at least every few years. Live in PA, and routinely drive to NJ, NY, MD, VA, WV, NC, SC, FL, OH, IN, MI, IL, MN, WI, IA, NE, KS, AR, GA, and more recently a trip to NV, WY, AZ, OK, UT. Maybe I am not looking in the right places, but I have not ever seen troop movements or FEMA camps... I have not seen many large military convoys on the interstates, none actually come to mind. What I have been seeing over the last 5 years or so, is a quiet rollout of technocracy infrastructure. My first notice was Detroit. Facial recognition cameras, street-level microphones, 5G antenna cantilevered above roads, and all the rest.

In my experience, if you are listening and have a good memory. The inconsistencies naturally emerge when reviewing information from a variety of sources. Eventually, something just pops and you get that signal where your Jiminy Cricket causes a brief pause as you subconsciously reflect on the inconsistency, or just maybe a confirmation that you are in the right place.

What is Simon’s history on intel/revelations like this one?

Hat tip to Moms Across America <http://www.momsacrossamerica.com/>

“Wireless Hazards” — An extensive exposé published by The Washington Spectator

Today The Washington Spectator published an extensive exposé about the Telecom industry’s decades-long campaign to dismiss the research about the health risks of radio frequency radiation and fool the public into believing that cell phones are safe by co-opting government agencies and the mainstream news media.

This in-depth study was conducted by Barbara Koeppe, an investigative reporter who covers social, economic, political, and foreign policy issues. Her 7,000-word article posed two questions:

“If you think your cellphone is safe, have you considered why you believe that? Is it a fact or is it based on carefully crafted messages that you’ve read or heard?”

Hello R, Thanks for sharing. Our digital reality. Wave Genome stuff.

Have you bumped into this guy yet?

<http://dieholdfoundation.com/>

<https://www.youtube.com/channel/UCjBe55XpYzc0HzkK-8lgQtA>

This stuff makes my head if you know what I mean. I need to consume more information on this subject before having a chance at developing a rational thought to share.

R

In reply to R. (A)

Thanks for posting & sharing Ron. I agree with your observations and experience 100%. It also adds up with the VX distribution protocols, and top priority for frontline healthcare workers. Some will be smart enough to know better, but the ranks will be decimated, and all sorts of career coercion will likely be used. As healthcare consumers, we are on our own. I once tutored healthcare workers who had returned to college, via their union benefits. A form of Indentured servitude basically, college expenses covered but payback by and thru employers has many tricky features for an employee. Recent check on the union and they too are pushing VX. I have one good friend now caught in the crosshairs. (Question everything, trust no one, have career plan A, B, & C, be careful what you sign, is my best advice to her and get to know Pam Popper. A good attorney might also be worthwhile.) IMO....Alternative medicine, self discipline for best nutrition / clean living, positive attitude and lifelong learning, prayer and sharing resources will get us through! TG for CAF!!

Question: (J)

Regardless of the nuttiness in Washington, DC, there is a high likelihood of solar irruption in the coming decade, at most, two decades. This time period is of interest to most subscribers and particularly their heirs. Please watch this January 2, 2020 YouTube presentation and its predecessors from the past week. <https://youtu.be/wZlivVDgwYQ> A few five minute videos aren't enough to convince you or me, but some study of Suspicious Observers' oeuvre should arm you with at least the knowledge of what you are ignoring while political farce plays out.

And, I think we now know WHY it's been so desperate for the breakaway civilization insiders, whether they're going underground or to different ground altogether: time is running out for "normal living" on planet earth. Those who have been following along will recognize the themes, others will need to research more, but many of us have sensed that there is a great deal of urgency, even panic in what is being done to us. It may be futility to "prep" for an unknown, but there's no reason not to get psychologically and spiritually prepared for what may be unavoidably coming, courtesy of cosmological events—and almost at any time.

It makes sense that the currently unfolding "reset" will be used to scratch-up any output necessary to equip and maintain the elite, but if you're producing, you won't get paid for your final bills, and perhaps you won't need to be. It has not been the custom in the west to get paid in advance, but it might be the type of thing you would do in exchange for a discount, if the direst of scenarios is impending. The narrator (Ben Davidson) notes that these types of extinction events have happened throughout human history, but humanity has survived each one. Your independence from eventually unreliable central services will be key to your own ability to withstand the rigors of the coming challenges.

Please understand that I am not an alarmist, a doom-sayer nor a prepper, but I have been reading the tea leaves for quite awhile and discussing with the few like-minded people I can find, and I offer just the advice that especially the open minded members of this community take heed of what is now becoming clear in the admittedly obscure, but unquestionably public, domain.

CAF Notes & Links:

Question:(J)

First of all, best wishes to the community here for a happy, healthy and prosperous 2021. We will all do our best, even as the world does its worst!

Next, I would like to share the free pdf of Behold, A Pale Horse, by William Cooper, first published in 1991. <https://highlander.com/wp-content/uploads/2019/05/William-Cooper-Behold-a-Pale-Horse.pdf> In this

volume, which is easy to read, you will find as comprehensive an outline of the topics covered in much greater depth here, by Joseph Farrell, Dark Journalist, and many others, far before any of us had any inkling. As if you were watching Star Trek, 2001: A Space Odyssey or any later 20th Century Science Fiction, you will have to take a grain of salt to adjust for the technological reference points being given, but those with diligence will find that it is highly prescient and consistent with what we have seen. It covers banking, politics and space, but also in the dress of AIDS (the scourge of that time), the pandemic phenomenon.

I feel this is some counterweight against the gaslighting technique of calling us Conspiracy Theorists, since what Cooper presents has more or less become entirely enmeshed in fairly common concepts today.

Pam is excellent. We will post. Thanks, Ann.

Question:(Josephine)

Catherine, I was wondering if you will have any experts on to talk about Sec 230.

I see that Trump is calling for repealing Section 230 “to take down big tech” which is completely ridiculous. Sec 230 is one of the only things protecting much of the internet as we know it, including the web.archive.org (very helpful when websites are being removed!) it even protects you when forwarding an email.

I would recommend the EFF (Electronic Frontier Foundation) as they are well-versed in privacy law and trying to protect our civil liberties online.

I haven’t seen anything about this in your news stories, which I find very concerning. We need to be talking about this and we need to understand what Sec 230 actually is, and how important it is to free speech online.

I am happy to provide additional conversation on this topic, as I have been reading and writing about it for about a while now. Passing FOSTA/SESTA was the first time in 23 years that Sec 230 had been edited/changed. What followed was a sweep of censoring and shutting down websites. If Sec 230 is removed, I believe we will see an even greater removal of content we all enjoy and appreciate, due to loss of protection from sec 230, websites and publishers will be held liable for content which appears on their sites.

Hopefully I’ve illustrated at least the importance of looking at this. I know you like Trump, but you have to question this move! And trying to add this “small thing” to legislation for increased stimulus checks—they have nothing to do with each other!

I also HIGHLY doubt sec 230 will have any impact on big tech. Quite the opposite—it will remove all competition.

I would really love to hear more on this, if you know any experts in privacy law and internet policy. Thank you <3

[CWXTR31j2DIZaUBE.](https://www.whitehouse.gov/presidential-actions/proclamation-850th-anniversary-martyrdom-saint-thomas-becket/?fbclid=IwAR3EkNUvIkLjGZ_MEU4sn5OTbu0Ne5ued_D5OmEEedCM)

For what it’s worth here is my own humble take:

I presume Trump is invoking the spirit of Thomas a’ Becket as the righteous man who stands (mostly alone) against a corrupt state intent on forcing its

will on a largely ignorant populace.

The not-to-be-missed movie Becket is one for the ages. The excommunication scene is a classic. <https://youtu.be/NRt2cKvJLIE>
This led to the famous quote (excerpt from Wikipedia) “”Will no one rid me of this turbulent priest?” (also expressed as “troublesome priest” or “meddlesome priest”) is a quote attributed to Henry II of England preceding the death of Thomas Becket, the Archbishop of Canterbury, in 1170. While the quote was not expressed as an order, it prompted four knights to travel from Normandy to Canterbury, where they killed Becket. The phrase is commonly used in modern-day contexts to express that a ruler’s wish may be interpreted as a command by his or her subordinates.””

Also see this scene: <https://youtu.be/7p9CiBJfbik>

Question: (Ira)

VERY exciting...

Prof Chris “Mr Aluminum” Exley has published a book:

Imagine You Are An Aluminum Atom Discussions With Mr. Aluminum

<https://www.simonandschuster.com/books/Imagine-You-Are-An-Aluminum-Atom/Christopher-Exley/9781510762534>

About the book:

Join “Mr. Aluminum,” a scientist who has made the study of aluminum his life’s work, on a journey of discovery, reflection, and the science of aluminum.

Professor Christopher Exley is a firm believer that science is only useful when it is properly communicated. Scientific papers are difficult vehicles for the wider communication of science and thus he has always endeavored to tell the story of his scientific research as widely as possible through myriad blogs, presentations, and interviews. Through a series of easy-reading entries written for non-scientists, Exley will educate readers about his lifelong scientific passion: aluminum. In scientific circles, aluminum—in relation to human health specifically—has gone the way of the dinosaurs (though, unlike dinosaurs, there has not yet been a popular revival!). Yet aluminum is also the greatest untold story of science.

But why do we all need to know a little bit more about aluminum? Do we need a self-help guide for living in what Exley has coined “The Aluminum Age”? What is it about aluminum that makes it different? What about iron, copper, or any of the so-called “heavy metals,” like mercury, cadmium, or lead? Why must we pay particular attention to aluminum? Because its biogeochemistry, its natural history, raises two red flags immediately and simultaneously.

These two danger signals are easily missed by all of us and easily dismissed by those whose interests are conflicted by aluminum’s omnipresence in human life and consequently, are purposely blind to its danger signals. First, aluminum, in all of its myriad forms, is super abundant; it is the third most abundant element (after oxygen and silicon) of the Earth’s crust. Second, aluminum is super reactive; it is both chemically and biologically reactive. However, these two red flags identify a paradox, as the abundant and biologically reactive aluminum has no biological function either in any organism today nor in any extinct biota from the evolutionary past. This means in practical terms that when we encounter aluminum in our everyday lives, our bodies only see aluminum as an impostor, something foreign, and something for which we have not been prepared through biochemical evolution. This in turn means that all of our encounters with aluminum are adventitious, random, and chaotic. And potentially dangerous.

Imagine You Are An Aluminum Atom: Discussions With “Mr. Aluminum” examines the science of aluminum and human health and makes them understandable to all. Within the science you will find personal recollections of events, as well as opinions and reflections upon how the politics of

aluminum have influenced and interfered with doing and reporting the science. It is at once both a personal recollection of Exley's life in aluminum research and a guide on the dangers of the constant exposure to aluminum we as humans face during this "Aluminum Age." It will inform, it will provide the means to question the science, and it will, if the reader is prepared to participate, answer those frequently asked questions on aluminum and human health.

CAF Notes & Links:

Question: (Ron)

Regarding Nashville: This video is being reported as from the Nashville ???

I downloaded this video from Youtube. <https://youtu.be/U6aM7WHm-NA>

Imported into Final Cut Pro and frame by frame it.

I see something different than what is being reported in this video. What I see is a stream moving, not shooting up and just seconds before the puff cloud. The cloud stream appears from behind the 3rd light post, then gradually moves to the right and into the position where it is being reported as shooting up. It appears to me, that when it is being reported as shooting up, is when it is being turned off. Then the big puff appears.

Pictures of the scene show a few toasted cars 9/11-California style. I understand this phenomenon through the explanation of Ginny Silcox. Not a quote, but close: Cars act as capacitors when exposed to the field from the standing wave microwave generators, as they charge up they heat up, as they heat up the tires melt, once the tires melt and the rims hit the ground – the circuit is complete and puff. Just like an electric fence.

I used Mozilla with an installed app for downloading from YT.

I use Final Cut Pro, but there are other less sophisticated programs that will

allow almost anyone to create a frame by frame view.

A lesson from Dr. Judy Wood. When viewing these sorts of videos designed to tell you what is happening, turn the volume down and use your eyes and brain. What she saw on 9/11 NY wasn't a collapse. In spite of what the TV was repeating, she turned off the volume and used her brain, her voice, her Jiminy Cricket. That is what I do with all these sorts of videos. Then I turn up the volume.

The Nashville Bombing: A Purposeful Infrastructure Hit?

I live ~ 40 miles outside of downtown Nashville. Here are the direct effects the downed AT&T facility has/had on me. Christmas Day – no effect; Saturday Dec 26 – The Audi Connect internet connection on my vehicle was down, which means no Google Earth for Nav and no Web Info, CMAS alert on my flip phone stating that Bedford County 911 service was still down; Today Sunday Dec 27 – Vehicle Nav/Web system still down, Went down the street from my house and the Starbucks had a “Cash Only” sign up... They said it was due to the AT&T problem.

There's been a lot of discussion regarding hits on the infrastructure primarily related to Antifa/BLM/Socialist rhetoric over the last several months. But with our friend Klaus promoting a cyberpandemic, I'm thinking the plan is being implemented just as Event 201 preceded covid.

What's your take Catherine?

UPDATE ..Make Americans Free Again and Ohio Stands Up Lawsuit. Spiro Skouras interviews Pam Popper.

(31 mins) Pam gives the background of the Ohio lawsuit, what makes it unique, and now they have been joined by New Mexico. She puts this lawsuit into context with various other lawsuits, (many other efforts unsuccessful but very useful by learning what has not worked). She explains that other states must organize at grass roots level first, as financing is critical and inevitable. Start small & build on trusted personal and professional relationships. Urgent grassroots action encouraged. Citizens cannot sit back and wait for others to fix the problem. Every one of us has a responsibility to take action now in whatever way(s) we can. She says another important announcement to come in January.

1) Received an email from Medicare stating how the Pfizer vaccine has been FDA approved and more will be available soon. Actually it has not been “approved” by the FDA as stated at the bottom of the page of this fact sheet on the FDA website. They certainly have a way with words. Big difference.

<https://www.fda.gov/media/144414/download>

C

CAF Notes & Links:

In reply to C.

I have rarely seen so much fraud on one product launch. Unbelievable.

2) In reply to [Catherine Austin Fitts](#). (Carol)

Yes..it’s unbelievable. People are believing it is FDA approved when it clearly states no Covid 19 vaccine has been approved and licensed by the FDA. There is only “authorization” for emergency use. Where is the emergency? When I worked in clinical research as a study coordinator for many years, and applied for emergency use it was a last ditch effort to allow the use of the unapproved drug for a critically ill patient. And it was not an easy process despite the circumstances. We are part of a large experiment.

Question: (Ron)

Pfizer vaccine explained in software terminology:

<https://berthub.eu/articles/posts/reverse-engineering-source-code-of-the-biontech-pfizer-vaccine/>

https://twitter.com/powerdns_bert/status/1343141607185526785

Elon Musk: *“Vaccines are just the start. It is capable in theory of curing almost anything. Turns medicine into a software & simulation problem”*

Andrzej Bednarski says:

[December 21, 2020 at 4:29 pm Edit](#)

One item they discussed was the Democratic primary fix against Bernie sanders in 2016 and 2020.

it made me think, how big is this election rigging onion? we are focused on presidential candidates now, but if the ability to fix election exists, why stop there?

why not control state law initiatives which can have large national implications? here I am thinking of the California GMO labeling law several years back which DID NOT pass by a slim margin. if it did pass it would have been a disaster for GMO companies and the fact that it didn't defied

reason. why would Californians be in favor of NOT listing GMO ingredients? that's something the most left and right Californians would agree on.

if you can call anything which triggers the commerce clause a national security issue, than any local banking, financial, telecom, pharma, ag, energy initiatives would have to be monitored. that's a big deal to national and regional sovereignty. not only can you not choose your leaders but now you can't vote on laws which affect you.

it's a very deep issue. that's why I don't see Trump getting traction on this. the can of worms is too full.

While looking into some of his material, I came across this 2018 conference archive: <http://deepttruth.info/>

“The Left Forum, the largest leftist conference in the country, has a history of censoring views they do not support. In 2017, four of our five panels were banned. Our group responded by organizing a highly successful alternative conference we dubbed the “Left Out Forum. This year, 2018, all of our panels were banned, once again with zero explanation. Refusing to be silent, we created an alternative online conference for the weekend following the Left Forum and called it Deep Truth: Visionaries Speak Out.”

http://deepttruth.info/wp-content/uploads/2018/06/Talpiot-and-Unit-8200_-The-Global-Cyber-Agenda-for-Kill-Switch-Domination.pdf

“Those who won our independence believed that the final end of the State was to make men free to develop their faculties, and that, in its government, the deliberative forces should prevail over the arbitrary. They valued liberty both as an end, and as a means. They believed liberty to be the secret of happiness, and courage to be the secret of liberty. They believed that freedom to think as you will and to speak as you think are means indispensable to the discovery and spread of political truth; that, without free speech and assembly, discussion would be futile; that, with them, discussion affords ordinarily adequate protection against the dissemination of noxious doctrine; that the greatest menace to freedom is an inert people; that public discussion is a political duty, and that this should be a fundamental principle of the American government. They recognized the risks to which all human institutions are subject. But they knew that order cannot be secured merely through fear of punishment for its infraction; that it is hazardous to discourage thought, hope and imagination; that fear breeds repression; that

repression breeds hate; that hate menaces stable government; that the path of safety lies in the opportunity to discuss freely supposed grievances and proposed remedies, and that the fitting remedy for evil counsels is good ones. Believing in the power of reason as applied through public discussion, they eschewed silence coerced by law — the argument of force in its worst form. Recognizing the occasional tyrannies of governing majorities, they amended the Constitution so that free speech and assembly should be guaranteed.” – Justice Louis Brandeis Concurrence in Whitney v. Question: (Robert)

Howdy Catherine

As you cast your eyes to the heavens to observe the Junction on Dec 21 here is a song to listen to as you observe the two planets.

I grew up on a N.J. farm and there were many moonless nights I would look at the stars and wonder what it is all about.

On a night in early July 1967 as I was on ambush in Vietnam I looked up into the sky and had a mind shift on what I was observing and my relationship to the heavenly objects. I felt a connections, I felt as I belonged.

Here is the song: <https://www.youtube.com/watch?v=NDDrak6Rnwo&t=138s>

Yup. DOJ seized \$1 billion worth of Bitcoin and Amazon disappears books from Kindles. Zero integrity systems. More on the next Money & Markets.

Question: (R)

Regarding fires out West. I am still wondering what happened to the 50,000 in Paradise? The Butte County Drone images are haunting and IMO, another example of our deep misunderstanding of invisible emf weapons including these terribly addicting smartphones. They didn't burn every structure? I recall now these effects are non-self-quenching. I wonder if exposure to this non-self-quenching reaction will cause sickness to those who remain.

This is an important video:

From Cecelia Farber's website:

<https://www.thetruthbarrier.com/2020/09/12/shock-drone-footage-appears-to-contradict-global-warming-explanation-for-west-coast-fires/>

Butte County Drone Images: <https://buttecountyrecovers.org/drone-images/>
UGH!

Thanks Catherine.

A UK group has gathered some impressive resources offering solutions around local trading (focusing on shop-owners who are “awake”), the money point, and keeping shops open during lockdowns (and providing support if they run into legal trouble). Working on bringing this to Canada. If you have 1hr 25mins, I’d appreciate your thoughts on this video. Thank you!

Some interesting stories today about cyber attacks. We are (hopefully) aware of Klaus Schwab's book "The Great Reset" and his mentioning of cyberattack being 'the next pandemic'... and now we see weaponized malware stolen from cybersecurity company FireEye (they call it, "red team tools" lol) coupled with a pervasive trojan backdoor insertion through a compromised SolarWinds update.

Here are some related articles:

<https://www.newsweek.com/solarwinds-hack-customer-list-suspected-russian-cyberattack-1554467>

<https://www.fireeye.com/blog/products-and-services/2020/12/fireeye-shares-details-of-recent-cyber-attack-actions-to-protect-community.html>

Catherine – would love to hear more on this!

I don't have any good intelligence on this one yet. As a practical matter, Schwab is irrelevant. He is a flackcatcher. What is true is that the systems have no integrity, which is why the CBDC effort is going to get beyond interesting.

The latest from Kevin Kiley & California's Governor Newsom Recall.....
(Petition signatures increasing but many more needed).

<https://blog.electkevinkiley.com/the-mushrooming-newsom-recall/>

H says: (in reply to Ann)

[December 14, 2020 at 8:10 pm Edit](#)

I was gonna sign the recall petition until I read the text
(<https://recallgavin2020.com/petition>). Not a word about state of emergency,
lockdown etc. It's about taxes, homelessness, immigration, water rationing,
death penalty, parental rights. I understand the petition was started before
Covid1984 rolled out.

Catherine Austin Fitts says:

[December 14, 2020 at 1:20 pm Edit](#)

Excellent piece. Their team wrote it entirely. My impression is they solicited
input from a wide number of people in their network to bring together all the
pieces. We have been sharing all of our materials with them, including the

State of Our Currencies, and swapping stories back and forth in the search for answers for many months. Good example of gathering the intelligence networks to search out the larger patterns.

This really is a must read. We will post an intro commentary as I did not realize it had gone up.

Question:

RS says:

[December 14, 2020 at 5:12 am Edit](#)

To my horror, I have discovered that Professor Fourtillan's imprisonment is not an isolated case. Several years ago, Jean-Louis Caccamo, professor of Economics at the University of Perpignan denounced the practice of accepting bribes for registering unqualified Chinese students in certain subjects. Professors were offered 5000 euros per student; they invoiced the university for 500 euros and put the remaining 4500 euros in their own pockets.

Professor Caccamo's reward for not adhering to the code of silence regarding fake degrees: in 2013 he was locked up in a psychiatric hospital for three years.

Professor Caccamo's autobiography appeared in November, 2020:

LE RESCAPÉ DE L'ÂME: Une descente au enfers face a la dérive totalitaire

de l'université et de la santé mentale en France

<https://www.amazon.fr/RESCAP%C3%89-L%C3%82ME-descente-totalitaire-luniversit%C3%A9-ebook/dp/B08MQW7YJV/>

Book blurb:

[my English translation] Reality often exceeds fiction. That's why others tend not to believe you when you tell the truth, but are ready to accept all sorts of guru pronouncements at face value. I've learned in my career as an economist, as well as in my personal life, that when people are told the truth, they tend to close their eyes and prefer to cling to the lies that provide reassuring support for their illusions. Fear of other people's judgment makes us hypocrites, or even liars.

[French Original] La réalité dépasse souvent la fiction. C'est la raison pour laquelle les autres ont tendance à ne pas vous croire quand vous dites la vérité alors qu'ils vont prendre pour argent comptant les boniments des gourous en tout genre. J'ai appris, dans ma carrière d'économiste, comme dans ma vie personnelle, que lorsque l'on dit la vérité aux gens, ils ont tendance à fermer les yeux et ils préfèrent s'accrocher aux mensonges qui confortent leurs illusions. La peur du jugement des autres nous rend hypocrite, pour ne pas dire menteur.

Sorry to fill the comments with tangential matters, but for the sake of Professor Fourtillan, I felt it urgent to make these sordid matters better known.

CAF Notes & Links:

Catherine Austin Fitts says:

[December 14, 2020 at 5:23 am Edit](#)

Not tangential at all. Fake scientists reign when scientists of integrity can be threatened in this manner.

Question:

Four French highly-regarded medical mavericks with decades of experience. They are, alas, not so well known outside of their country and are subject to intense attacks from their colleagues, government pressure and constant media smears:

1. Professor Didier Raoult (bacteriologist) is known for his promotion of hydroxychloroquine and azithromycin as a COVID treatment (hundreds of patients in Marseille successfully treated). He wears a short beard and long hair, supposedly to piss off his establishment colleagues.

(in English) <https://www.youtube.com/watch?v=uy1cPT1ztko>

2. Professor Christian Perronne

Vice-president of the European Advisory Group of Experts on Immunisation (WHO advisors) and

Chief of department of infectious diseases at the Raymond Poincaré University Hospital in Garches.

(four part interview, in English) <https://youtu.be/zF-wZrQAArg>

3. Alexandra Henrion-Caude, geneticist and director of scientific research at INSERM

AHC points out the totally disproportionate reaction to the C-19 crisis

(in English) <https://theemfguy.com/covid-opinions-henrion-caude/>

(in French) <https://youtu.be/lvO5LN3Wx44>

4. Professor Jean-Bernard Fourtillan is one more of these

(in French) <https://odysee.com/AgoraTVNEWS:5/fourtillan-neutralis:e>

“Un coupable puni est un exemple pour la canaille ; un innocent condamné est l’affaire de tous les honnêtes gens.” “When punished, a guilty man serves as an example for lowlives; when condemned, an innocent man is the business of all honest people.” (Jean de La Bruyère, 16 August 1645 – 11 May 1696)

Question:

Dear Catherine,

My understanding was Flynn was hated by the Obama administration because he was openly opposed to the Iran deal. I guess he didn’t think dropping palates of cash at their airport was a good idea. Here are his latest remarks:

<https://news.yahoo.com/1st-public-remarks-since-pardon-192302516.html>

As of today I read that Sidney Powell is bringing a RICO case. Maybe she read the Gideon story in the Bible too?

I'm not sure what other avenues he is referring to, but one thing is for sure. The nation will be divided no matter what happens now. It's hard to be optimistic about any of the outcomes.

Hope you have a nice Christmas celebration,

J

Take Action

Question:

Hi Catherine, Keep being you!!!

Below is great post from one of the leaders in Permaculture movement. If you have not looked into permaculture encourage you to look at it is a growing solution based, decentralized way to make the world a better place. It is one of few voices that humans actually make the world a better place!

Gert is a way of life and to me Gert is a way to starve Mr. Global. If we can create a thousands of Gerts and starts to grow we can really make this earth a better place

<https://permies.com/t/gert>

CAF Notes & Links

Question:

Catherine,

The pen may not be mightier than the sword but it's far more effective.

Which is to say, words count.

To wit: laws, contracts, prayers and, especially, the Constitution are nothing but words. But our lives depend on words, don't they? You're guilty; you're free; you're married; you're divorced; you're a citizen; you're my mother or my father or my child or my neighbor or my friend: words count.

If it proves to be true that there was voter fraud on the scale suggested, I propose that we breathe new life into the word *treason* and use it to resuscitate our liberties.

Treason is such an important word that it is specifically defined in the Constitution to mean an attempt to overthrow the government. If the facts related to widespread voter fraud cohere, what else are we talking about but treason?

I see that the sheriffs are beginning to stand up: proof for the existence of God, if you need it.

Let's the rest of us stand up, too, with one word on our tongues in the form of a question - treason?

Watch how fast a ship can turn when the passengers discover that the captain had been steering treason.

Warm regards, always.

Doc, K
