Healthy 39-year-old goes into full liver failure within hours of shot

SALT LAKE CITY (KUTV) — During a KUTV investigation into COVID-19 vaccine side effects and where to report them, we found four reported deaths, filed by Utah families and their caregivers to the CDC’s Vaccine Adverse Effects Reporting System.

One case stood out, a 39-year-old single mom from Ogden who died four days after her second dose of the Moderna COVID-19 vaccine. Her family, who is now waiting on an autopsy, held a celebration of life for her this past weekend.

Kassidi Kurill, by all accounts, was healthy, happy and “had more energy” than just about anyone else around her. Her family told 2News she had no known health problems or pre-existing conditions.

Four days after Kurill’s second dose of the COVID-19 vaccine, she was gone — dead before most of her family could say their goodbyes.

“She came in early and said her heart was racing and she felt like she need to get to the emergency room,” Hawley said.

“They did a blood test and immediately came back and said she was very, very sick, and her liver was not functioning,” Hawley said.

Kurill was flown to Intermountain Medical Center in Murray, a trauma center where they had the ability to do transplants if needed. Her liver was failing and a transplant, doctors believed, was her best option at survival.

She died, he said, 30 hours after they arrived in the emergency room.
Two healthy 28-year-olds die within days of shot

Sara Stickles had an aneurysm just five days after the second dose of the Pfizer COVID-19 vaccine. She was a health care worker and just began a position at Swedish American Hospital in Wisconsin. She leaves behind a young son.

Haley Link Brinkmeyer, 28, passed away on Thursday, January 21, 2021, with a competitive spirit and played soccer, softball, and basketball. Her coaches had a strong impact on her life, they were like family to her. She graduated from the University of Evansville in 2018 with a doctorate in physical therapy and was a member of AOII Sorority and participated in the Buddy Program. She worked at North River Health Campus.

Just five days after the second dose of the Pfizer COVID-19 vaccine, perfectly healthy 28-year-old health care worker Sara Stickles had an aneurysm. “Today around 1:45 she had what looks like a brain aneurysm and is in a very deep coma,” wrote her twin sister Kara Stickles. Sara, who was a health care worker and just began a position at Swedish American Hospital in Wisconsin, remained on life support before passing away. She leaves behind a young son.
More deaths within minutes / hours of vaccine

Gloucester resident dies within hours of receiving Pfizer vaccine

58-year-old Gloucester resident Drene Keyes was a gifted singer, a mother and grandmother of six. Unexpectedly, Lisa lost her mother on Saturday within a couple of hours after Keyes received the Pfizer vaccine in Warsaw.

"Right before she left, I was helping her put her shoes on," she said.

Keyes had diabetes, sleep apnea and was obese. Her job made her eligible for the first dose. So, on Saturday, Keyes got the Pfizer vaccine and spent 15 minutes in the mandatory observation period.

The coworker she was with said she was trying to get to the car and said, "Something is not right. Something's not right."

She was quickly rushed to RiverShore Lappanannock Hospital.

"They tried to remove fluid from her lungs. They called it 'flash pulmonary edema,' and doctors told me that it can be caused by anaphylaxis," said Jones. "The doctor told me that often during anaphylaxis, chemicals are released inside of a person's body and can cause this to happen."

Jones believes more research needs to be done, especially for those with underlying health issues.

"Why are we allowing people with underlying conditions to be guinea pigs for a vaccine that is still in clinical trials and emergency use?" Jones questioned.

The family was denied an autopsy by public health officials

NY man dies shortly after vaccination

NEW YORK - A man died shortly after receiving a COVID-19 vaccination at the Javits Center in Manhattan but it was not believed to be due to an allergic reaction, state officials say.

The man, in his 70s, collapsed as he was leaving the vaccination site on Sunday morning.

"On-site security and first responders were by his side within seconds, but sadly the man passed away a short time later at a hospital," New York State health Commissioner Howard Zucker said in a statement to Fox5NY.com.

The incident occurred approximately 25 minutes after he was vaccinated, and following the required 15 minute observation period.

CA woman, 78, gets COVID-19 vaccine, then suddenly dies of something else ???

The woman "passed away unexpectedly" Friday after receiving Pfizer’s version of the Covid-19 vaccine about noon at the Kaiser-run site at Cal Poly Pomona, 30 miles east of downtown Los Angeles, the doctor said.

"While seated in the observation area after the injection, the patient complained of feeling discomfort and while being evaluated by medical personnel, she lost consciousness," he said. "Paramedics on scene began CPR almost immediately and continued, but she ultimately could not be revived.

She required CPR within 15 minutes of shot but media claims her death was not related to vaccine (without evidence or autopsy results)
Healthy 68 year-old dies within 24 hours of shot

March 23 - gets shot  March 24 - dead

EFFINGHAM, Kan. (KSNT) – An obituary posted online Wednesday night states that a Kansas woman died after a reaction to the coronavirus vaccine, according to KSNT News.

The first line of Jeanie Evans’ obituary states, “Jeanie M. Evans, 68, of Effingham, Kansas died unexpectedly on Wednesday, March 24, 2021, at the Stormont-Vail Hospital from a reaction to the Covid vaccine.”

Evans received her shot the day before her death in Ozawkie at the Keystone Early Learning Center.

Once she started experiencing a reaction to the vaccine, Evans was taken by ambulance to Topeka’s Stormont Vail Hospital.

Evans was pronounced dead at the hospital, a day after receiving her first COVID-19 shot.

The Kansas Department of Health and Environment confirmed it is investigating the death alongside federal partners.

Obituary

Jeanie M. Evans, 68, of Effingham, Kansas died unexpectedly on Wednesday, March 24, 2021 at the Stormont-Vail Hospital from a reaction to the Covid vaccine.

Memorial services will be held at 2:00 pm on Monday, March 29th, 2021 at the Becker-Dyer-Stanton Funeral Home, Atchison. A visitation with family will be from 1:00 pm on Monday until time of service at the funeral home. Memorial contributions may be made to the Atchison Animal Sanctuary in care of the funeral home.
At least 19 volunteers in the 2 trials died... many more are dying as the global rollout begins.
There are now numerous deaths linked to the COVID vaccine. This doctor would have had a 99.5% chance of surviving COVID but he died from ITP (vaccine reaction).

Death of Florida doctor after receiving COVID-19 vaccine under investigation

Karen Weintraub  USA TODAY
Published 9:13 p.m. ET Jan. 6, 2021 | Updated 9:29 a.m. ET Jan. 7, 2021

A Florida doctor has died several weeks after receiving a COVID-19 vaccine, although it's not yet clear whether his death Monday was related to the shot he received on Dec. 18.

Dr. Gregory Michael, 56, an OB-GYN at Mount Sinai Medical Center in Miami Beach, died after suffering a hemorrhagic stroke apparently resulting from a lack of platelets.

In a Facebook post, Michael's wife, Heidi Neckelmann, said he sought emergency care three days after the shot because he had dots on his skin that indicated internal bleeding.

The love of my life, my husband Gregory Michael MD, an Obstetrician that had his office in Mount Sinai Medical Center in Miami Beach. Died the day before yesterday due to a strong reaction to the COVID vaccine.

He was a very healthy 56 year old, loved by everyone in the community, delivered hundreds of healthy babies and worked tirelessly through the pandemic.

He was vaccinated with the Pfizer vaccine at MSMC on December 18, 3 days later he saw a strong set of petechiae on his feet and hands which made him seek attention at the emergency room at MSMC. The CBC that was done at his arrival showed his platelet count to be 0 (A normal platelet count ranges from 150,000 to 450,000 platelets per microliter of blood.) he was admitted in the ICU with a diagnosis of acute ITP caused by a reaction to the COVID vaccine. A team of expert doctors tried for 2 weeks to raise his platelet count to no avail. Experts from all over the country were involved in his care. No matter what they did, the platelets count refused to go up. He was conscious and energetic through the whole process but 2 days before a last resort surgery, he got a hemorrhagic stroke caused by the lack of platelets that took his life in a matter of minutes.

I believe that people should be aware that side effects can happened, that it is not good for everyone and in this case destroyed a beautiful life, a perfect family, and has affected so many people in the community.

Do not let his death be in vain please save more lives by making this information news.

Johns Hopkins Scientist: ‘A Medical Certainty’ Pfizer Vaccine Caused Death of Florida Doctor

Dr. Jerry L. Spivak, an expert on blood disorders at Johns Hopkins University, told the New York Times Tuesday that he believes “it is a medical certainty” that Pfizer’s COVID vaccine caused the death of Dr. Gregory Michael.

Autoimmune means that something in the vaccine may be provoking the body to create antibodies to its own platelets, could be because of molecular mimicry, or cross reactivity between proteins.

ITP has been documented to occur after the MMR vaccine, as well as influenza vaccines, DTP vaccine and hepatitis A vaccines.
Why was no one warned that immune thrombocytopenia is a reaction to the COVID vaccine?

The New York Times
A Few Covid Vaccine Recipients Developed a Rare Blood Disorder

By Denise Grady
Feb. 8, 2021 Updated 9:07 p.m. ET

One day after receiving her first dose of Moderna’s Covid vaccine, Luz Legaspi, 72, woke up with bruises on her arms and legs, and blisters that bled inside her mouth.

She was hospitalized in New York City that day, Jan. 19, with a severe case of immune thrombocytopenia — a lack of platelets, a blood component essential for clotting.

The same condition led to the death in January of Dr. Gregory Michael, 56, an obstetrician in Miami Beach whose symptoms appeared three days after he received the Pfizer-BioNTech vaccine. Treatments failed to restore his platelets, and after two weeks in the hospital he died from a brain hemorrhage.

“I think it is possible that there is an association,” Dr. James Bussel, a hematologist and professor emeritus at Weill Cornell Medicine who has written more than 300 scientific articles on the platelet disorder, said in an interview. “I’m assuming there’s something that made the people who developed thrombocytopenia susceptible, given what a tiny percentage of recipients they are.”

He added: “Having it happen after a vaccine is well-known and has been seen with many other vaccines. Why it happens, we don’t know.”

Ms. Legaspi was strong and in good health before receiving the Moderna vaccine. But when she was admitted to the city hospital in Elmhurst, Queens, her platelet count was zero. Normal readings range from 150,000 to 450,000, and anything under 10,000 is considered very dangerous and in urgent need of treatment.

Doctors ordered Ms. Legaspi to not even get out of bed without help, for fear that if she fell and injured herself she could hemorrhage. They began giving her the standard treatments, including platelet transfusions along with steroids and immune globulins meant to stop her immune system’s war on her platelets.

Nothing worked. Her platelets would rise a bit and then crash again between treatments.

As the days passed with no progress, Ms. Legaspi’s daughter, aware of Dr. Michael’s death, worried increasingly that her mother would suffer a brain hemorrhage.

“I don’t think she understands she’s like a ticking bomb,” the daughter said in an interview on Jan. 28, after her mother had been in the hospital for more than week with no improvement. “I don’t use the term. I don’t want to tell her that.”

Another vaccine recipient, Sarah C., 48, a teacher in Arlington, Tex., received the Moderna vaccine on Jan. 3. She asked that her full name not be used to protect her privacy.

Two weeks later, she began to have heavy vaginal bleeding. After two days she saw her obstetrician, who ordered blood work and scheduled other tests. A few hours later, he called and urged her to go straight to the emergency room. He was stunned and hoped it was a lab error, but her blood count showed zero platelets. She had had a checkup with completely normal blood-test results less than a week before being vaccinated.

The reading of zero platelets was not a lab error. The results were confirmed in the emergency room, and doctors there also noticed red spots on her wrists and ankles, caused by hemorrhages under the skin. Sarah C. had seen the spots, but ignored them.

She spent four days in the hospital, receiving platelet transfusions, immune globulins and steroids to restore her platelet count.

She described the experience as terrifying. “Especially when people say they’d never seen this before, that you could bleed out or hemorrhage,” she said. “That was the biggest concern, and just not knowing. The gentleman in Florida, he didn’t make it. Certainly the fear was there.”

If she had known enough to recognize the red spots and bleeding as danger signs, she said, she would have gone to the emergency room much sooner.

Health care worker dies after second dose of COVID vaccine, investigations underway

Tim Zook’s last post on Facebook brimmed with optimism. “Never been so excited to get a shot before,” he wrote on Jan. 5, above a photo of the Band-Aid on his arm and his COVID-19 vaccination card. “I am now fully vaccinated after receiving my 2nd Pfizer dose.”

Zook, 60, was an X-ray technologist at South Coast Global Medical Center in Santa Ana. A couple of hours later, he had an upset stomach and trouble breathing. By 3:30 p.m. it was so bad his colleagues at work walked him to the emergency room. “Should I be worried?” his wife, Rochelle, texted when she got the news. “No, absolutely not,” he texted back. “Do you think this is a direct result of the vaccine?” she typed. “No, no,” he said. “I’m not sure what. But don’t worry.”

There were suspicions of COVID and a diagnosis of congestive heart failure. Zook was put on oxygen, then — just four hours later — a BiPAP machine to help push air into the lungs. Multiple tests came back negative for COVID.

Shortly after midnight on Jan. 7, the hospital called. Zook was in a medically induced coma and on a ventilator to help him breathe. But his blood pressure soon dropped and he was transferred to UC Irvine Medical Center. “On Friday I get a call, ‘His kidneys are failing. He needs to be on dialysis. If not, he could die — but there’s also a chance he might have a heart attack or stroke on dialysis because his blood pressure is so low,’” Rochelle Zook said.

By 4 a.m. Saturday, Jan. 9, Zook had gone “code blue” twice and was snatched back from the brink of death. There was a third code blue in the afternoon. “They said if he went code blue a fourth time, he’d have brain damage and be a vegetable if he survives,” Rochelle Zook said.

Later that day, Tim Zook died.
There are now numerous deaths linked to the COVID vaccine. Will employers accept liability for their front-line workers' deaths if they require the shot in order to work?

39-year-old nurse aide dies 'within 48 hours' of receiving mandated COVID-19 shot

HURON, Ohio, January 27, 2021 (LifeSiteNews) — A 39-year-old woman with no known comorbidities died unexpectedly in northern Ohio within 48 hours of receiving a COVID-19 vaccine, which was reportedly required by her employer.

Janet L. Moore, a nurse aide at Admirals Pointe Nursing Home (APNH) in Huron, was found unresponsive in her car outside her apartment complex on December 31 around 8:00 p.m., her brother Jacob Gregory told LifeSiteNews.

“She was coming home from work and as soon as she drove into her parking lot she passed away,” he said. “According to her neighbors she wasn’t feeling good directly after the vaccine, and then ever since the vaccine she was actually feeling nauseated, she said she would have like migraines and stuff like that. And then, within 48 hours, she ended up passing away.”

Gregory mentioned that his deceased sister, a mother of two sons, was required to receive this vaccine due to her nursing home employment.

A nursing home in Janesville, Wisconsin, which mandated their employees receive these experimental biological agents did in fact lay off workers who declined the injections.

Nearly a dozen employees were forced from their jobs due to the policy, and 27 wrote letters of complaint seeking to have the policy changed.

Their concerns included how this biological agent, which was rushed through development and testing, may have dangerous, unknown long-term effects, while others expressed worries about its affecting their pregnancy or fertility.

More generally they objected to being told they had to take a vaccine which was not approved by the Food and Drug Administration (FDA). While these vaccines have been given emergency use authorization by the FDA, neither has the full approval of the agency.

The U.K. government issued a 10-page report late last year that warned coronavirus vaccines should not be used by pregnant or breastfeeding mothers. With regard to their impact on fertility, the document simply states it is “unknown whether COVID-19 mRNA Vaccine BNT162b2 has an impact on fertility.”

Safety concerns with these vaccines also include “allergic” and “potentially fatal reactions,” that they may actually cause an increased vulnerability to the virus, and that, indeed, worries over long-term effects remain legitimate as these vaccines lack proper testing.

In addition, the FDA also drew up a document this fall listing the possible side-effects from a COVID-19 vaccine, including strokes, encephalitis, auto-immune disease, birth defects, Kawasaki disease, and death.

Auburn Woman Warns Grandfather’s Aid Die After COVID Vaccine

AUBURN (CBS13) - The Placer County Sheriff's Office announced Saturday that a person tested positive for the virus in late December and died after getting the vaccine on Thursday.

Now, there are questions from the community on the safety of the vaccine. An Auburn woman says she witnessed the tragedy first hand.

In a post on Facebook, she said she saw her grandfather’s aid, a 56-year-old man, get the vaccine at a senior living facility on Thursday.

“Twenty minutes later he realized his legs felt tingly and he was having shortness of breath. He was wheeled out in an ambulance... 1 hour later he was in ICU on a ventilator and three hours later he passed away,” she wrote.

Two nurses have lost their lives after receiving Pfizer vaccine

The death of the two nurses in Norway, who have taken the vaccine to end the world-wide coronavirus is alarming.

After receiving the Pfizer-BioNTech vaccine, they died suddenly within 48 hours. The Medical Director of the Norwegian Agency, the Norwegian National Institute of Public Health, has started an investigation.
Regardless of the manufacturer, deaths are happening around the world

Italia opens manslaughter case after teacher dies hours after getting AstraZeneca vaccine

By Lee Brown

March 16, 2021 | 8:32am

Prosecutors in Italy have launched a manslaughter investigation after a music teacher there died hours after getting the controversial AstraZeneca COVID-19 vaccine.

**Mexico News Daily**

Hidalgo woman, 75, dies 40 minutes after receiving Covid vaccination

Several media outlets reported that the woman died 15 minutes after receiving a dose of the Chinese-made Sinovac at a vaccination center in Metepec but the federal Health Ministry said that she passed away 40 minutes after inoculation.

According to the newspaper Milenio, the woman began to feel weak minutes after receiving the vaccine and fainted when she got up to go to the washroom. She was taken to an IMSS clinic in Metepec but was dead on arrival.

Nurse dies in Georgia after being vaccinated with AstraZeneca

Bakradze was vaccinated on March 18 at 12:15 (local time), and then gave an interview to a local media stating that "vaccines are needed, we are powerless against the virus, we must vaccinate ourselves to avoid diseases or not get seriously ill. Although people are afraid, there is nothing dangerous about getting vaccinated. I urge everyone to get vaccinated."

The day after receiving the injection with the AstraZeneca, the young nurse fell into a coma in a hospital in the Georgian city of Ajaltsije, and despite the fact that that night had stabilized, this Friday her heart stopped and the doctors were unable to revive her.
Four prominent medical personnel deaths in Italy

Aversa, a 45-year-old doctor died of cardiac arrest. "He had the vaccine"

On social media, some users have talked about the relationship between the vaccine and the doctor’s death

Dr. Mauro Valeriano D'Auria, a specialist gastroenterologist in service at the Umberto I Hospital of Nocera Inferiore, died prematurely, struck at 45 by a cardiac arrest after a tennis match. D'Auria, as local newspapers write, was a doctor highly esteemed by colleagues and patients, a professional active especially in the field of intestinal ultrasound. Among the latest messages from Dr. D'Auria on his social page, the convinced adhesion to the vaccination campaign to defeat Coronavirus forever.

Pharmacist gets vaccinated and dies

A 49-year-old pharmacist, Miriam Gabriela Godoy, from Porto Corsini, a seaside resort on the Romagna Riviera, died last Wednesday after receiving the anti-Covid vaccine. The Resto del Carlino and Ravenna News report it explaining how the woman died of an illness.

The pharmacist had been vaccinated on January 14th. The next day she went to work at the pharmacy and felt ill. Urgently transported to the Bufalini hospital in Cesena, the lady died a few days later, Wednesday 20 January.

The woman, who leaves 4 children, was not performed any autopsy to ascertain the real causes of death. Among the colleagues - writes the Carlino - in recent days someone has

Nurse dies in her sleep in Frosinone: "Natural causes", but she had been vaccinated

All the media write that Elisabeth Durazzo, the young nurse on duty at the "Fabrizio Spaziani" hospital in Frosinone, suddenly died in her sleep, one of the first hospitals in Lazio that between the end of December and the beginning of January all health personnel underwent a massive vaccination against Covid.

Pfizer’s first five ‘Comirnaty’ vaccines were administered on December 29 in the presence of the governor of Lazio Nicola Zingaretti and the councilor for Health Alessio D’Amato, then in the following days it was the turn of all the other health professionals, including doctors and nurses.

About ten days after the end of vaccinations, on January 13, Eli Durazzo, 39, with a small son, according to the media, died in sleep of cardiac arrest.

Another nurse dies in his sleep. "Heart attack". He had taken the second dose of the vaccine

Another young nurse, Luigi Buttazzoo, an operating room instrumentalist at the Tor Vergata Polyclinic in Rome, died in his sleep, probably struck by a heart attack, as some media, including Repubblica, write.

The nurse, 42, passed away a few days ago after receiving the second dose of Pfizer-Biontech’s “Comirnaty” vaccine, the so-called booster.
Why has Facebook temporarily blocked all searches using @irelandeasthospitalgroup (which owns & manages Wexford General)

DR KESHAV Sharma, son of late Chief Justice Satnarine Sharma, has died. Details of his death are not yet known and relatives are awaiting the results of an autopsy since he was not ailing.

Doctor Kershav Sharma a respiratory consultant who practiced in Wexford hospital took the vaccine on Tuesday 5th of January 2021.

Young Wexford respiratory consultant dies suddenly

By Peter Doyle  16th January 2021

The son of a former Trinidad and Tobago Chief Justice was only 39 years old. Tributes have been paid to a young respiratory consultant who died suddenly.

Dr Keshav Sharma was 39 years of age when he passed away last week (January 11), three days after his birthday.

He was a consultant respiratory and general medical physician at Wexford General Hospital (WGH).

A spokesperson for the Ireland East Hospital Group has confirmed to Irish Medical Times that the death was not related to Covid-19.

Facebook moved quickly to 'debunk' anyone claiming a correlation, even prior to any autopsy. They also blocked any searches for posts tagged with the hospital group's @ name.
Dr. Rogiwiwicz posted his shot on YouTube while joking about 5G and Bill Gates - he passed 20 days after 2nd shot

Feb 12 posted "got first jab"  Died within 48 hours

Yay! Just had my 1st jab (are we supposed to be this excited about being stabbed in the arm?) 😄😄

Feb 20 got second shot  Full term fetus died within 48 hours

I am scheduled to be induced on Wednesday evening if he hasn't arrived by then!

It’s crazy. This time last year we were exactly 2 weeks away from beginning our journey with IVF. Now our precious babe is about to make his entrance into the world. It is not lost on me how incredibly lucky we are that the process moved so quickly and smoothly for us. A lot of couples don’t have the pleasure of that same outcome.

Motherhood is going to amazing and I’m 100% sure it’s going to be more different than I can even imagine. We’re as ready as we can be, though!

Not sure if this is allowed... I don't have the energy to read the rules as I'm currently 12 hours into induced labor with my precious baby who is no longer living.

My dream of becoming a mother came true 9 months ago after 2 years battling infertility and a successful go with IVF. And it was ripped away from me in the blink of an eye at 9am this morning.

Part of that dream into motherhood was breastfeeding. And so I'm reaching out to find out if any other mamas have experienced a loss of this magnitude and then gone on to pump for the purpose of donating their milk?

Roni Sisk has been the beloved Director of Nursing at Princeton
for a couple of years & has worked in the healthcare community
for many years. The Princeton team & greater ClearView family
woke up today to learn the devastating news that Roni passed
away, very unexpectedly, early this morning (2.16.21). She was
only in her mid 40's. She had a husband, children (young & adult),
Benjamin Goodman went to a Walgreens pop-up COVID-19 “vaccine” clinic in Chelsea, New York on Saturday, March 13. He received the Johnson & Johnson shot, according to his stepmother Pamela Goodman. Benjamin texted his father, Jeff Goodman, and told him he received the shot. Benjamin had a severe headache and started feeling ill. He fell asleep, hoping the symptoms would pass after some rest. Mr. Goodman woke up at 1 a.m. with a high fever and chills. His fiancée, Lindsay Janisse, was awakened to Mr. Goodman having seizures at 4 a.m. Ms. Janisse called 911 as Mr. Goodman went into cardiac arrest. Paramedics tried, unsuccessfully, to revive him on the scene. Mr. Goodman was rushed to a nearby Mount Sinai Hospital. But he was pronounced dead at 6:05 a.m. Sunday morning, March 14.

It is with deep sadness we announce the passing of Ben Goodman, age 32, who died suddenly due to heart failure on March 14, 2021 in New York City. Ben is survived by his fiancée, Lindsay Janisse, his mother Cindy Shelley, his father and stepmother Jeff and Pamela Goodman, his brothers Andrew Shelley and Carson Goodman, his sister Natasha Goodman, his dogs Kiva and Wilson, and his many beloved colleagues and friends. Born on March 8, 1989 in Manhattan, Ben graduated from Northport High School in June of 2007 and received a Bachelor’s degree in International Business from Florida Atlantic University in December 2014. In March of 2021, he was accepted into Michigan State University’s MBA program and had plans to enroll to further his education in Business. Ben and the love of his life, Lindsay Janisse,

Report: Marvelous Marvin Hagler, one of boxing's legendary Four Kings, dies 'unexpectedly' at 66

Larry King, Legendary Journalist and Radio Host, Dies at 87

"With profound sadness, Ora Media announces the death of our co-founder, host, and friend Larry King, who passed away this morning at age 87 at Cedars-Sinai Medical Center in Los Angeles," read a post shared on King’s Twitter account Saturday. A cause of death was not given. King’s death comes weeks after he was hospitalized with COVID-19.

Sat, March 13, 2021

Dave Jordan-TV @... · Jan 15
I just wrapped an interview with my friend Larry King Jr. He tells me his dad @kingthings is expected to fully recover from #Covid19 & will receive the vaccine before he is released from the hospital. FYI: #LarryKing

less than 1 week between vaccine and death though vaccine status is heresay.
Miscarriages within days of shot

Saturday 2.20.21

Megan B. is with

41 weeks today and I’m officially fully vaccinated with the Pfizer vaccine! Clearly, I wanted to be born to a fully vaccinated mama! 🌱 🌱

I am scheduled to be induced on Wednesday evening if he hasn’t arrived by then!

It’s crazy. This time last year we were exactly 2 weeks away from beginning our journey with IVF. Now our precious babe is about to make his entrance into the world. It is not lost on me how incredibly lucky we are Monday 2.22.21

Megan B. asked a question

Not sure if this is allowed... I don’t have the energy to read the rules as I’m currently 12 hours into induced labor with my precious baby who is no longer living.

My dream of becoming a mother came true 9 months ago after 2 years battling infertility and a successful go with IVF. And it was ripped away from me in the blink of an eye at 9am this morning.

Part of that dream into motherhood was breastfeeding. And so I’m reaching out to find out if

Diane Wheat-Stephenson

My friends sister was so excited to be 34 weeks and to be “allowed” to get her Covid vaccine to protect her and her baby. Her baby passed away pre-birth 48 hours later.

They are still waiting on autopsy results.

Hi all- wondering if there is anyone out there experiencing the same thing. Had my water break Sunday at 33wks.

Turns out there are 3 other women that were admitted this week with the same issue. And all 3 of us got our second COVID vaccine less than a week before our water broke. Has anyone else experienced this or are currently? Just curious!

Sharing in hopes of saving someone else's life...
My dad died 72 hrs after receiving the Moderna jab. He was 75. He was not in perfect health, but was living a normal, productive life, cutting almost 20 acres of property, eating healthy, hanging out with his friends, golfing, and was supposed to leave for a 6 week vacation w my mom next week.
He got the shot on Tuesday about 11:50am. He spent the afternoon hanging out with friends (had a few cocktails) and then cut grass for a couple hrs. That evening he was feeling achy and tired.
Within 24 hrs his symptoms included nausea, vomiting, diarrhea, anorexia, back pain, dizziness, poor color, and fatigue. This continued for 2 days. He tried to drink water and stay hydrated, he was not able to eat. Thursday night he had extreme diarrhea. We also noticed he was having trouble picking up his feet to walk, he was shuffling his feet and unstable. He did not say anything to us, he thought he had a stomach bug.
He had some OJ Friday morning. My mom left to run errands and when she came home at lunchtime, she found my dad, he was already gone.
Basically, he was sick within hrs of the jab and dead in 72 hrs post jab. Not a coincidence.

Julie Marie Christensen

Jerry and I experienced the sudden tragic loss of my mother. She lost her ability to walk, stand, move, talk, eat, drink, and breathe following the Covid-19 vaccine. Her death happened so fast. I'm devastated, and I wasn't sure how to share this shocking news. This is my mother's experience, not a subject of debate anti or pro this or that. It is what has happened to my mother. Norway has stopped offering the vaccine to people 80 or over after sudden deaths post-vaccination. My mother was exactly one month from her 80th birthday, had no underlying health conditions, and like a light switch, became unresponsive.

Kaci Wright » COVID-19 Vaccine Side Effects

This is my FIL 12/31/2020, first in line at a SNF, for the first dose of Pfizer. He was there for physical therapy rehab and had no "skilled nursing needs" or underlying disease process. #2ndose was 1/20/2021, and he was scheduled for discharge to Assisted Living 1/29/2021. He passed away 1/22/2021. He wasn't the same after dose 1.

Emma Carter is with Charlotte Carter and Sylvia Robinson.

Please please everyone be cautious with your loved ones who are having the Covid 19 vaccine. We are still waiting for the post mortem for my mum but I am CONVINCED that she had a reaction to it. She was fine and well Saturday after having the vaccine at 11:20 she started feeling unwell shivering and dizzy Saturday night. Went to bed 8pm and never woke up. Please please warn your loved ones.
Get them to question how it reacts to other medication. I'll never know the truth but I'm utterly convinced that's why my wonderful mum has left us so suddenly. Please don't let this hell We are in impact your life also 😞😞

Macomb County man, 90, dies after COVID-19 vaccine

Daniel Thayne Simpson, a retired accountant from Chesterfield Township who served in the Navy during the Korean War, got his first dose of the Moderna COVID-19 vaccine on Feb. 3.

The next day, Simpson, 90, was dead.

"He told my brother he was getting it and he had a sticker showing that he got it," William Simpson of Ann Arbor told the Free Press. But then, he stopped answering phone calls.

"We were assuming he felt tired or something and went to bed early and never woke up," William Simpson said. "My brother Dan went over as he often does at 5 in the evening the next day. ... He found my father dead."

Mary Salch

...my mom passed away yesterday after receiving the 2nd shot Jan 27
Corrie Misted-Mendas is with Carol Denholm-Misted.
14h  

"I'm hoping to spread awareness on possible complications originally I was going to post my excitement on my second vaccine. Don't get me wrong I took the risk because I was anxious about it covid. I also wanted to see my mom & didn't want to risk giving her covid. I didn't know that the vaccine is actually very risky for people with underlying conditions. My mom passed away on Friday..."

Modern vaccine, her symptoms started the night she got her vaccine (seems to be exactly the same timing the rest of us start getting symptoms). She was a diabetic, had heart disease & kidney disease but all managed and not showing signs of sickness there. NIGHT one her blood sugar dropped and she passed out. We googled and it looked like in rare cases the vaccine could effect blood sugar of diabetics. Her dr told her to just change her insulin until symptoms subsided. Then her blood sugar was high (Then it balanced), THEN she was very nauseous and throwing up for 2 days (then that stopped) THEN she had shortness of breath for 2 days. Nothing to call the ER. She thought it was vaccine symptoms that would go away. She passed Friday peacefully.

I've been on daughter bear hunt to find a pathologist that can determine the vaccine caused my moms passing. I keep hitting walls. Apparently vaccine deaths can't be traced, which is a bit of a problem you think? I reported it to VAERS which is CDC & FDA but they won't do autopsy (guessing now because vaccine is not conclusive in findings). Medical examiner is doing a covid test on mom but she was isolating until vaccine so she could see me & my girls. When I called my moms pharmacist to cancel her prescriptions he told me he'd heard of 5 others RECENTLY passing after vaccine. Families are left to pay for autopsy themselves ($5k) as cause of death is normally determined based on an educated guess (who

My children's mum had the Pfizer jab at 9.50am on Wednesday the 13th of January 2021 at 3pm the same day she suffered a cardiac arrest and died in my arms, I gave CPR for 20 minutes until paramedics arrived, they worked on her for over an hour, she was 43 a frontline care worker tested negative at least once a week for COVID, pressured into having the jab with no untreated underlying illnesses, her service

Ria Heslop
My father died from the Pfizer Vaccine. He became so unwell 2-3 days afterwards, it was the most Horrific death I cannot come to terms with what this did to him, I am afraid these pictures are Graphic but people have to see what they did to my wonderful beautiful father, o

beccaingle
Blowing Rock, North Carolina

beccaingle The best mom and Grammy in the world slipped away from our life unexpectedly yesterday and the fact I didn't get to see her, talk to her, tell her I loved her one last time is eating me alive. She got the vaccine on Monday because she is a believer in science. Felt bad shortly after, and went into cardiac arrest yesterday morning. My dad was unable to revive her. We have an autopsy underway. The thing she thought was saving her might have killed her. If you know my mom, she is a professor @appstate the smartest women I know, she proofreads all my travel articles, she babysits my kids on demand when we travel, she took every precaution during covid and she loved her family so much. I love you so much.

My mother passed away on Feb 25 after receiving jabs 1st and 2nd of pfz. She suffered blood clots in lungs and was in excruciating pain. She would have been 90 in Apr.

Linda Racey Bogle
February 22 at 11:45 PM

My mom consented to the Pfizer CV19 vaccine on 1/4/21 and passed away on 1/17/21 😞❤️
She tested negative for covid all of 2020 and tested negative the morning of 1/12/21.

On 1/14/21 she tested positive and was moved to the skilled nursing home's covid unit. Her lungs were clear. She had a slightly elevated temperature.

A couple days after my mom received the CV19 vaccine, she stopped eating and drinking. Interestingly, her doctor was never told she received the vaccine even after she died. I was the one to give him that information 😖

COVID-19 Vaccine Side Effects

My mother-in-law got both shots and 2 1/2 weeks after 2nd shot she went to the ER. Her platelets were at a 12 and she was diagnosed with Acute Lymphocytic Leukemia. Maybe it was a coincidence but it came on fast.

@Nina post

My sons grandpa had the second shot yesterday morning and my 8 yr old son stayd the night there last night. This morning him and his grandma found him lying on the floor unable to move his arms or legs or speak. They took him to the hospital by ambulance and said they are running tests. Anyone hear of these types of reactions? Or was it just a coincidence?

@Tasha Dane

My brother is on life support critical after having the vaccine.
3 hours after he had the jab' he collapsed and never regained consousneses,
The hospital tried to say he had covid, but wasn't even tested at that time, plus he went to work the same morning' again was fine.
Now they have given him 48hrs...More

My beautiful granny got her 2nd Covid shot yesterday and is completely unresponsive today. Hoping for a better tomorrow... thoughts appreciated.

Bethannie Ann - Hearts For Healthcare Workers.
2 February 2021
My mom had her 1st Covid vaccine this past Thursday. She woke up at 1am today with a baseball sized bruise. Went back to bed got up around 7am.
Here's some pictures of the progression that followed. Last picture was taken at 5:30pm. She did f/u with her pcp, had labs drawn, and has an u/s of her arm ordered for tomorrow. Has anyone seen anything like this happen? Arm is very swollen as...
As I posted two days ago, my brother-in-law, 83 and with diabetes, got his second Pfizer vaccine the first week in February. He was hospitalized for shortness of breath and getting oxygen. Today’s update: He was given a pacemaker. The official line was that the pace of his heart was not quite right, and they were unable to adjust it in the hospital, causing all this water retention. No big deal, he will be home tomorrow. But when I looked it up, that’s not quite the story. When atrial fibrillation causes water retention, the indication is heart failure. Are there any medical professionals on this list who can confirm this?

Has anyone heard anything about babies having reactions when their nursing moms get the covid vaccine? This is my grandnephew yesterday, his mom got her shot on Saturday.

COVID-19 Vaccine Side Effects.

My boyfriend woke up 2 nights ago with his right side of face drooping and severely swollen, and severe fatigue. He can’t stop sleeping. He had the Pfizer vaccine on 14th Feb. He’s been admitted in hospital and has been told it’s TIA/mini stroke. He only 41 years old.

My son’s father was just taken to hospital in ambulance with massive pain, couldn’t lift arms, couldn’t walk, after a 2day flare of gout 10 days after 1st Moderna shot which his new girlfriend/her family convinced him to take. [His 1st 24 hrs after the shot were miserable too — a 102 degree fever & pain everywhere.] He’s 53.

My son’s grandpa had the second shot yesterday morning and my 8 yr old son stayed the night there last night. This morning him and his grandma found him lying on the floor unable to move his arms or legs or speak. They took him to the hospital by ambulance and said they are running tests. Anyone hear of these types of reactions? Or was it just a coincidence?

Hi had my jab Thurs night, yesterday I couldn’t move out of bed all day. Shivering & freezing then burning up & sweating, chest pain (left side), pains in eyeballs, ears, head & legs, feeling sick. Today I have kidney pain & chest pain in right side. I know the flu symptoms are normal but is chest pain?

I got MODERNA, 1st shot fine. After 14 hours of 2nd shot, passed out on floor. Had shaking and speech stammering. Chills, fever set in for 4 days. Very weak for days. Dr. Did x-rays, MRI to make sure I did not have a concussion from passing out. All came back ok. 2 days later, no improvement, another shaking stammering incident 911 called, in hospital for 4 days they could not find anything wrong. I am still extremely weak and fatigued. How long can side effects lasts?
Reports of significant injuries post-injection are now being reported

CDC: More than 5,000 COVID-19 vaccine recipients have reportedly suffered "health impact event"

Dated December 30, 2020 by Sharyl Attkisson — 223 Comments

- Moderna reports higher risk of common side effects
- 5,052 suffered a "health impact event" as of Dec. 19
- CDC defines "health impact event" as one that renders a patient "unable to perform normal daily activities, unable to work, required care from doctor or health care professional"
- That's a rate of about 2.3% of vaccine recipients
- CDC says a severe allergic reaction, anaphylaxis, was reported
- It's impossible to know how effective the vaccines are beyond the number of days they've been given to humans.
- It's also impossible to know this soon what are the potential long term side effects, if any.

Ohio school

NO SCHOOL Monday, February 8th.

Dear Parents: the Fairless school staff received their COVID vaccination on Saturday and many have developed side effects and become ill. I am not able to operate school safely tomorrow with this many staff out. Fairless schools are closed for Monday, February 8. We plan to resume school on Tuesday.

13 Israelis suffer FACIAL PARALYSIS after taking Pfizer Covid jab, amid influx of reports detailing adverse effects

16 Jan. 2021 14:52

At least 13 Israelis have experienced facial paralysis after being administered the Pfizer Covid-19 vaccine, a month after the US Food and Drug Administration reported similar issues but said they weren't linked to the jab.
Suspicions grow that Pfizer’s COVID vaccine nanoparticles trigger allergic reactions

The U.S. National Institute of Allergy and Infectious Diseases (NIAID) convened several meetings last week to discuss COVID-19 shot allergic reactions with representatives of Pfizer and Moderna, independent scientists and physicians, and the Food and Drug Administration (FDA), reports ScienceMag.

The magazine, whose COVID-19 reporting is supported by the Pulitzer Center and the Heising-Simons Foundation, said severe allergy-like reactions in at least eight people who received the COVID-19 vaccine produced by Pfizer and BioNTech over the past 2 weeks may be due to a compound in the packaging of the messenger RNA (mRNA) that forms the vaccine’s main ingredient, scientists say. A similar mRNA vaccine developed by Moderna, which was authorized for emergency use in the United States on Friday, also contains the compound, polyethylene glycol (PEG).

“PEG has never been used before in an approved vaccine, but it is found in many drugs that have occasionally triggered anaphylaxis—a potentially life-threatening reaction that can cause rashes, a plummeting blood pressure, shortness of breath, and a fast heartbeat. Some allergists and immunologists believe a small number of people previously exposed to PEG may have high levels of antibodies against PEG, putting them at risk of an anaphylactic reaction to the vaccine,” the paper noted.

Meanwhile, an Israeli law firm has sent a letter to Health Ministry Special Events coordinator Firas Hayek with a demand to reveal all vaccine injuries and damages before Israel can pass legislation regarding mandatory vaccination.

The Law Firm of Sachs, David, Price, and Hegdish wrote: “Testimonies from within society have accumulated of severe incidents that necessitated emergency medical care for those who vaccinated, evacuation to the emergency room, hospital stay, or death within a close time frame from the vaccination.

The COVID-19 vaccine, however, according to VAERS, shows 1 death reported per 35,000 shots or 10,000 completed vaccinations (so far), a 300-900 greater likelihood. The Center for Disease Control (CDC) maintains there is “no link” between the vaccine and the deaths.
Some of these vaccine injuries will be life-long and devastating.

**Hadassah Hospital:**

**Young man develops ‘rare life-threatening syndrome’ after Covid-19 vaccine**

23 year old sent to Hadassah Hospital found to have developed rare multisystem inflammatory syndrome 24 hours after getting Covid vaccine.

**Coronavirus vaccines sending hundreds to ER, according to US gov’t reporting system**

Seventeen people have had a ‘life threatening’ reaction to the COVID-19 shot. Two reactions were so bad they led to a ‘permanent disability.’

"The system has received reports of 1,156 total adverse events. Of those, 17 have been ‘life threatening’ and two have led to a ‘permanent disability.’"

Thousands of others are self-reporting an inability to return immediately to work or perform daily activities after the vaccine. According to The Epoch Times, these incidents were reported through V-safe, “a smartphone...”

**PUBLIC HEALTH INFORMATION**

**Hundreds Sent to Emergency Room After Getting COVID-19 Vaccines**

BY ZACHARY STIEBER | January 5, 2021 Updated: January 5, 2021

Thousands of people self-reported being unable to work or perform daily activities, or required care from a health care professional, after getting one of the doses from the first tranche.

The FDA’s Adverse Event Reporting System hasn’t been updated to include data for the last quarter of 2020 yet.
The coronavirus vaccine developed by Pfizer and BioNTech has apparently caused a number of side-effects not anticipated by the producers, a department manager at Sheba Medical Center in Tel HaShomer said Tuesday.

Professor Gaila Rahav, chief of the Infectious Disease Unit and Laboratories at the Sheba Medical Center, spoke with Kan Reshet Bet Tuesday about the newly-discovered side-effects some people have reported experiencing after receiving the Pfizer-BioNTech vaccine.

The new side-effects range from paraesthesia – a nerve condition causing a tingling sensation or 'pins and needles' – to facial nerve paralysis.

“When we noticed this and spoke with [the company], they started to get reports about this,” said Rahav.

“At the beginning, they said that it was just hysterical women, but it doesn’t seem that way, because we’re seeing this with men as well.”

Prof. Rahav emphasized that the side-effects are likely temporary, and that it is not yet certain that the vaccine caused the reactions. But, she added, since the vaccine is new “we need to examine it, to learn, and to observe.”

“We’re just now learning about the effectiveness of the vaccine in real life. In real, day to day life, you learn different things. The effectiveness is a little different. When you vaccinate 2.5 million people in one shot, obviously we’re going to see different things happening.”
Some of these injuries are devastating knowing they would have easily survived COVID

32-Year-Old Mexican Doctor Suffers Seizures and is Paralyzed After Receiving the Pfizer Experimental Vaccine

Dr. Karla Cecilia Pérez Osorio (right).

The Mexican Press is reporting that a 32-year-old female doctor in Coahuila has suffered seizures and become paralyzed after receiving the Pfizer experimental COVID mRNA vaccine on December 30, 2020.

Dr. Karla Cecilia Pérez Osorio reportedly was working as an internist at the General Hospital of Zone No. 7, in the municipality of Monclova. She was subsequently transferred to the High Specialty Medical Unit No. 25 of the IMSS, in Monterrey, Nuevo León.

She was reportedly evaluated by a neurologist and diagnosed with transverse myelitis, a known side effect of vaccines, and specifically of the COVID experimental mRNA vaccines as this injury was observed in some of the vaccine trials of the various COVID19 experimental trials being conducted around the world.

Hamilton PSW says allergic reaction to COVID-19 vaccine led to fainting, seizures and CPR

Tilli says the paramedic checked her vitals and noticed her heart rate was high. She received a Benadryl shot and it seemed to work for a few minutes. But the symptoms returned and worsened, she says. "The supervisor from the paramedics was there and he just said 'OK, let's give her the EpiPen,'" Tilli said.

"Within a minute, I just said, 'Something doesn't feel right in my body,' and I remember just passing out and leaning over to the right."

Dave Thompson, superintendent of the local paramedic service, confirmed to CBC News that Tilli was taken to hospital in stable condition.

Tilli says when she woke up, she was told she suffered seizures and needed CPR for a brief period. She doesn't remember much during the reaction, but says one moment sticks out — accepting the fact that she could die.

"There was a moment where, I don't want to say I gave up, but I was just like 'It is what it is.' ... [Days later] when I was in bed the other night, I was thinking, 'What if I left my two girls without a mother?'" Tilli said.
Even the very young are experiencing deadly reactions.
My dad got vaccinated... 36 hours later he was in the hospital with heart failure. We thought we were going to lose him.

Me: Dr Cardiologist (DC), what’s wrong with our dad?
DC: Well, at first he had all the symptoms of COVID, but he tested negative. Then we discovered he had heart failure.
Me: How bad was it?
DC: Your dad was very sick. We didn’t think he would make it the first night.
Me: So what happened to his heart?
DC: Well, his arteries are clear and there’s no blockage. So it’s hard to say. We did find 2 liters of fluid we drained from his lungs that we think is secondary to the heart. And there’s no infection.
Me: So what caused the heart failure and fluid in his lungs?
DC: We still don’t know.
Me: Could it have been the experimental vaccine he received about 36 hours earlier...?
DC: Oh, no.
Me: Why not?
DC: There’s no evidence for that.
Me: And you confirmed my dad doesn’t have diabetes, metabolic syndrome or any other comorbidities, correct?
DC: Correct.
Me: So what caused him to have sudden heart failure? And what explains why he is now doing so much better?
DC: We still aren’t sure.
Me: And you’re sure it wasn’t the vaccine?
DC: Yes.
Me: How can you be sure?
DC: It’s just not.

What has to happen for something to be considered, even as an association (not causation) an adverse reaction in the reporting data? I’m sensing things are likely not being recorded or documented accurately in the medical community.
This vibrant, 65 year old retired nurse, suffered a thrombotic stroke 8 days after her second shot.

Her daughter has reported it to Pfizer but has yet to receive a response.

Almost all cases of disseminated intravascular coagulation (DIC) or cerebral venous thrombosis (CVT) after receiving the AstraZeneca vaccine were among women under age 55. Nine of these individuals died, according to the EMA statement.

Union workers in India are protesting after deaths

Andhra Pradesh ASHA Worker Dies After Receiving Covid-19 Jab; Unions Protest

Promila Devi, 55, a frontline health worker died due to serious complications she developed after getting vaccinated for Covid-19 at Hamirpur district in Himachal Pradesh.

Confirming about the death, Dr Janak Raj, Senior Medical Superintendent, Indira Gandhi Medical College, Shimla said the patient was shifted to IGMC from Dr Rajendra Prasad Medical College, Tanda (Kangra) only a few hours before she died.

After initial treatment and reviewing her condition, she was rushed to Tanda, where she was treated for her kidney failure. She was tested for Covid-19 also she was negative. She was also on ventilator support. As condition became precarious on Saturday, she was brought to IGMC Shimla,” he said.

Chief Medical Officer (Hamirpur) Dr Archana Soni said the death of the Anganwadi worker after vaccination is a matter of concern. The higher authorities in the government have been apprised of the circumstance.

Dr Janak Raj released a letter written by union Additional Secretary (Health) Manohar Agnani asking the state governments to take strict measures after any death following vaccination of the frontline workers in the country.

ASHA workers staged a demonstration in front of the GGH demanding that a compensation of Rs 50 lakh be paid to the deceased’s family.

Moradabad: Ward Boy Dies 30 Hours After Taking Covishield, ACMO Denies Vaccine Caused Death

46-year-old Mohipal Singh, a ward boy at the Moradabad district hospital died about 30 hours after he received the Covishield vaccine. While his family members have alleged that he fell sick only after receiving the vaccine, Additional CMO of Moradabad district, Dr Dinesh Kumar Premi, while speaking to Outlook, said that Singh died due to a heart attack and that his death has nothing to do with the vaccine.

Which vaccine was he administered and when?
He was administered Covishield on January 15 at 1 PM at the District Main Hospital. He was kept in the hospital for observation for some time as we did with all the other vaccinated individuals. He didn't show any symptom of any side effect. At the time of his release from the hospital, he was completely fine and he had neither any fever nor any rashes or anything.

Then in the evening, he developed chest pain again and faced breathing issues. His family rushed him to the district hospital. He was admitted in the emergency ward and the doctors found him dead. He died on the way to the hospital.

Anganwadi Worker Dies After Covid-19 Vaccination, Govt Orders Probe

The 44-year old ASHA worker complained of severe headache and fever on January 22, three days after she took a shot of the coronavirus vaccine.

“We first took her to a private hospital and later shifted to the GGH as her condition worsened. She was a very fit person and rendered tireless service during Covid-19 time,” the ASHA worker’s brother said.

Indian Woman From Andhra Pradesh Dies From Brain Stroke After COVID-19 Vaccine

A woman from the state of Andhra Pradesh in India has died after suffering a brain stroke after receiving the COVID-19 vaccine. The family of the victim claims she developed seizures and fever after receiving the vaccination and died due to the vaccine.
India public health demands investigation after 19 deaths

19 health workers dead after COVID-19 vaccination; health experts demand investigation

The COVID-19 vaccination drive was kicked off on January 16 in India. Since then, at least 19 health workers have died post-vaccination. Doctors and public health experts wrote to the health ministry, demanding an investigation into the deaths.

On February 1, 47-year-old Mannu Pahan, a health worker from Ranchi in Jharkhand, died within 48 hours after being vaccinated against COVID-19. He died at the Medanta Hospital and his body has been sent for a post mortem.

Pahan is one of the 19 health workers in the country to lose his life after receiving the COVID-19 vaccination since the launch of COVID-19 immunisation drive on January 16.

While the government has denied any connection between the deaths and the vaccine, the country’s public health officials, wrote to the Union ministry of health and family welfare on January 31, raising questions and demanding an immediate investigation into the deaths.

The letter also demanded that the minutes of AEFI committees formed at the national, state and district levels on adverse incidents arising post-vaccination, be made public. The letter drew attention to several facts: the death of health workers has occurred within a few hours to up to five days after taking COVID-19 vaccine; the deceased were aged between 23 and 56 years; media reports highlighted cardiovascular problems or brain trauma as the cause behind each of the deaths;

“So far, most of the cases of COVID-19 vaccine deaths have reportedly been due to cardiovascular and brain trauma. All these groups need to be examined immediately so that, at least, the reasons behind it are known,” Amar Jesani, an independent consultant, researcher and teacher in bioethics and public health told Gaon Connection. He is also editor of Indian Journal of Medical Ethics, and one of the signatories of the letter. Jesani urged that the investigations be made public so that
University researchers release data showing 'significant mortality from vaccine'

Vaccination in Israel: Challenging mortality figures?

Mordechai Sones, Feb 16, 2021

A front-page article appeared in the FranceSoir newspaper about findings on the Nakim website regarding what some experts are calling "the high mortality caused by the vaccine."

The paper interviews University of Aix-Marseille University Faculty of Medicine Emerging Infectious and Tropical Diseases Unit's Dr Hervé Seligmann and engineer Haim Yativ about their research and data analysis. They claim that Pfizer's experimental shot causes "mortality hundreds of times greater in young people compared to mortality from coronavirus without the vaccine, and dozens of times more in the elderly; when the documented mortality from coronavirus is in the vicinity of the vaccine dose, thus adding greater mortality from heart attack, stroke, etc."

Dr Hervé Seligmann works at the Emerging Infectious and Tropical Diseases Research Unit, Faculty of Medicine, Aix-Marseille University, Marseille, France. He is of Israeli-Luxembourg nationality. He has a B. Sc. In Biology from the Hebrew University of Jerusalem, and has written over 100 scientific publications.

FranceSoir writes that they follow publications, data analyzes, and feedback from various countries on vaccination, and have therefore taken an interest in the Nakim article, asking to interview them in order to understand their analysis and its limitations.

The authors of the article declare they have no conflicts or interests other than having children in Israel.

After a presentation, the authors discussed their data analysis, the validations carried out, limitations, and above all, their conclusions that they compare with data received via a Health Ministry Freedom of Information Act request.

Their findings are:

- There is a mismatch between the data published by the authorities and the reality on the ground.
- They have three sources of information, besides the emails and adverse event reports they receive through the Internet. These three sources are Israeli news site Ynet, the Israeli Health Ministry database, and the U.S. federal Vaccine Adverse Event Reporting System (VAERS) database.
- In January 2021, there were 3,000 records of vaccine adverse events, including 2,900 for mRNA vaccines.
- Compared to other years, mortality is 40 times higher.

On February 11, a Ynet article presented data related to vaccination. The authors of the Nakim article claim to have debunked this analysis based on data published by Ynet itself. "We took the data by looking at mortality during the vaccination period, which spans 5 weeks. By analyzing these data, we arrived at startling figures that attribute significant mortality to the vaccine."

The authors say "vaccinations have caused more deaths than the coronavirus would have caused during the same period."

Heim Yativ and Dr. Seligmann declare that for them, "this is a new Holocaust," in face of Israeli authority pressure to vaccinate citizens.

"Our reanalyses of these data explain why during the massive vaccination project initiated mid-December 2020 during a confinement, daily new confirmed COVID-19 cases failed to decrease as they do during confinements, and, more importantly, why numbers of serious, critical, and death cases increased during that period that covered at least one month. From mid-December to mid-February (two months), 2,337 among all Israeli 5,351 official COVID-deaths occurred. Our analyses indicate orders of magnitude increases in deaths rates during the 5-week long vaccination process, as compared to the unvaccinated and those after completing the vaccination process. Presumably, asymptomatic cases before vaccination, and those infected shortly after the 1st dose, tend to develop graver symptoms than those unvaccinated.

"The Ynet article is organized in an exciting way and uses data provided in an erroneous way by the Ministry of Health. It is unclear whether this was intentional to prove the vaccine's efficiency or if this was done erroneously because the provided data were misunderstood. Note that in Israel, all vaccines are from Pfizer.

"The data in the table, rather than indicating the vaccine efficacy, indicate the vaccine's adverse effects," the authors conclude.

Sources:

Gibraltar is an interesting case study on safety. The colony had only 17 COVID deaths from March 2020 - Jan 9, 2021. Yet they had 53 deaths within 10 days of the vaccine rollout.

Expatca.com reported that the injections started on January 9th, and that by Sunday night January 10th, 5,847 doses had been administered.

Gibraltar began rolling out its vaccination programme on January 9 using the Pfizer vaccine and by Sunday night had administered 5,847 doses — covering around 17 percent of the population. (Full Article.)

The Government of Gibraltar reported that as of January 10th, just one day after the injections started, 4 people immediately died:

53 dead in Gibraltar in 10 days after experimental Pfizer mRNA COVID injections started

Gibraltar is a British Colony at the southern tip of the Iberian Peninsula attached to the country of Spain. It’s population is just over 30,000 people, and it is best known for its huge “rock,” the “Rock of Gibraltar.”

I have been contacted by residents in Gibraltar stating that 53 people have died in 10 days immediately following the roll out of injections of the Pfizer mRNA COVID injections, and calling it a “massacre.”

Local media reports confirm the deaths, but blame them on COVID, and not the COVID injections.

However, prior to the roll out of the injections, it is reported that only 16 people in total died “from COVID” since the beginning of the “pandemic” about a year ago.

A Kevin Rushworth reported:

Tiny Gibraltar Shines Huge Light on Vaccine Deaths

Ever since the epidemic began, sorting genuine Covid deaths from others has been a major issue. Now we have the added problem of vaccines in the mix. The UK now allegedly has the highest daily “Covid death” rate ever. Even higher than the “First Wave,” in spite of the substantial degree of herd immunity that has inevitably accrued since the beginning. This atypical “Second Wave” coincides with the vaccine roll-out. Are the two connected?

Gibraltar, normally called simply “Gib,” provides a very clear picture. This tiny British Colony, barely three miles long, appended to the South coast of Spain, has only 32,000 residents. It had suffered relatively little from the epidemic before the 9th January this year, with only seventeen deaths for the whole period. The death rate was well down the Deaths per Million League Table. This was not due to isolation, since Spanish workers have continued to pour into Gib every morning, and back out every evening.
LET'S LOOK AT
FRONTLINE WORKERS' EXPERIENCES
Why are healthcare workers & servicemembers declining the COVID vaccine in record numbers?

Vaccine rollout hits snag as health workers balk at shots
By BERNADETTE CRONCCHI, MATT SEGURIN and CARLA H. JOHNSON

The desperately awaited vaccination drive against the coronavirus in the U.S. is running into resistance from an unlikely quarter: Surprising numbers of health care workers who have seen firsthand the death and misery inflicted by COVID-19 are refusing shots.

It is happening in nursing homes and, to a lesser degree, in hospitals, with employees expressing what experts say are unfounded fears of side effects from vaccines that were developed at record speed. More than three weeks into the campaign, some places are seeing as much as 80% of the staff holding back.

“I don’t think anyone wants to be a guinea pig,” said Dr. Stephen Noble, a 42-year-old cardiothoracic surgeon in Portland, Oregon, who is postponing getting vaccinated. “At the end of the day, as a man of science, I just want to see what the data show. And give me the full data.”

Germany has more than 1 million Covid-19 vaccines unused in storage

“We are working quite hard on this and trying to convince people to accept the vaccine and really to rebuild the trust in the vaccine,” one official said.

Majority of Ohio nursing home workers not taking COVID-19 vaccine

53% of Military Families Don't Want COVID-19 Vaccine, Survey Shows

Ukraine throws away unused COVID-19 shots as doctors skip their own vaccinations

Los Angeles Times

Some healthcare workers refuse to take COVID-19 vaccine, even with priority access

At St. Elizabeth Community Hospital in Tehama County, fewer than half of the 700 hospital workers eligible for the vaccine were willing to take the shot when it was first offered. At Providence Holy Cross Medical Center in Mission Hills, one in five frontline nurses and doctors have declined the shot. Roughly 20% to 40% of L.A. County’s frontline workers who were offered the vaccine did the same, according to county public health officials.

International Business Times

87,000 healthcare workers in Netherlands refuse Covid-19 vaccine

The nurses consider the vaccine “experimental” and said they don’t want to be guinea pigs

At a recent hearing of the Covid-19 Extra Pulmonary Inquiry committee, Dr. Elke De Klerk from the Netherlands said she supports 87,000 nurses who resolved to refuse the Covid-19 vaccine because they don’t want to be a guinea pig. “We are also starting a lawsuit to bring a really large group of doctors and a really large group of nurses because we have contact with 87,000 nurses that do want the vaccine that is being prepared for us. They are not willing to be the guinea pigs.”

Amid random reports of reactions to vaccine surfacing at different parts of the world, here comes a sharp refusal from thousands of healthcare workers. Around 87,000 nurses refused “experimental” Covid-19 vaccine in the Netherlands, even as the Prime Minister Mark Rutte announced a strict five-week lockdown. Cases in the Netherlands saw a steep rise after the celebrations of Saint Nicholas’ birthday on Dec 5.

A Third of U.S. Servicemembers Refuse to Be Vaccinated: Pentagon

The Times of Israel

As demand for vaccines plummets, Israel may resort to incentive programs

Miami Herald

Half of Miami’s COVID front line passed on vaccines. Leaders
Thomas's friend Don Paul told The Morning Edition, “Thomas worked as an aide at Saskatchewan Hospital North Battleford. Thomas believed he may have been exposed to the virus at the hospital early in February — only 24 hours after being given his first dose of a COVID-19 vaccine. By Monday, Thomas had chest pains and went to the ER. While he was waiting for the doctor to do the assessment, he had a sudden cardiac arrest and died.”

CORFU, GREECE – A Greek nurse is now paralyzed after receiving a second dose of mRNA. The 40-year-old nurse is a mother of two and has been a nurse for 17 years.

The nurse, whose name has not been disclosed, developed a fever, followed by excruciating pain throughout her body immediately after the second shot. She was rushed to the hospital when she was unable to move or feel her lower extremities.

Michalis Giannakos, President of the Panhellenic Federation of Public Hospital Workers (POEDIN), told Open TV in the East Attica region that X-rays came back clean. The nurse is now undergoing neurological assessments.

Giannakos said the nurse was in perfect health prior to receiving the second mRNA shot. It is believed that the nurse developed Guillain-Barré syndrome.

The neurological disease causes the immune system to attack nerves throughout the body. Giannakos said the nurse is now wheelchair bound.

Criminal charges for reporting the truth?

The Prosecution of the Court of First Instance is considering pressing criminal charges against Giannakos. Greek media outlet Ethnos is reporting that a prosecutor is investigating if Giannakos committed the crime of “spreading fake news.”

His crime is expressing an mRNA adverse effect with “too much certainty.”

"Typically, COVID-19 vaccine deaths can be attributed to anaphylaxis and occur within a relatively short period after the vaccine is given, which is why monitoring is done,” said Dr. Gary Anthone, Nebraska’s chief medical officer.

The victim from Valencia contracted the virus shortly after receiving the first dose of the Pfizer-BioNTech vaccine on December 29. The second dose of the drug was administered on January 19, three weeks after the first jab. In analysis
Uncontrollable, full body tremors are now a known side-effect.

I encourage you to go to their Facebook pages to watch the recordings.

January 12 at 9:16 PM

This is what the Pfizer covid19 vaccine has done to my Mom. Everyone please pray for her. She was admitted to the hospital. And be cautious about taking the vaccine. I'm sure it is good for some people but you need to think about is this vaccine worth taking? It's not for me. Please share this post we need help finding answers.

Update 1-12-21

Mom is getting even worse today and still don't have any answers from doctors as to how to fix this. Please pray for her. I can't stand to see my mom this way it makes me want to cry knowing I can't do anything to help her. Please don't take the covid19 vaccine. I'm adding a 3rd video that she just sent me.

Kristi Simmonds is with Steve Morris and 7 others.

January 30 at 7:15 PM

Please please share this...people need to be aware.

5.6K Comments 21K Shares

BAKERSVILLE, NORTH CAROLINA — Ms. Kristi Simmonds has been a registered nurse since 2007. Her hard work and dedication to the profession led to a clinic manager position at Kindred at Home Care Services in October. Ms. Simmonds wanted to lead by example. She received the Moderna mRNA shot on January 19, according to her Facebook page. The goal was to protect her patients and co-workers, while also demonstrating that the shots are safe. She is now warning people to exercise due diligence before getting the job.

Ms. Simmonds throat and tongue swelled up so much that she could barely breath. She went to the hospital on January 21. Doctors prescribed her Benadryl and sent her home. Ms. Simmonds rested for four days and returned to work, thinking the worst was over. Her whole world changed that night when she got home. Ms. Simmonds started having uncontrollable convulsions and muscle spasms.
Many front line workers are sharing their injuries on social media

“Doctors and nurses from Infectious Disease have been consulting with each other to try and best identify potential trial treatments to see what works and what doesn’t. For now, he’s been given anti-bacterial medication in an attempt to relieve his symptoms.

“My husband after four days still remains in the hands of caring, interested and well researched professionals who are the ONLY professionals who have taken a general interest in helping, researching and trying.

“At the end of the day, I am beyond thankful for this privately held highly regarded Hartford based hospital but am very concerned about how little is being shared in regards to Covid vaccine symptoms and their severity. Two days ago I saw a big push to get the vaccine on the news with a tempting promise of a ‘normal fall’ if we all get vaccinated... please take our experiences into consideration as you decide what is best for you and your family.

“And if you’ve taken some time out of your day to read through this, please SHARE. There is little information available for those suffering. And if for any reason you become increasingly ill, please seek help from the best hospital you can as soon as you can.

“If you have any questions regarding my husband, his experience or mine, please reach out. I want you to be armed with information about ALL side effects from the vaccine so you can make the best decisions for you and your families.

“With every wish that you and yours stay safe and well, Jen.”

January 3 at 12:49 PM

UPDATE 1/8/2021

All - Over the last week, my husband and I have received hundreds if not thousands of messages, texts, calls and emails expressing empathy and sympathy for our living nightmare. Many of these reach outs came from family and friends. Many more came from tens of thousands of strangers simply passing along healing prayers and thoughtful words.

- Karl (my husband) and I are indeed REAL. Once we saw my initial post take off, we thought it best to lock down our personal accounts for privacy. Not that anything is truly private on social media.

- He and I are in our mid/late 20s and partake in active sports like walking, hiking, skiing and wake-boarding regularly.

- My husband has no underlying conditions, no chronic conditions, and...

- Given his role as a first responder, my husband was regularly tested for COVID leading up to his vaccination and was tested numerous times after falling ill. My husband did not have and continues to be Covid free.

- Yes, it was officially determined that his illness was directly linked to the vaccine.

Our objective in sharing our husbands very real experience with Modemra the healthcare system and “all of the things” was simple -> share so that others can make more informed decisions for themselves and their families.

We hope in some small way being open and sharing these personal details truly helped you form a more comprehensive understanding of the vaccine and its potential symptoms/risks.

After nearly 11 days of aggressive illness, 6 days and 5 nights in a privately held hospital without visitors, raging potential seizure including fevers, 35+ tests including regular blood draws, chest x-rays, liver ultrasounds, spinal taps, forced isolation, and a hospital bill I’m sure is five miles long....

My husband is home. My husband is safe.
Before I start this post, I am in no way feeding into conspiracies, lies etc. This is from true experience and I am currently having to write this with one hand. Today I went in for my Pfizer COVID-19 vaccination because I work in a care home, and I thought it would be in the best interest of my residents to have it. I was offered a choice before I had the jab. I was asked if I had any allergies which I stated a mild egg allergy so after my jab I was told to stay for a 30-minute observation to see if the vaccine caused a reaction. I was fine apart from a mild headache I put that down to not eating properly when I got home. I decided to go for a nap which lasted an hour, little did I know everything was going to get worse. When I woke up I could barely feel my right side (I was vaccinated in the right arm) and could barely string a sentence together. I had slurred speech, and little energy, and, as time went on, I lost complete sensation in my right arm and leg, and my headache became an excruciating pain in my neck, as well. My nurse suspected something was wrong and called 111 for some advice as we weren’t sure if these were normal side effects. When speaking to 111 they sent an ambulance which came in 10 minutes, I was assessed and sent to the hospital. I was then sent for a CT scan and admitted as a potential stroke bearing in mind I am 19 years old, the CT scan was clear, but there was no explanation for the loss of feeling in my body. I am now on a stroke ward despite no sign of a stroke to monitor if my feeling comes back and to see if I can walk again.

The Cass County healthcare worker got the Moderna shot in late December, blacked out, and ended up on a ventilator.

What happened to her is a cautionary tale, with important information everyone should know.

Chavonya Littlejohn has had a front-row seat to the pandemic. She’s a patient access team leader at Belton Regional Medical Center. Right after Christmas, she decided to take her shot at getting the Moderna COVID-19 vaccine.
A testimony of two nurses - one managed to go home / one went to ICU

My Pfizer Covid vaccine story...

I have waited to post my story out of fear of negative comments, therefore I’m asking you to please don’t leave a negative comment because this is MY story. Thanks.

I was excited to be chosen to receive the Pfizer Covid 19 vaccine. I have been a nurse for 20 years and love what I do for my community. I felt that everyone in my life, including my patients, family as well as myself would benefit if I receive the vaccine. After all what could be so bad about a vaccine? I believe vaccines are good. I’m healthy. No health conditions and No allergies.

On 12/18/20 around 12:30 pm, I go to the designated station pull up my right sleeve and receive the injection. I think, “okay, that wasn’t so bad” and I leave to go to the waiting area for 15 minutes to make sure no reactions occur.

As I was in the elevator going down, one floor, to the seating area. I felt some dizziness. I think to myself that I just stepped wrong in the elevator. I get to the floor and was greeted from a nurse that asked me to wait for a minute to be seated. I then felt a big wave of dizziness over my body. I asked if I could sit now as I was feeling really dizzy and my legs feel like noodles. The nurse kindly said yes, sit anywhere you’d like. I sat down and she asked how I was feeling? I said kinda dizzy and weird but I don’t think it’s anything. A sweet girl sitting across from me said to me, “it’s not in your head, I feel the same thing.” We looked at each other with a bewilderd starting to feel a tickle in her throat. A few minutes later, I started feeling the same, a tickle in my throat. We both agreed that it still probably wasn’t anything and maybe we needed to drink some water. Next she said to the nurse that she is feeling “fullness” in her throat. The medical personnel quickly took her away to one of two back rooms to possibly start an IV. I sat there alone when I also started feeling a “fullness” in my throat and I looked around but didn’t see anyone. Then the Physician came up to me and asked me how I was feeling? I told her, “I feel fullness in my throat also,” with deer in a headlight look on my face. She took me to the other room in the back, just in case we need to start an IV. An IV? For what? I was confused and thought I’m okay just feeling a little strange.

I go to the back room and blood pressure showed 187/100 and pulse 120. I was asked by all personnel if I had HTN, allergies or allergies to the flu vaccine. I said No I don’t have any allergic or HTN. The fullness in my throat quickly escalated to feeling like I was being choked with extreme heat inside my body that started at my throat and waved down to my abdomen and back up. That’s when I got an IV, Benadryl, dexamethasone and my first injection of epinephrine. Now my blood pressure and heart rate was even higher and I start shaking uncontrollably due to the epi. I stare at the ceiling and I feel this is surreal and not me. I still don’t quite realize what’s happening until the medical person standing on my left side asks the physician on my right, she’s having an anaphylactic reaction, isn’t she? The physician on my left says, “yes, she is.” The physician says to me your O2 sats are good, therefore you are breathing, so try not to be scared and keep talking to me. He holds my hand, telling me not to worry that he’s got this and I’m going to be fine. He then says your voice sounds raspy. Can you try to talk louder? I could not talk any louder. My fingertips turn blue, tears start coming down from my eyes, and my symptoms get worse. I began feeling like I was drowning, I tell him, it’s getting worse and I feel like I’m drowning! That’s when I got the second epinephrine injection. My body continued to shake but even worse. Then Finally, but slowly, the strangulation halted and my symptoms started getting better. It was going away! I could breathe a little better now and my voice starts getting stronger. Once I was out of danger. I realized I had been there for an hour, as I was wheeled to a hospital bed to wait for my body to regain normalcy again.

It was 8 pm when I finally left the hospital. The other girl that had the anaphylactic reaction like me went to ICU so I felt lucky to be going home. I felt awful still with a horrible headache. I couldn’t walk 20 steps without being sob and my throat felt like I had been kicked. My wonderful daughter picked me up as I couldn’t drive and helped me recuperate. This was by far the craziest thing that has ever happened to me in my life. I trust vaccines and medicine, and couldn’t believe what happened to me. I wanted to tell MY story so you could hear a true story from someone who lived through an anaphylaxis reaction after receiving the Covid vaccine. The first pic is when I sat and felt dizzy and the second pic was right before I was discharged.

I was saved by not only great health care personnel and medicine, but but the grace of God also. Thank you God for saving my life!

Thank you for listening to my story. Please be careful if you receive the Pfizer Covid vaccine and feel free to share my story... thank you to my friends and family that helped me recuperate. I couldn’t have done it without you. Love you all and feel so greatly that you are in my life.
Even more deaths and injuries reported from healthcare workers in private Facebook groups

Please lift up in prayer. I just had to leave her at Rush ER. She got the Covid Vaccine while at work yesterday and is having a serious reaction from it. She is totally numb on the left side of her body, having uncontrollable convulsions and says she is freezing. This is all that I know right now, I can't even go inside the building with her.

Tara Sekikawa
Dec 27, 2020
I went to work today and ended up in the ER. Thank god I work at a hospital. I'm positive this episode is from the Covid19 vaccine. I had tachycardia. My heart beat was 239. I haven't felt right since I got the injection on Tuesday. I have had a headache ever since. I will not be getting the 2nd shot. This was my experience with the vaccine I felt I should share it.

80% of care home staff in my town got covid 3 weeks after flu and CV jabs. All tested positive on the same day.

I'm asking for prayer. My son is a RN and had to take the vaccine. He's now horribly sick. Vomiting, shaking, in and out of consciousness. WOW.

Just had our second severe COVID vaccine reaction call... I'm a Paramedic on 1st call was CPR in progress, no underlying health conditions, 65 y/o, 1 day after Pfizer vaccine. And 57 y/o severe neurological issues/stroke like symptoms (weakness/ numbness in left side, can't move left arm, speech stuttering, severe headache, low BP) 2 days after Pfizer. .... here we go!

Debra Maurer
Yesterday at 10:07 PM
From my LNA who works at Dover Riverside Nursing Home: An update on the vaccine... it was administered Monday afternoon to the residents and last night during my 3-11 shift 4 residents died. That is completely unheard of. We never even have 4 go in one day.

She also said: Several of my coworkers had reactions and side effects as well. I'm not sure why they're experimenting on healthcare workers. What's going to happen when all the healthcare workers are harmed by this?

Deborah Lynn
Dec 24, 2020
My experience with the vaccine has been the most brutal experience I can even imagine.

I went into anaphylaxis shock. I had seizures. I feel confused. I feel weird. I don't feel like my self. I had cpr done. My heart was racing one minute, to them not being able to find it. One minute I'm talking, the next I'm past over shaking and unresponsive. Once I'm finally responsive, I have no clue where I am. The walls are moving, the lights on the ceiling are going round and round in the hospital.... there's no way a vaccine can make people feel like this right?

Lisa Owen
Dec 24, 2020

My cousin's daughter had the Pfizer covid vaccine. After her second one, she had a seizure. She's never had a seizure before. She's only 20 years old. She has had a negative. I unfortunately returned to work learning one of my residents had passed away who had got the vaccine. Of course it's being said it wasn't because of the vaccine. I am having a hard time even looking at my job the same way anymore. Most of the staff here had refused the vaccine to start with so it's hard to even compare experiences with my co-workers. I was told today that I should get another MMR

Eight days after I got it, I developed edema in my feet up to 3/4 of my shins. Still battling it and it started on Christmas. At it's worst, it got to 3-4+ edema.

Should have listened to you. I am so sick!!!! The worst headache of my life, shortness of breath, dizzy, can't seem to warm up. I am telling you right now I am not getting a second dose. I am literally scared to go to sleep. I feel like I am going to have a panic attack every time I barely doze off. Help...
My grandfather's doctor in his early 70s died from a heart attack within 24 hours after getting this 'vaccine'. He received Moderna but Pfizer is the same shit. He had no underlying health conditions and was a healthy doctor still practicing in his early 70s. His office staff are 100% convinced his heart attack was caused by this 'vaccine'. My grandparents won't be taking this shot.

Sad my mum died at home three and a half hours post Pfizer vaccination. Had shown no adverse symptoms to vaccination prior death. Found unconscious on toilet floor but breathing prior death. Eighty eight years old, frail with underlying medical condition.

My dad passed of Covid last year, so we couldn't wait for mom to be vaccinated. She passed away the day after receiving the booster shot, was this coincidental, I guess we will never know. But it shattered our world again❤️

My uncle took the Pf on Jan 22 and he got so sick and was hospitalized and passed on the 9th of Feb. He was a healthy 84 yr old!

My next door neighbour got the vaccine yesterday. He's dead today. We have been told by relatives that he died of a heart attack. He was in his 70s this cannot be a coincidence.

So my 27 year old daughter is in hospital with abnormal heart rhythm and burning pain in her head and spine .. and a pulse rate of 150 after receiving Pfizer vaccine .. anyone else got the same issues.. she's only 27 ?

My mother in law had the covid vaccine on Saturday two weeks ago rushed to hospital on Sunday next morning breathing difficulties, they have done an X-ray and found a bit of fluid at the bottom of her left lung. Breathing better though now .. until the next dose ༼ つ﹏́ つ༽

My doctor's long term receptionist died after taking the 2nd Pfizer "vaccine" on Jan 22, 2021. She was 50 years old, healthy and exercised regularly. Her best friend said she had no underlying medical problems. She was laughing at work when she left to take the 2nd "vaccine" at a hospital 1 hr away. On the way home she felt horrible and wasn't able to walk by 3:30 pm when she got home. She was taken to a local hospital where she died of blood clots in her lungs that night. Blood clots have been listed as a side effect of the so called "vaccine."

Despite my pleading, dad took the covid "vaccine" a couple days ago. This morning he passed out for the first time in his life and was taken by ambulance to the ER with weak heart issues. If something happens to him, I will not rest until all involved are held accountable.

Our son-in-law's friends step dad just got Moderna, 2nd dose, a few days ago and is now in the hospital paralyzed.

From a friend. "Just had an update on my cousin who is in hospital. He and his wife volunteered to take part in some American covid vaccine trials where they live in Exmoor. A couple of days later my cousin was very unwell and his lips turned blue. His wife used to be a nurse and she also said she felt a bit unwell. However......they still flew to Tenerife where they go every year from the first week in December to the second week in February. On landing at the airport he took a turn for the worse and took a covid test which was negative. They continued to the villa and got on with their holiday. A few days later he collapsed on his way back from the shops and was taken to hospital. Still negative for covid so decided to fly back to UK. A few days after that he had to be taken to hospital. They thought he had had a heart attack and also possibly a blood clot and he was put on meds. He then got breathing problems. All this time his wife can't visit him and they have been trying to tell the doctors they think it was to do with the trials. The American trial people aren't interested and the hospital haven't contacted them to get data as they are convinced it is a heart defect. His brother phoned me this morning to say he is now on oxygen, the doctors think he has damaged the muscles in his heart and he has fluid round his lungs compressing them. They are giving him tablets to try and reduce the fluid. They said his heart is out of rhythm but they can't restart it because of the risk of his lungs. He is the fittest person you have met. He used to swimming and physical training and exercised day of his life."
LET'S LOOK AT

VAERS
THE VACCINE ADVERSE EVENT REPORTING SYSTEM
VAERS is a passive surveillance system in the U.S. which captures adverse events following vaccination. 'Events' are reported by hospital staff, nursing home staff, doctors, etc. This data is searchable at: https://wonder.cdc.gov/vaers.html
Listed on the following pages are only 70 of the 1,739 deaths recorded in VAERS. Anyone can view the database via the following steps:

https://wonder.cdc.gov/vaers.html

1. Accept the disclaimer at bottom of page
2. Click on VAERS data search
3. In section 1, click on group results by "VAERS ID", and by "vaccine type" and by "event category"
4. Under optional measures (still in section 1) tick off "adverse event description"
5. Scroll down to section 3 and under Vaccine Products select "Covid19 vaccine" Make sure it is the only option selected. (You will have to deselect "All vaccine products" from the top of the list.)
6. Scroll down to section 5 and under event category select "death". Make sure it is the only option selected. (Don’t forget to deselect “all events” from the top of the list.)

Scroll to the very bottom and click send.

VAERS ID # 946293-1  AGE 51. MALE Vaccinated 1/7/2021. Moderna. Became increasingly hypoxic around 1800hours on 1/7/2021. Transported to ER for acute on chronic hypoxia respiratory failure. Expired on 1/12/2021@2325 at med center.

VAERS ID # 930910-1  AGE 52. FEMALE Vaccinated 1/8/2021. Died 1/8/2021. Patient received COVID vaccination 12:15pm. Patient was monitored for the appropriate amount of time by nursing staff. Patient passed away at 2:15pm. Moderna

VAERS ID # 933739-1  AGE 54. FEMALE. Vaccinated 1/8/2021. Died 1/10/2021. 2 days later. Staff member checked on her at 3am and patient stated that she felt like she couldn't breathe. 911 was called and taken to the hospital. While in the ambulance, patient coded. Two EEGs were given to determine that patient had no brain activity. Pfizer

VAERS ID # 923219-1  AGE 41. FEMALE Vaccinated 12/30/2021. Died 1/1/2021. Pfizer vaccine. The patient did not experience any adverse event at the moment of inoculation with COVID-19 vaccine or the following days. On January 1, 2021, at lunch time, two days after receiving the vaccine, the patient was found unresponsive in her bed by her partner.

VAERS ID # 936805-1  AGE 25. MALE Vaccinated 12/22/2020. Found unresponsive and expired at home on 1/11. Moderna

VAERS ID # 943397-1  AGE 28. MALE Vaccinated 12/23/2020. Died 1/14/2021. Patient was found unresponsive at work in the hospital. Patient pupils were fixed and dilated. Pfizer

VAERS ID # 939050-1  AGE 39. FEMALE Vaccinated 12/29/2020. It was reported that the staff member deceased somewhere between 1/3/2021 and 1/4/2021. Pfizer

VAERS ID # 929764-1  AGE 45. MALE Vaccinated 12/28/2020. Died 12/29/2020. The patient was found deceased at home about 24 hours after immunization. Moderna

VAERS ID # 934968-1  AGE 54. MALE Vaccinated 1/4/2021. Died 1/6/2021. Pfizer. The patient received the vaccine on 04Jan2021, after which he started not feeling well. He went right home and went to bed. He woke up and ate a bit but not much and then was kind of pale. The patient then started to vomit, which continued throughout the night. He was having trouble in breathing. Emergency services were called, and they took his vitals and said that everything was okay, but he was very agitated; reported as not like this prior to the vaccine. The patient was taken to urgent care where they gave him an unspecified steroid shot and unspecified medication for vomiting. The patient continued to vomit throughout the day and then he was very agitated again and would fall asleep for may be 15-20 minutes. When the patient woke up, he was very restless (reported as: his body was just amped up and could not calm down). The patient calmed down just a little bit in the evening. When the patient was awoken at 6:00 AM in the morning, he was still agitated. The patient stated that he couldn't breathe, and his mind was racing. The patient's other brother went to him and he was not responsive, passed on 06Jan2021 around 10:15 AM. It was reported that none of the symptoms occurred until the patient received the vaccine.

VAERS ID # 942106-1  AGE 54. MALE Vaccinated 1/8/2021. Died 1/9/2021. Pfizer vaccine. On scene, the patient had a witnessed arrest with EMS starting CPR. He was given 3 rounds of epi without ROSC. Patient's wife, had noted patient had received covid vaccine the prior day.

VAERS ID: 924456-1, AGE 85 vaccination was administered at approx. 10:00 AM and the patient continued throughout day without any complaints or signs of adverse reaction. When the nursing staff went to the room to check on the resident patient was found unresponsive, no chest rises, noted regurgitated small amount of food to mouth left side.
VAERS ID # 996156-1  AGE 58. FEMALE Vaccinated on 02/02/2021. Moderna. Observed by vaccination team for a period of time. She reported shoulder pain radiating into shoulder blade in arm vaccine was received. Vaccination team offered ice pack to her and released back to work. 10pm that evening, she sent text to coworker that her pain was "off the charts" and that she had pain covering her whole left side of her body. She did not come to work in the morning and did not contact work. Well being check was performed at approximately 9am on 2/2/2021 and she was found dead in her home.

VAERS ID # 935511-1  AGE 56. FEMALE Vaccinated 1/8/2021. Died 1/9/2021. Moderna. Patient received the 1st dose of Moderna and was found deceased in her home the next day.

VAERS ID # 941811-1  AGE 56. FEMALE Vaccinated 1/4/2021. Died 1/11/2021. Moderna. Resident began having fever on 1/11/21. Resident sent to nearest ER for evaluation. Later in the evening the staff AT Medical Center called to inform staff that resident had expired @ 2230 as a result of Respiratory Failure and Sepsis.

VAERS ID # 944595-1  AGE 56. MALE Vaccinated 1/12/2021. Died 1/14/2021. Pfizer. Cardiac arrest within 1 hour Patient had the second vaccine approximately 2 pm on Tuesday Jan 12th He works at the extended care community and was in good health that morning with no complaints. He waited 10-15 minutes at the vaccine admin site and then told them he felt fine and was ready to get back to work. He then was found unresponsive at 3 pm within an hour of the 2nd vaccine. EMS called immediately worked on him 30 minutes in field then 30 minutes at ER was able to put him on life support yet deemed Brain dead on 1-14-21 and pronounced dead an hour or so later.

VAERS ID # 941743-1  AGE 60. FEMALE Vaccinated 1/12/2021. Died 1/13/2021. Moderna. Found deceased at 3am

VAERS ID # 932898-1  AGE 61. MALE Vaccinated 12/17/2020. Died. 12/30/2020. Pfizer vaccine. The patient had an apparent cardiac arrest on 12/23/20 and was admitted to the ICU. He was taken off of life support on 12/30/20.

VAERS ID # 942085-1  AGE 62. FEMALE Vaccinated 1/2/2021. Died 1/8/2021. Pfizer. On 1/8/21 at 0615 resident was shaking. Reported all over pain. At 0850 she was not responsive.

VAERS ID # 940955-1  AGE 66. FEMALE. Vaccinated 1/11/2021. Died 1/11/2021. Pfizer. Cardiac Arrest. Patient was found pulseless and breathless 20 minutes following the vaccine administration. Received the second dose of BNT162B2. Took the first dose on 21Dec2020. MD found no signs of anaphylaxis.

VAERS ID: 926600-1, 65yo Patient did not report any signs or symptoms of adverse reaction to vaccine. Patient reported not feeling well and passed away that day.

VAERS ID: 925154-1, 84yo DEATH within 1 day, no current illness.

VAERS ID: 926797-1, 93yo had a vaccination on 12/31/2020 late morning passed away early morning 01/01/2020.

VAERS ID: 927189-1, 74yo Patient was vaccinated at 11am and was found at the facility in his room deceased at approximately 3:00pm. Nurse did not have cause of death

VAERS ID: 927260-1, 87yo No adverse effects noted after vaccination. Patient found unresponsive at 16:45 on 1/6/21. Abnormal breathing patterns, eyes partially closed SPO2 was 41%, pulseless with no cardiac sounds upon auscultation. CPR, pulse regained, patient breathing. Patient sent to ER had multiple cardiac arrest and severe bradycardia and passed.

VAERS ID: 924664-1, 92yo No current illness. At 1855, I was alerted by caregiver, resident was not responding. Per caregiver, she was doing rounds and found resident in bed, unresponsive, mouth open, observed gurgling noises. Primary caregiver observed resident at baseline and ambulating after dinner at approximately, 1800 less than an hour prior to incident. Resident received the first dose of vaccine on 1/2. Expired at 0615 per Castle RN.

VAERS ID: 909095-1, 66yo on 12/24/2020 the resident was sleepy and stayed in bed most of the shift. He stated he was doing okay but requested pain medication for his legs at 250PM. At 255AM on 12/25/2020 the resident was observed in bed lying still, pale, eyes half open and foam coming from mouth and unresponsive. He was not breathing and with no pulse.

VAERS ID: 924464-1, 61yo coughing up blood, significant hemoptysis --> cardiac arrest. started day after vaccine

VAERS ID: 921768-1, 58yo Vaccine received at about 0900 on 01/04/2021 at her place of work, Medical Center, where she was employed as a housekeeper. About one hour after receiving the vaccine she experienced a hot flash, nausea, and feeling like she was going to pass out after she had bent down. Later at about 1500 hours she appeared tired and lethargic, then a short time later, at about 1600 hours, upon arrival to a friend’s home she complained of feeling hot and having difficulty breathing. She collapsed, when medics arrived, she was still breathing slowly then went into cardiac arrest and was unable to be revived.

VAERS ID: 910363-1, 84yo Patient had mild hypotension, decreased oral intake, somnolence starting 3 days after vaccination and death 5 days after administration.

VAERS ID: 913143-1, 84yo Vaccine administered with no immediate adverse reaction at 11:29am. Vaccine screening questions were completed and resident was not feeling sick and temperature was 98F. At approximately 1:30pm the resident passed away.

VAERS ID: 913733-1, 85yo My grandmother died a few hours after receiving the moderna covid vaccine booster 1. The treating hospital did not acknowledge this and I wanted to be sure a report was made.

VAERS ID: 914604-1, 74yo Spouse awoke 12/20 and found spouse dead. Client was not transferred to hospital.

VAERS ID: 914690-1, 83yo Within 24 hours of receiving the vaccine, fever and respiratory distress, and anxiety developed requiring oxygen, morphine and ativan. My Mom passed away on the evening of 12/26/2020.

VAERS ID: 914805-1, 63yo RESIDENT CODED AND EXPIRED

VAERS ID: 914895-1, 78yo Injection given on 12/28/20 - no adverse events and no issues yesterday; Death today, 12/30/20,

VAERS ID: 914917-1, 63yo Death by massive heart attack. Pfizer-BioNTech COVID-19 Vaccine EUA

VAERS ID: 914961-1, 88yo pt passed away with an hour to hour and 1/2 of receiving vaccine.

VAERS ID: 914994-1, 90yo pt was a nursing home pt. pt received first dose of covid vaccine. pt was monitored for 15 minutes after getting shot. staff reported that pt was 15 days post covid. Pt passed away with in 90 minutes of getting vaccine.

VAERS ID: 915562-1, 88yo pt received vaccine at covid clinic on 12/30 at approximately 3:30, pt vomited 4 minutes after receiving shot--dark brown vomit, Per staff report pt became short of breath between 6 and 7 pm that night. Pt passed away at approximately 10pm.

VAERS ID: 915682-1, 85yo Resident received vaccine per pharmacy at the facility at 5 pm. Approximately 6:45 resident found unresponsive and EMS contacted. Upon EMS arrival at facility, resident went into cardiac arrest, code initiated by EMS and transported to hospital. Resident expired at hospital at approximately 8 pm

VAERS ID: 915920-1, 96yo Resident was living in an assisted living facility. She fell on 11/24/2020 and was admitted to this facility for rehab. Received vaccine 12/28/2020 in am and expired that afternoon.
VAERS ID: 918065-1, 64yo Vaccine 12/30/2020. 1/1/2020: Pronounced deceased 1/1/2020

VAERS ID: 918388-1, 65yo Vaccine 12/30/2020. 1/1/2020: Resident found unresponsive without pulse, respirations at 04:30 CPR performed, expired at 04:52 by Rescue, No acute illness at time of vaccination.

VAERS ID: 918418-1, 65yo Vaccine 12/30/2020. 1/1/2020: Resident became SOB, congested and hypoxic requiring oxygen, respiratory treatments and suctioning. Stabilized after treatment and for the next 72 hours with oxygen saturations in the 90s. On 1/3/2021 was found without pulse and respirations.

VAERS ID: 918487-1, 94yo Two days post vaccine patient went into cardiac arrest and passed away.

VAERS ID: 915880-1, 99yo Patient died within 12 hours of receiving the vaccine.

VAERS ID: 919108-1, 100yo Fever, Malaise, passed the day after vaccine.

VAERS ID: 919537-1, 96yo Resident exhibited no adverse events during 30 minute monitoring following vaccine administration. Resident found without pulse at 1900.

VAERS ID: 920326-1, 89yo Redness and warmth with edema to right side of neck and under chin. Resident expired on 1.1.21.

VAERS ID: 920545-1, 93yo "The resident received is vaccine around 11:00 am and tolerated it without any difficulty or immediate adverse effects. He was at therapy from 12:36 pm until 1:22 pm when he stated he was too tired and could not do anymore. The therapist took him back to his room at that time and he got into bed himself but stated his legs felt heavy. At 1:50 pm the CNA answered his call light and found he had taken himself to the bathroom. She stated that when he went to get back into the bed it was ""abnormal"" how he was getting into it so she assisted him. At that time he quit breathing and she called a RN into the room immediately. He was found without a pulse, respirations, or blood pressure at 1:54 pm.

VAERS ID: 920815-1, 58yo Found deceased in her home, unknown cause, 6 days after vaccine.

VAERS ID: 920832-1, 104yo Vaccine 12/30/2020 Screening PCR done 12/31/2020 Symptoms 1/1/2021 COVID test result came back positive 1/2/2021 Deceased 1/4/2021

VAERS ID: 921175-1, 77yo Resident received Covid Vaccine, noted after 30 mins with labored breathing BP 161/77, HR 116, R 38, T 101.4, epipen administered, sent to ER, died

VAERS ID: 921481-1, 88yo Vaccine given on 12/29/20 by Pharmacy. On 1/1/21, resident became lethargic and sluggish and developed a rash on forearms. Resident expired on 1/4/2021

VAERS ID: 921572-1, 87yo Resident had body aches, a low O2 sat and had chills starting on 12/30/20. He had stated that they had slightly improved. On 1/2/21 during the NOC shift his O2 sat dropped again. He later went unresponsive and passed away.

VAERS ID: 921667-1, 39yo LTCF Pfizer Vaccine clinic conducted 12/29/2020 Vaccine lead received a call indicating that a staff member deceased somewhere between 1/3/2021 and 1/4/2021. Cause of death is unknown, and an autopsy is being performed.

VAERS ID: 921880-1, 96yo The resident was found deceased a little less than 12 hours following COVID vaccination.
If you are injured by the COVID vaccine, it will be nearly impossible to receive compensation for lost work days and medical bills.

You can’t sue Pfizer or Moderna if you have severe Covid vaccine side effects. The government likely won’t compensate you for damages either.

If you experience severe side effects after getting a Covid vaccine, lawyers tell CNBC there is basically no one to blame in a U.S. court of law.

The federal government has granted companies like Pfizer and Moderna immunity from liability if something unintentionally goes wrong with their vaccines.

“It is very rare for a blanket immunity law to be passed,” said Rogge Dunn, a Dallas labor and employment attorney. “Pharmaceutical companies typically aren’t offered much liability protection under the law.“

You also can’t sue the Food and Drug Administration for authorizing a vaccine for emergency use, nor can you hold your employer accountable if they mandate inoculation as a condition of employment.

Congress created a fund specifically to help cover lost wages and out-of-pocket medical expenses for people who have been irreparably harmed by a “covered countermeasure,” such as a vaccine. But it is difficult to use and rarely pays. Attorneys say it has compensated less than 6% of the claims filed in the last decade.
The FDA has had 10 months to get a safety monitoring system in place, but is nowhere near implementing one.

02/19/21 • BIG PHARMA • NEWS

One-Third of Deaths Reported to CDC After COVID Vaccines Occurred Within 48 Hours of Vaccination

The numbers reflect the latest data available as of Feb. 12 from the CDC’s Vaccine Adverse Event Reporting System website. Of the 929 reported deaths, about one-third occurred within 48 hours.

As is consistent with previous VAERS data reports, 192 of the reported deaths — or 21% — were cardiac-related. As The Defender reported earlier this month, Dr. J. Patrick Whelan, a pediatric rheumatologist, warned the U.S. Food and Drug Administration in December that mRNA vaccines like those developed by Pfizer and Moderna could cause heart attacks and other injuries in ways not assessed in safety trials.

Of the 929 deaths reported since Dec. 14, 2020, the average age of the deceased was 77.8 and the youngest was 23. Fifty-two percent of the reported deaths were among men, 45% were women and 3% are unknown. Fifty-eight percent of the deaths were reported in people who received the Pfizer vaccine, and 41% were related to the Moderna vaccine.

States with the highest reported number of deaths were: California (71); Florida (50); Ohio (38); New York (31); Kentucky (41); Michigan (31); and Texas (31).

According to the latest data, 3,126 “serious” adverse reactions have been reported. Adverse reaction reports from the latest CDC data also include:

- 34 miscarriages and pre-term births
- 917 anaphylactic reactions, 70% of which were reported after a Pfizer vaccine and 30% after the Moderna vaccine
- Bell’s palsy (Pfizer 75%; Moderna: 25%)

So far, only Pfizer and Moderna vaccines — approved for emergency use, but not fully licensed — are being used in the U.S.

Meanwhile, the FDA has not yet implemented systems to monitor the safety of the experimental COVID vaccines. FDA officials told The New York Times they don’t expect the systems to be up and running before the Biden administration reaches its goal of vaccinating 100 million Americans — nearly one third of the U.S. population.
BREAKING: UK gov’t says over 240 people in Britain died shortly after receiving COVID jab

The report included in its ancillary material the information that a total of 8 miscarriages have been reported.

LONDON, England, February 11, 2021 (LifeSiteNews) — A U.K. government vaccine safety review has revealed that 244 people, including 8 unborn babies, have died in Britain shortly after receiving one of the two coronavirus vaccines. The government has said that it does not believe the inoculations are responsible.

An extensive report produced by the U.K. government today has detailed all the suspected side effects, including death, reported by medical staff or the people who received at least one Covid-19 vaccine between early December 2020 and January 31, 2021. The two vaccines currently in use in the U.K. are the Pfizer/BioNTech and the Oxford University/AstraZeneca. They were authorized by the country’s Medicines and Healthcare products Regulatory Agency (MHRA).

The MHRA monitors the safety of the vaccines as they are used on the public, and to this end they introduced a “Yellow Card Scheme” to collect reports of any suspected side effects. 20,290 Yellow Card reports, including a total of 59,614 suspected adverse reactions, were made regarding the Pfizer vaccine, 11,748 were made regarding the AstraZeneca vaccine, which was rolled out only on January 4, 2021. 72 Yellow Card reports did not specify which vaccine was used.

According to the report:

The MHRA has received 143 UK reports of suspected ADRs to the Pfizer/BioNTech vaccine in which the patient died shortly after vaccination, 90 reports for the Oxford University/AstraZeneca vaccine and 3 where the brand of vaccine was unspecified.

The report included in its ancillary material the information that 5 miscarriages were reported after the use of the Pfizer vaccine and 3 after the Oxford vaccine.

Suspected adverse reactions after receiving Pfizer/BioNTech vaccine
A total of 59,614 suspected side effects were recorded after use of the Pfizer/BioNTech vaccine.

The link to the Pfizer vaccine analysis shows clearly that 1,437 blood disorders have been reported after inoculation, 1,204 of them being lymphadenopathy (enlarged or swollen lymph nodes). 712 cardiac disorders were reported, notably palpitations (303) and a speeding heart rate (230). 445 ear disorders were reported, including vertigo (146), ear pain (122), and varying amounts of hearing loss (51).

However, there have been reports of more serious damage associated with the vaccine, notably anaphylaxis and Bell’s Palsy. Now 130 “spontaneous adverse reactions associated with anaphylaxis or anaphylactoid reactions” in Britain have been reported for the Pfizer vaccine, and 30 have been reported for the Oxford vaccine. Bell’s Palsy, which involves facial paralysis or weakening of the facial muscles, has been reported 99 times for the Pfizer vaccine and 15 times for the Oxford vaccine. The MHRA says that because this ailment “can also occur naturally, an association with the vaccine in not yet confirmed.”

There were 224 injuries reported, and 357 metabolic disorders, of which 252 were decreased appetite. 8,129 muscle and tissue disorders were mentioned, of which 2,699 were muscle pain and 1,704 were joint pain. 11,960 nervous disorders were reported, including 5,356 headaches, 1,546 cases of dizziness, 45 seizures, 45 cases of paralysis, and 1 case of locked-in syndrome. There were 5 miscarriages reported.

Of the 830 psychiatric disorders reported, 162 were insomnia, 112 cases of being in a confused state, and 73 bouts of anxiety. Of the 120 renal & urinary disorders, 35 were renal pain and 12 were urinary incontinence. There were 187 reproductive and breast disorders mentioned, of which 31 were breast pain and 22 menorrhagia (heavy periods).

There were 2,397 respiratory disorders reported, including 520 cases of difficulty in breathing, 483 sore throats, and 446 cases of coughing. 3,947 skin disorders were reported, including at least 796 rashes and 776 cases of itchiness. The 676 vascular disorders on record included 182 hot flushes.

There were 823 references to eye disorders, including 145 reports of eye pain, 126 of blurred vision, and 5 of blindness. 6,605 gastrointestinal orders were reported, among them 2,889 cases of nausea, 924 cases of diarrhea, 775 cases of vomiting, and 283 cases of upper abdominal pain. Of the 19,354 “general disorders” reported, 4,007 were cases of fatigue, 3,665 were fevers, 2,310 were chills, 773 referred to vaccination site pain, 491 were “influenza-like illnesses.” There were 308 immune system disorders, mostly hypersensitivity (146) and anaphylactic reactions (116).

Ironically, there were 1,186 reported infections, including 508 cases (including “suspected cases”) of Covid-19 itself, 231 cases of influenza, and 154 upper respiratory tract infections.
LET'S LOOK AT THE TRIALS
The 95% effective claim by Pfizer is based on
ONLY 170 trial participants.

no one in the trial was tested for the development of antibodies

What you need to know about the COVID Vaccine

EFFECTIVENESS:

Claim: 95% effective

What this claim is based on:

Although there were a total of 43,548 trial participants in Pfizer’s phase 3 trial, their calculation of effectiveness is based on a total of 170 participants.

These 170 participants were the first to develop symptoms of COVID and test positive for SARS-CoV-2, within the two-month monitoring period starting 7 days after the administration of the second vaccine.

From the chart below, it states that of the first 170 participants to develop symptoms and test positive for SARS-CoV-2, 162 of them were placebo recipients and 8 were vaccine recipients.

This is where the “95% effective” calculation comes from.

Source: Pfizer Vaccine Insert.

However, the rest of the participants were not tested for infection, nor were they tested for the development of antibodies, which is the endpoint typically used to measure vaccine effectiveness.

The published phase 3 clinical trial states the following “Limitations and Remaining Questions”:

LIMITATIONS AND REMAINING QUESTIONS

Further study is required to understand the following:

- Safety and efficacy beyond 2 months and in groups not included in this trial (e.g., children, pregnant women, and immunocompromised persons).
- Whether the vaccine protects against asymptomatic infection and transmission to unvaccinated persons.
- How to deal with those who miss the second vaccine dose.

Note: Remaining questions include “whether the vaccine protects against asymptomatic infection and transmission”.

First COVID-19 occurrence from 7 days after Dose 2 in participants with or without evidence of prior SARS-CoV-2 infection

Note: Confirmed cases were determined by Reverse Transcription Polymerase Chain Reaction (RT-PCR) and at least 1 symptom consistent with COVID-19 (symptoms included: fever, new or increased cough, new or worsened shortness of breath, chills, new or worsened muscle or body aches, new loss of taste or smell, sore throat, diarrhea, nausea, vomiting).

a. = number of participants in the specified group.
b. n= = Number of participants meeting the endpoint definition.
c. Total surveillance time in 300 person-years for the given endpoint across all participants within each group at risk for the endpoint.
d. = Number of participants at risk for the endpoint.
Up next...testing brand new mRNA technology on children as young as 6 months old...and pregnant women. Testers are using the meningitis vax as their 'placebo' so they can eliminate known vaccine side effects (like seizures!)

Andrew Pollard, professor of paediatric infection and immunity, and chief investigator on the Oxford vaccine trial, said: 'While most children are relatively unaffected by coronavirus and are unlikely to become unwell with the infection, it is important to establish the safety and immune response to the vaccine in children and young people as some children may benefit from vaccination.

'These new trials will extend our understanding of control of SARS-CoV2 to younger age groups.'

The first vaccinations under the trial will take place this month, with up to 240 children receiving the vaccine and the others receiving a control meningitis jab.

Former Top Pfizer Scientist Michael Yeadon Claims COVID Vaccines May Cause Infertility In Women

Should we assume the risks of this vaccine when we have NO long term safety studies and we now know it does NOT prevent transmission of the virus?

Coronavirus czar Nachman Ash says the first dose of Pfizer’s vaccine is turning out to provide less protection against COVID-19 than the US pharmaceutical firm had initially indicated it would, Army Radio reports.

Many people have gotten infected between the first and second Pfizer shots, he reportedly says, and it appears the protection offered by the first dose is “less effective than we had thought.” The data on the protective effect against the virus of the first dose, it is estimated, is “lower than Pfizer presented,” he is quoted saying.

Coronavirus digest: German nursing home sees outbreak after vaccines

Fourteen residents at a German nursing home have tested positive despite receiving two vaccine doses. Markus Söder has warned against lifting Germany’s lockdown too soon. All

They all received BOTH vax doses yet still caught Covid?
A typical vaccine safety trial lasts a MINIMUM of 2 years. Pfizer & Moderna have ENDED their safety trials after only 7 months by allowing placebo recipients to receive the vaccine. This eliminates all possibilities of capturing long-term adverse effects.

Below (were) the end dates of the Pfizer & Moderna trials.

Vaccine trial participants who received placebo now hop the line for the real thing from Pfizer, Moderna

By JUDY PERES
CHICAGO TRIBUNE | JAN 14, 2021

Good news for tens of thousands of volunteers in the COVID-19 vaccine trials: Many of those who received a placebo are now being offered a vaccine — in some cases, earlier than they would otherwise have been eligible.

Participants in Pfizer’s vaccine study — some of whom had mounted a noisy campaign on social media — have been advised that anyone who wants one can receive the first of two shots by March 1. Participants in Moderna’s vaccine trial already are getting immunized.

That wasn’t always the plan, and some experts fear “unblinding” volunteers — that is, letting them know whether they got the vaccine or a placebo — could make it difficult to collect good, long-term data on the experimental vaccines, including how safe they are and when their immunity starts to wane. But others argue it would be unfair to leave trial participants unprotected from a raging pandemic when an effective vaccine is available.

Long-Term Studies Of COVID-19 Vaccines Hurt By Placebo Recipients Getting Immunized

February 19, 2021, 5:00 AM ET

Tens of thousands of people who volunteered to be in studies of the Pfizer-BioNTech and Moderna COVID-19 vaccines are still participating in follow-up research. But some key questions won’t be easily answered, because many people who had been in the placebo group have now opted to take the vaccine.

Dr. Steven Goodman, a clinical trials specialist at Stanford University, says losing those control groups makes it more difficult to answer some important questions about COVID-19 vaccines.

“We don’t know how long protections lasts,” he says. “We don’t know efficacy against variants — for which we definitely need a good control arm — and we also don’t know if there are any differences in any of these parameters by age or race or infirmity.”

Official Title:
A Phase 3, Randomized, Stratified, Observer-Blind, Placebo-Controlled Study to Evaluate the Efficacy, Safety, and Immunogenicity of mRNA-1273 SARS-CoV-2 Vaccine in Adults Aged 18 Years and Older

Actual Study Start Date:
July 27, 2020

Estimated Primary Completion Date:
October 27, 2022

Estimated Study Completion Date:
October 27, 2022

Official Title:
A PHASE 1/2/3, PLACEBO-CONTROLLED, RANDOMIZED, OBSERVER-BLIND, DOSE-FINDING STUDY TO EVALUATE THE SAFETY, TOLERABILITY, IMMUNOGENICITY, AND EFFICACY OF SARS-COV-2 RNA VACCINE CANDIDATES AGAINST COVID-19 IN HEALTHY INDIVIDUALS

Actual Study Start Date:
April 29, 2020

Estimated Primary Completion Date:
August 3, 2021

Estimated Study Completion Date:
January 31, 2023
Also up next, the rollout of the J&J vaccine

"Dec 18th 2020 – My Dad participated in the Johnson & Johnson Trial COVID vaccine shot. They promised all medical expenses paid for any complications related to COVID for the next 2 years. My Dad found security in the medical expense coverage and possibility to have access to a vaccine- that he decided to do the trial.

Dec 25th 2020 - One week later- Christmas Day – Dad was very fatigued. He felt tired right after the shot and when I spoke with him on Christmas day. I recall he sounded exhausted. Which is unlike him, especially on Christmas.

Jan 4th 2021 By the first of the year, he was very sluggish and found it hard to do his exercises that he does weekly. He always likes to stay active.

Jan 11th – 18th. Asthma like symptoms, harder to get through his workouts. Very short of breath and started to be winded very easily. Low grade fevers. Hard to make it through calls at work.

Jan 25th – Dad contacted Johnson & Johnson and they did a COVID test. Results came back 3 days later as negative. They advised he has flu like symptoms and to rest and drink lots of fluids.

Jan 29th – My Dad could barely walk. His legs became so weak that he shaked when he walked. He thought maybe he was battling a flu and tried to keep resting through the weekend in hopes he would feel better.

Feb 1st - my mom brought him to Lake Mary Emergency room and they immediately transported him via ambulance to Advent Altamonte because of very high troponin levels.

Feb 1st – 4th -My Dad was at Advent Health Altamonte where they ran all kinds of tests and discharged him on the night of Feb 4th. Referring him to an oncologist, infectious disease Dr. cardiologist and PCP.

Feb 5th- Friday I saw my Dad at 11 AM and he could not walk and was very lethargic and sleepy. I called and made all his referral appointments and scheduled him to see his PCP first thing Monday.

Feb 6th- Saturday, I woke up at 6 AM and drove to my parents house and my Dad was completely out of it. He could not get out of bed, pick up his coffee to drink, lift his head. He did not know what year, day, month we were in. We took him to Advent Orlando and within 20 minutes they got him in and found a blood infection and swelling in brain.

Feb 20th We have been here 2 weeks today, and today my Dad started on dialysis.

I am not an anti-vaxer by any means. But I think there should be some public awareness of the dangers of being part of a trial vaccine. Especially one that is being done in warp speed. And the chance I would recommend someone to get the Johnson & Johnson vaccine, is slim to none. They have denied any type of connection.”

Yarah Dalmau

My Dad took his last breath today on this Earth. I can’t wait for our dance in heaven.
May he rest with our Lord 🙏

In 1976 the rushed-to-market Swine Flu vaccine was quickly pulled from the market...after 'only' 25 deaths.

"In 1976, the US halted the Swine Flu vaccine after 6 weeks for 25 deaths & 362 cases of Guillain-Barre neurological injuries. With Coronavirus vaccines, (after 8 weeks) we are already at 501 deaths, 147 cases of Anaphylaxis, & 128 cases of Bell's Palsy." - Toby Rogers
LET'S LOOK AT

THE LAWS
Federal Law states employers, schools, organizations cannot mandate an EAU vaccine.

Ever since the Food and Drug Administration granted emergency use authorization for two new vaccines, employers, schools, and other organizations are grappling with whether to require Covid-19 vaccination.

While organizations are certainly free to encourage their employees, students, and other members to be vaccinated, federal law provides that, at least until the vaccine is licensed, individuals must have the option to accept or decline to be vaccinated.

EUAs are clear: Getting these vaccines is voluntary

The same section of the Federal Food, Drug, and Cosmetic Act that authorizes the FDA to grant emergency use authorization also requires the secretary of Health and Human Services to “ensure that individuals to whom the product is administered are informed ... of the option to accept or refuse administration of the product.”

Likewise, the FDA’s guidance on emergency use authorization of medical products requires the FDA to “ensure that recipients are informed to the extent practicable given the applicable circumstances ... That they have the option to accept or refuse the EUA product ...”

In the same vein, when Dr. Amanda Cohn, the executive secretary of the CDC’s Advisory Committee on Immunization Practices, was asked if Covid-19 vaccination can be required, she responded that under an EUA, “vaccines are not allowed to be mandatory. So, early in this vaccination phase, individuals will have to be consented and they won’t be able to be mandatory.” Cohn later affirmed that this prohibition on requiring the vaccines applies to organizations, including hospitals.

Much remains unknown about the safety and efficacy of the vaccine

Even though the FDA granted emergency use authorizations for the Pfizer/BioNTech and Moderna vaccines in December 2020, the clinical trials the FDA will rely upon to ultimately decide whether to license these vaccines are still underway and are designed to last for approximately two years to collect adequate data to establish if these vaccines are safe and effective enough for the FDA to license.

The abbreviated timelines for the emergency use applications and authorizations mean there is much the FDA does not know about these products even as it authorizes them for emergency use, including their effectiveness against asymptomatic infection, death, and transmission of SARS-CoV-2, the virus that causes the disease.
Is forcing someone to take the COVID vaccine in violation of the Nuremberg Code?

What Are The Nuremberg Code's Ethical Guidelines For Research?

The Nuremberg Code aimed to protect human subjects from enduring the kind of cruelty and exploitation the prisoners endured at concentration camps. The 10 elements of the code are:

1. Voluntary consent is essential
2. The results of any experiment must be for the greater good of society
3. Human experiments should be based on previous animal experimentation
4. Experiments should be conducted by avoiding physical/mental suffering and injury
5. No experiments should be conducted if it is believed to cause death/disability
6. The risks should never exceed the benefits
7. Adequate facilities should be used to protect subjects
8. Experiments should be conducted only by qualified scientists
9. Subjects should be able to end their participation at any time
10. The scientist in charge must be prepared to terminate the experiment when injury, disability, or death is likely to occur

As the COVID vaccine was approved as an emergency measure, it is still classified as 'experimental.' It is not FDA approved. Therefore it violates 6 elements of the Nuremberg Code including:

**Number 1** - Requiring an experimental vaccine to participate in society is in violation of the Code.

**Number 3** - The Covid vaccine skipped required animal safety trials

**Number 4** - 36,000 adverse reactions (including PERMANENT DISABILITY) have been recorded (in the US alone) in the first 90 days of rollout

**Number 5** - 1,524 deaths from vaccine are recorded in VAERS in first 90 days of rollout (USA only)

**Number 6** - The vast majority of Americans have a 99.96% chance of surviving Covid *without* a vaccine

**Number 10** - No one is pulling the plug on this experimental-status vaccine even though we have thousands of deaths and permanent disabilities.
