## OPEN LETTER TO OUR LEADERS

Dear Mr. President

Ladies and Gentlemen of the Government

Ladies and Gentlemen of the Parliament,

The hour is grave, France is in peril, several mortal dangers threaten her. We who, even after retirement, remain soldiers of France, cannot, in the present circumstances, remain indifferent to the fate of our beautiful country.

Our tricolor flags are not simply a piece of cloth, they symbolize the tradition, through the ages, of those who, regardless of their skin color or creed, have served France and given their lives for her. On these flags, we find in golden letters the words "Honneur et Patrie". Our honor today lies in the denunciation of the disintegration that is affecting our country.

- A decay which, through a certain anti-racism, has only one goal: to create on our soil a malaise, even a hatred between communities. Today, some speak of racialism, indigenism and decolonial theories, but through these terms, it is the racial war that these hateful and fanatical supporters want. They despise our country, its traditions, its culture, and want to see it dissolve by tearing away its past and its history. Thus they attack, by means of statues, former military and civil glories by analyzing centuries old words.

- This is a disintegration which, with Islamism and the suburban hordes, leads to the detachment of multiple parcels of the nation to transform them into territories subject to dogmas contrary to our constitution. However, each French person, whatever his or her belief or non-belief, is at home everywhere in France; there cannot and must not be any city, any district where the laws of the Republic do not apply.

- Delay because hatred takes precedence over fraternity during demonstrations where the power uses the forces of order as a proxy and scapegoat in front of French people in yellow vests expressing their despair. This while infiltrated and hooded individuals vandalize businesses and threaten these same forces of order. However, the latter are only applying the directives, sometimes contradictory, given by you, governors.

The dangers are rising, the violence is increasing day by day. Who would have predicted ten years ago that a teacher would be beheaded one day at the exit of his college? We, the servants of the Nation, who have always been ready to put our skin to the test - as our military status demanded - cannot be passive spectators of such actions.

Therefore, those who lead our country must imperatively find the necessary courage to eradicate these dangers. For that, it is often enough to apply without weakness the laws which already exist. Do not forget that, like us, a great majority of our fellow citizens is fed up with your wavering and guilty silences.

As Cardinal Mercier, Primate of Belgium, said: "When prudence is everywhere, courage is nowhere." So, ladies and gentlemen, enough procrastination, the hour is serious, the work is colossal; do not waste time and know that we are ready to support the policies that will take into consideration the safeguard of the nation.

On the other hand, if nothing is undertaken, laxity will continue to spread inexorably in the society, provoking, in the end, an explosion and the intervention of our active comrades in a perilous mission of protection of our civilizational values and safeguard of our compatriots on the national territory.

We can see that it is no longer time to procrastinate, otherwise tomorrow civil war will put an end to this growing chaos, and the deaths, for which you will be responsible, will be counted in thousands.
